NPDC's Draft 10 Year Plan

Office Use Only: 1187

Submission No: 501

Amy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Not necessary at all. Focus should be on infrastructure like poor roading, the potholes on highway 3 etc

NPDC's Draft 10 Year Plan

Office Use Only: 1191

Submission No: 502

Grace White

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1195

Submission No: 503

Jor-EI

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This should be top priority as something that is needed and be well ahead of the possibly-nice-to-have issues being considered.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I have lived in an area with water meters and would never voluntarily go back to having one. They are just a ripoff, are zero incentive to reduce usage and are a further cost (and kick in the teeth) to those already water-conscious and doing all they can. Most won't care enough to change their habits, unemployment benefits will have to be increased as landlords will put the costs on to tenants and taxpayers will have to cover the bill yet again. Stupid idea that should never have been put forward.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Take it up with the idiots that built there in the first place.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Option 4: Coastal walkway extension is not needed - spend the money on maintaining/upgrading existing tracks.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Option 4: Plant the trees but do not waste money on electric vehicles. Have you even done any research on these abominations? They absolutely do not live up to the clean green image the sales people are trying to convince us of. Have a look into how they strip-mine third-world countries for the rare minerals (which will run out long before half the population can get an e-vehicle) required in manufacture, increased drain on electricity and the pollution associated with creating said electricity.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Instead, create a decent, international quality multi-purpose indoor facility to attract bigger events for the arts, concerts, functions, etc. that we currently haven't got anywhere to adequately house. Sport should not be a high priority.

NPDC's Draft 10 Year Plan

Office Use Only: 1196

Submission No: 504

Trinity Manson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

So your going to charge people to use the water ? It's already a costly place. What about putting in bigger water tanks collection off the roofs of houses instead ?

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1202

Submission No: 505

John Christini

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water metering introduces overhead and forces others to cover low users. Households with more people obviously need more water, so why should they start to pay more because another household has less occupants. That's not a fair allocation. A general payment as a general part of rates as it is now is a better scheme. At the extreme, if everyone started using less water, the council would have less income and end up putting the price up in any case. Spend the water meter installation money on the water infrastructure itself.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Spend on water infrastructure and critical assets first. This shouldn't be a priority at all. We have adequate tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Check your science.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Building a multi-sports hub during a crisis of fragile water infrastructure is a poor move by the council and a sign of the council giving into lobbyists with their own agenda. Have no issue with the council being the resource used to construct a multi-sport hub so long as it is funded by the sports that will benefit. The golfing sports community receive no funding from the council, but still maintain assets which cost anywhere from \$50,000 to \$500,000 per year to maintain. It follows that other sporting codes should be able to do the same and supply their own funds for a multi-sports centre. If the council does build the centre, then it should be charging each code that uses it at least \$100,000 per year each. This should not be a facility that is provided at no cost to the sporting codes using it. There should be an expectation of user pays. The sporting codes can collect their share of the \$100k pa from membership subscriptions from those playing the sports, it shouldn't be an issue.

NPDC's Draft 10 Year Plan

Office Use Only: 1203

Submission No: 506

Alistair John

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is an important vehicle in addressing physical, social and mental health & wellbeing. We should be developing the community sports hub as soon as possible.

NPDC's Draft 10 Year Plan

Office Use Only: 1204

Submission No: 507

Deane Whitmore

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Stop wasting money on ego building projects and concentrate on what is important for people to move to New Plymouth. It's not about having gallery's that don't pay or bike sheds and bike stands that get vandalised, it's about being able to drink the water. Can I remind Councillors that it's our land your defecating on with your lovey dovey pipe dreams. If you have infrastructure they will come... apparently.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Stop making it the ratepayers responsibility for bad management over the varies elections, unqualified Councillors, remember if they turn up to a meeting they get paid money, that's the real reason they are there, get qualified people making educated decisions.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Just [REDACTED] do it!

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Might as well, you offer nothing else to sell the district to the rest of New Zealand.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Stop listening to your entitled young Councillors that want to stop meat production, listen to Mother Earth and evidence on the net, you are driven by feel-good warm fuzzies... much like the [REDACTED] you and your younger in-experienced Councillors have every "Strateg" meeting. Destroy this province, you might as well destroy New Zealand.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Having worked on the farcical Yarrow Stadium and the lack of interest from the spectators, we need to attraction spectators to more diverse sport that the outdated and boring Rugby that you can watch with 4K replay at home or in bars at a fraction of the cost of beers. Bring us more sport, bring us diverse sport, but keep the [REDACTED] and the [REDACTED] away from women's sport in doing it. Stuff the Yarrows stadium, it's had it's day... and yet, it's all about saving face rather than public decision... did someone say Jacinda and Communism?

What else?

Stop putting bus shelters in areas that are only used by school kids that are already trenced getting to them from their school, stop listening to bus drivers for your town planning and infrastructure decisions. Get the out-dated "[REDACTED]" away from making his Council decisions without any data collection on traffic flows, and pedestrian movements. Just because you employ him, doesn't make his ego building and ladder climbing salary correct. People like him are making decisions for your ratepayers without consideration for conman sense... I could go on, but I suspect it will be deleted before making a difference. Thank God for social media for allowing free-speech and opinion... that is still in the New Zealand Bill of Rights isn't it... or have you been able to control that as well?

NPDC's Draft 10 Year Plan

Office Use Only: 1208

Submission No: 508

Tony Kemp

Organisation: Taranaki Rugby League

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Please include Rugby League in the proposal. Stop only supporting the rugby unions and support the league community as well. Taranaki Rugby League does not have a home and would like to be included

What else?

Rugby League is growing in Taranaki and the council need to give as much Love to the league community as you do to the union community.

NPDC's Draft 10 Year Plan

Office Use Only: 1209

Submission No: 509

John Passmore

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Don't spend lots of money on consultants and fees.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

How much water is lost through leaking pipes? Taranaki has an abundance of water, much of which already just flows into the ocean. Do more to utilise what we have.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

I doubt if this problem will go away despite any civil works. Its always going to be low lying and prone to flooding. You cannot defeat mother nature

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

17 hectares in 10 years is a joke. Little more than a PR exercise and a poor one at that. Electrifying your fleet only works if the electricity is renewable. Spend money on helping people conserve energy which is a win-win.

Developing a multi-sport hub

Comments

I thought it was imminent. Why wait 4 or 6 years? Thats just a poor joke

NPDC's Draft 10 Year Plan

Office Use Only: 1210

Submission No: 510

Michael Crow

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This asset should have been maintained by previous Council

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Moturoa so called roundabout is exactly not. This is the first one I have seen that has been designed for trucks(logging) not the residents. Whoever designed this obviously doesn't live local. It can be a nightmare using this. Looks pretty and thats about it!

NPDC's Draft 10 Year Plan

Office Use Only: 1211

Submission No: 511

John Simes

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

The initial cost of install, ongoing maintenance will be excess. I note there has been no information about life expectancy of the meters and when they need to be replaced and cost of that. I think the charges will be expensive and morph into revenue gathering. It seems, it's been a very good marketing ploy by Council about excessive water use and need for metres in last couple of years.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Option 1: Do not develop a multi-sport hub.

Comments

Don't believe ratepayers should fund this as sporting codes should do it most have suitable facilities already

NPDC's Draft 10 Year Plan

Office Use Only: 1220

Submission No: 515

Ura

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

its would be amazing to extend the walkway to see taranakis beautiful scenery

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1221

Submission No: 516

Debbie Taylor

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1222

Submission No: 517

Melanie Keighley

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Sewage overflows are completely unacceptable - fix the pipes and ensure our environment stays clean and healthy. Waitara and Bell Block have suffered from sewage overflows and thus must be fixed. We waste a huge amount of water already. The population of the district is increasing but the rainfall is not. It's time for water meters to be installed - people need to realise what they are using and be much more responsible for their consumption and wastage.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

As before

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara has been the 'poor cousin' for a long time. I believe fixing stormwater issues is a huge priority - no reason this problem should be happening. Waitara has long been overlooked. Invest in Waitara.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

This is the chance to do something that makes Taranaki stand out. It will generate tourism and aid our economy in the long run. It would be a first class asset. The coastal walkway is well used and this extension would benefit huge numbers of people.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I understand that for some codes existing facilities are not sufficient. This does need to be addressed. I support the development of this hub but I believe option 2 is best. It means a longer wait by 2 years but other projects are more pressing.

NPDC's Draft 10 Year Plan

Office Use Only: 1224

Submission No: 518

Rebecca Roberts

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I think we pay enough money already and this is yet more money out if the pockets of hard working home owners

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I feel like this is a pretty important job

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I like the idea of this however there has to be a payback in tourism for this to work the people need to have their investments work for them

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

We are already planting lots of trees without this extra funding. Farmers are riparian planting and doing a great job. Not interested in money being spent here at all

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1226

Submission No: 519

Brady Whale

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Use the \$230 million dollars to fix the roads.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Spend \$120 million of fixing the roads.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

Fix the roads.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1250

Submission No: 537

Cameron Stewart

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1251

Submission No: 538

Maraea

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

How is this not already a plan? Obviously you should extend thr walkway to Waitara.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

It's not needed. We literally have yarrows and tsb stadium. Chill with the hubs. Also there's the waitara hub thays just been built. No multisports hub. WASTE OF MONEY

What else?

I dont care bout the water and plumbing. Def yes for walkway extension. Def no for new hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1253

Submission No: 539

Kayla O'Connor

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1254

Submission No: 540

Ash Smith

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

With the amount of water I use would possibly lower my water bill, the colossal cost of paying for and installing the meters would be better spent on existing infrastructure. I suspect there has already been a surreptitious scuttling around installing meters recently, wherever the infrastructure to dwellings has broken down and thats acceptable. But to carry out an excavation in front of every dwelling would be an outrageous cost and may not even put off the requirement for more water resource.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

When our ancient water, sewage and stormwater reticulation is collapsing, you want to us to pay 36 million on a new footpath? Sort out our infrastructure, THEN perhaps commence the grandiose schemes please.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Comments

This one I am unsure about. What I am sure about, is by year 6 the 40 million will have blown out to 140 million

NPDC's Draft 10 Year Plan

Office Use Only: 1255

Submission No: 541

Jessica Taankink

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 1257

Submission No: 542

Peter

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1258

Submission No: 543

Barbara Anne Smith

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

It should have been fixed years ago but underinvesting by the council has put New Plymouth community in the position where the water quality is not as good as it should be and the sewerage is faulty. Appalling management has meant that it needs to be fixed, and properly, now. We do not want to end up like a third world country. Proper management and foresight is needed.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

This is not an option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Again due to incompetence and lack of foresight in town planning this is needed.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

This is a priority. As the infrastructure elsewhere is breaking down, eg roads, water and sewerage, the community will need a place to go to have some down time in safety.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I want to see more trees planted. The fleet should be reduced by half with electric bicycles making up the shortfall.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

There is a big gap around public transport, what is happening there?

NPDC's Draft 10 Year Plan

Office Use Only: 1260

Submission No: 544

Emma Cummings

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Saving water is important for me

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I love tracks and walk ways. Plant more trees

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Let's keep NZ green. Hold fortnightly/monthly voluntary rubbish pick up events. I would be interested in volunteering if this were a thing.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have sports ground and a new sport hub in Waitara. This money could be spent on the other projects like water metres or extending the walkway.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1275

Submission No: 552

Stella

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Fixing the plumbing issue should resolve most of the water issues by itself. Water meters won't fix the problem but just put a further burden on already burdened rate payers. The supply and installation of all the water meters in and of itself will be an enormous (and unnecessary) cost to rate payers also.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Fix the problems first and then look at leisure items.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electrifying the fleet will not do much for climate change - the batteries which will go to waste will be a much bigger problem than the small amount of emissions produced from the NPDC fleet. You should be more worried about the thousands of people who will be out of jobs when oil and gas is gone.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

If we have events like Covid to last for the foreseeable future then the multi-sport hub will be of no use - kind of like the airport now. Focus on the essentials, not the luxuries.

What else?

Focus should be on the essentials, not on the luxuries. Fix the infrastructure and try and burden rate payers as least as possible as the future of oil and gas are looking grim and the future is an uncertain one. Jesus is coming soon, so there is no need for luxuries.

NPDC's Draft 10 Year Plan

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Why were houses built on a flood plain

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

In current financial climate some rate payers will already be struggling to pay bills so a dramatic increase in rates will be detrimental.

NPDC's Draft 10 Year Plan

Office Use Only: 1279

Submission No: 555

Daphne Hick

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Whilst I realise it is necessary to fix the plumbing, I think the council needs to think outside the square. There is plenty of rainfall here; every new home should have to have a water tank, like rural properties do. Tanks for collecting water for existing houses to save rainwater should be encouraged by making them available on a pay-through-the-rates-scheme to make it affordable. Then we would hardly need water metering at all. Subsidies for lower water use toilets and showers should also be available. We need to add these to our by-laws on our house planning. Better for the environment, better for people's pockets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

See previous answer

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

The drains in Taranaki generally get blocked with leaves and debris. They seem to be cleaned out very rarely. Buy another "Sucker Sam" lorry or two to make drain cleaning a much more regular event. This would employ more people, who would in turn, contribute to the economy (and thus rates and taxes)

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I do not actually believe in Option 1 but both other options include the electrifying of the NPDC car fleet. This is greenwashing - buying new vehicles for the sake of it does not help the environment. A wonderful new plan would be to start using the train lines more - making a tram line that went from the port to the airport. Taking cargo to the port (logs etc) could be done at night on the same track. It could be like the trams in Europe with stops every 500meters or so. This could take many cars and buses off the road, which would be far better for the environment than electrifying the NPDC car fleet.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

There are lots and lots of wonderful sports venues here already. We do not need any more.

What else?

New Plymouth is a wonderful place to live but we could follow European examples to make it even better. The tram systems in Germany and Switzerland offer great ideas for a greener future. Encouraging Americana is harking back to a petrolhead past, which although fun and interesting, is not our future. We need to develop public transport that helps gets vehicles off the road; water use that makes the most of our natural asset of high rainfall by saving the surpluses house by house; thinking pro-actively about the future rather than just doing the same old things. The tree planting ideas are wonderful too, but let them be fruiting trees to help us all eat better too.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

We need to fix our plumbing issues now so as not to have a much bigger debt further down the line

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

We are already paying for our water in our rates now, does this mean another monthly bill to have to pay as well as increased rates?

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

It is our preference that N.P. Council spends any funds on fixing our water woes. This is much more important than new cars or green spaces. I love our parks and reserves but the money is better spent elsewhere.

NPDC's Draft 10 Year Plan

Office Use Only: 1286

Jackie Sole

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Hopefully burst or leaking pipes on Council property or under roads etc don't add to so called consumer water wastage.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Just that basic needs such as water, roads and footpaths should be priority, in Inglewood and Waitara as well as New Plymouth.

NPDC's Draft 10 Year Plan

Office Use Only: 1287

Submission No: 559

Warren

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

If we can stop losing so much water through leaks we don't need to spend as much on new infrastructure.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

If we fix the leaks in our piping we won't need to worry about the rest

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Definitely needs doing!

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

This is the best option for driving water use efficiencies and caring for our awa

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Needs to be done

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Yes we need to do this!

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Lake Rotomanu water quality - it's all very well the replace the outlet, but the inlet needs work as well to maintain and improve the lake's water quality. The do nothing/too hard/too expensive approach is not good enough. Council should at least get Beca to do the scoping work they quoted for, so there is a better understanding of the feasibility and costs involved in upgrading the lake intake.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Fix pipes in areas where homes have been established for a long time. Instead of water meters maybe all new build in town and out need to be on water tanks therefore not taking out of water system that feed homes already using water mains. In a civil defense position we will have some homes in town and out that have water tanks that will be able to help people who may be on the mains that were broken in the civil event. Make use of roof tops we have and keep water in the rivers :)

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Stop taking money from people and come up with ideas that sustain our community instead of bleeding them dry.

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

How can you catch free water and use it??? If each property was given the ability to store roof water they can then use it in summer and slow a percentage of storm water going into storm water drains?? People with water tanks are more mind full of their use of water and the cost to get more.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Maybe buy more land for public activities it's cheaper to build on undeveloped land then get public or tourist to plant a new forest around new huts or bike tracks that have been established. Extend our national park please.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Lets have public trains. Electric cars is green washing. what happened to bio fuel??

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

NP people are sport crazy so good investment and brings big stars to the area.

What else?

Thanks for the opportunity to have my say i hope it helped. Lets be better than every were else and not be suckerd to just follow the trends . Would love to help out in reduceing our waste and useing it wisely.

NPDC's Draft 10 Year Plan

Office Use Only: 1314

Submission No: 578

Hayden Shearman

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Would be a big boost for Waitara and we definitely need bike riding options near Oakura. I would also love to see the walkway extended from the port past Back Beach at least part of the way to Omata (if not the whole way).

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

There are many pocket "green" areas around New Plymouth that are mostly grass but aren't used by anyone. I would love these to be returned to native trees and shrubs with little walkways through them.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Also consider incorporating running and athletics with 1k jogging trail with distance markers and a 110m all-weather straight for sprinting and long jump. Plus discus circle. Inglewood doesn't get enough use because it is too far for many to travel to.

NPDC's Draft 10 Year Plan

Office Use Only: 1316

Submission No: 579

Maryann Walsh

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Introduce water meters to all new homes being built immediately. Rollout the introduction of water meters to existing homes over a longer period of time ie. 6 years, means the upfront cost this coming year is not as high and therefore less rates rise required.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

what does the long term plan look like for the low lying areas? We cant keep putting money into areas where it is always going to be a problem. Maybe people need to move as we also have to consider the projected increase in sea levels with climate change.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Need to continue putting money into this area as this is bringing people into the region to keep our business' operating.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

The money is better off being spent on infrastructure. The current NEED is to spend money on pipes, roads and water for our community.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have facilities within the region that can provide us with the resources required. These need to be maintained and upgraded if required to ensure our future sports requirements are protected.

What else?

What happened to the money from the sale of the farms in Australia? Surely this money can be used to upgrade the infrastructure.

NPDC's Draft 10 Year Plan

Office Use Only: 1317

Submission No: 580

James

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

option 3 is \$2million per 1% saved, option 4 is \$1.8million per 1% saved. Option 4 is better value.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

It is only 0.4% difference between option2 and 3, the district would really benefit from the trails

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

In the next plan the caf funding could be extended if found to be successful.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 1319

Submission No: 581

Donna Williams

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1320

Submission No: 582

April Dalleg

Organisation: Taranaki DHB

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

I hope this will fit the budget of families who are struggling to pay bills weekly.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This will be great to boost the recreation of taranaki.

NPDC's Draft 10 Year Plan

Office Use Only: 1321

Submission No: 583

Eddie Raikes

Organisation: Flow Industries

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Long overdue. If this essential infrastructure and important assets are neglected any longer major reactive failures could occur. Fixing things reactively almost always cost a lot more than planned upgrades and maintenance. The council's proposal is prudent and this should proceed as essential regardless of public opinion. This is not popular spending but very prudent.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

By the time this is actually implemented New Plymouth will have grown even more and our water usage problems will be huge. Do it now

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Do it right first time. It will only get more expensive if it's left. Needs to happen. Do it right.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The walkways we have now have made a name for the place. Let's build on that it will be a huge drawcard for visitors.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I dont belive this is prudent spending right now. Plant half the trees and buy half the cars

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Make it happen . This is needed

What else?

Good work NPDC for putting forward this essential infrastructure spending. Not popular but essential. Great stuff 🙌

NPDC's Draft 10 Year Plan

Andrew Paterson

Organisation: Flow Industries

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Fix it now before it gets to be a bigger problem

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Just makes sense

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Keep moving forward

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Keep up with the changes

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Keep moving forward

NPDC's Draft 10 Year Plan

Office Use Only: 1324

Submission No: 585

A Watkins

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

This should have been done years ago!! Now we are faced with horrific rates increase to pay for council negligence! These assets are long life and the cost should be be carried over the life off the asset through debt, not by excessive rates burden on people at a time of huge economic uncertainty!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

NO WATER METERS! How many times do we have to say this!!

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We can't afford this given the state of other infrastructure. Fix the broken stuff first!

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Simply cannot afford luxuries like this at this time!

What else?

This survey was very hard to find! Clearly trying to limit people having their say.

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Increase rates for those that use the system. Do not charge rural addresses that are on tank water and have their own septic system

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Increase rates for those that live in the city and use the water supply. Encourage city residents to install water tanks so they become more self sufficient. Do not increase rates for those who live rurally and have their own water supply ie. Water tanks

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Fix our waterways first

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

What is to happen to Yarrows stadium? Will rate payers have to continue to pay for this as well as a new multi sport hub?

What else?

Fix the infrastructure first to prevent any more fines being incurred

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

No to introducing water meters!!!

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

from David Langford re water meters "And, no, it's not the first step to water privatisation. The law stops anyone making a profit on water supply, so we can only cover our treatment and delivery costs" Yeah right !!! tell that to the ratepayers of Auckland, Watercare obviously make no profit !! in theory installing meters ticks all the right boxes, "we won't privatise" but once installed it's just a matter of time when a new Mayor / councillors are elected with self interests that have a deal too good to be true..... "get a private company to run the water system that will save ratepayers millions" If water meters are installed they should be used purely to identify overly high users, not to bill everyone actual use, but that eventually leads onto charging and then selling off..... NO WATER METERS !

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Fixed price contract no budget blow out by contractors

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

No to water meters being installed.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Who's pricing these? Seem expensive?

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Bike to work, or catch the bus

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Utilise the facilities Taranaki already has

What else?

No to water meters
