## **What else?**

# NPDC's Draft 10 Year Plan

Office Use Only: 46-A

**Submission No: 1116**

**Thelma Luxton**

Organisation: Urenui Onaero Liaison Committee

Wish to speak to the Council: No

---

SECURITY AT URENUI DOMAIN ON NEW YEARS EVE 2021.

The above committee wish to ensure that the council will continue to provide security on the Urenui Domain on New Year's Eve, 31<sup>st</sup> December 2021.

Rationale:

This security has been provided by the Council for over 10 years and wish that this is maintained to ensure the Domain is kept trouble free during the celebrations. The population increases to upwards of 3000 for this period and by maintaining a secure presence it is paramount to maintaining safety.

Thelma Luxton  
Secretary  
Urenui Onaero Liaison Committee.

# NPDC's Draft 10 Year Plan

Office Use Only: 2517

**Submission No: 1117**

**Hannah**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### **Comments**

Electric cars are worse than standard petrol cars! The batteries are made from horrendous chemicals and cost so much to replace. Invest in better public transport or consider vehicle sharing

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

Don't bother fixing the yarrow stadium tear it down and sell for housing sections and contribute that fund into building a massive multi sports arena

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2526

**Submission No: 1118**

**Michael Bruce**

Organisation: Guangzhou Holdings Ltd

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

What about sewage in Urenui? It is needed NOW

# NPDC's Draft 10 Year Plan

Office Use Only: 2527

**Submission No: 1119**

**Shaylee chapman**

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2528

**Submission No: 1120**

**Sarah McIntyre**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

Please enable horse riders to be users of the tracks and trails network

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### *Comments*

The multi-sport hub should not be built at the current NP racecourse site. There are other site options e.g. near the airport that would be a much better and future proof location.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2529

**Submission No: 1121**

**Chris Barry & Justine Driver**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### *Comments*

NPDC should offer water charge discount to low income families if meters are introduced NPDC could encourage developers and home owners to install rain water tanks by offering a rebate or interest free loan.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

### **What else?**

Be great if NPDC could introduce policies that actively discourage urban sprawl and encourage living in or close to CBD. This would save a lot on future infrastructure costs, make for a more vibrant CBD and greatly lower our carbon emissions, especially from transport and energy consumption.

# NPDC's Draft 10 Year Plan

Office Use Only: 2530

**Submission No: 1122**

**Colleen Frederickson**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

A pipe burst in front of my house. The bloke said they were gonna replace, but I'm pretty sure they just patched it and called it a job done. It's gonna need replacing anyway, just do it.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Don't introduce water meters. It's a stupid idea. It just means poor people with big families get punished. Water is a human right.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

There are a thousand more important things to worry about. Who cares about a fancy walkway when pipes are bursting??

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

It would be cool to have this eventually, but again, there are more important things to do.

---

# NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### *Comments*

Please encourage rain water collection on all new builds and make it easy for homeowners to install tanks and required plumbing on existing homes

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

Concentrate on the traverse first, then the walkway.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

Office Use Only: 2537

**Submission No: 1124**

**Miah Francis**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2538

**Submission No: 1125**

**Blyde Jenny**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

We already pay for water in our rates. Water meters would be a double tax

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

More trails are badly needed. Becoming a very popular pastime

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

Really against the rebuilding of yarrow stadium most unnecessary expenditure. One stand would be more than adequate.

# NPDC's Draft 10 Year Plan

Office Use Only: 2541

**Submission No: 1126**

**Eoin O'Mahony**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### ***Comments***

Fix the infrastructure before wasting money on recreational projects like the walkway etc.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

No water meters. Just be smarter with our rates. Stop wasting money on art gallery's nobody visits, walkways and other pointless attractions. I pay my rates for infrastructure water, roads, waste disposal etc. Look after the basics first.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### ***Comments***

Fund it with the money you raised from selling leaseholds.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Sort out our infrastructure first before spending our hard earned rates on frivolous pursuits!!

---

### **What else?**

Will the results of this survey be published or be available to us ratepayers?

# NPDC's Draft 10 Year Plan

Office Use Only: 2555

**Submission No: 1127**

**Jessica**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

Water is a necessity and brown water is NOT OK!! All Inglewood tap water should be drinkablw. priority one!

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

I say no to water meters in Inglewood until water is as good as the rest of tramaki

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

1,600 hectares I think the extra \$60 mil needs to be in the kitty.. a lot more than the foreshore to look after!

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

If your going to build a hub put it first in the list so the revenue can come in faster. Although as a non sports person a major one in Stratford would be fine for taranaki. Encourage people to live/venture out of the main hub and not as far as people in bigger cities travel for sports

---

# NPDC's Draft 10 Year Plan

**Submission No: 1128**

**Dene McManus**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

### *Comments*

My concern with water meters is that they don't discriminate between small or large households. Thus one will definitely do well but the other will have a harder time, due to more showers or toilet flushes and even increased water usage for washing etc.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

### *Comments*

I haven't opted in this as I'm currently not a user of it. But from what I've seen, it's awesome but...there are those who think that it is some sort of racetrack. But I personally think there needs to be some sort security monitoring/recording system as a deterrent.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

I'm not against it but sports costs have gotten a bit out of hand

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

I hope there is a longterm plan to mitigate the same thing happening to future generations

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Tracks and trails have had significant work put in them over the past two term, it is not necessary.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### **Comments**

Proud of our council for making this a priority!

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Yay, this is going to be beneficial in so many ways!

---

### **What else?**

It's great to see the things that are important to us in this list of actions to come!

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

council has received Millions from Developers for new area for water and sewerage . these funds have disappeared into council coffer to be spent on non water items .

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

water meters a con you will remove the standard yearly charge , then increase the paymnets for water meters . the cost spent on these tax gathers will be better spent on the water system

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

these people have paid rates for core items . this needs to be adressed at little cost to ratepayers

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

the Waitara extension is a must and should be top priority

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

education is the key for this so called climate change . i feel it is again a total con that will cause all people very dearly in the pockets

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

more important things need to be done . this is a want not a need . water . sewerage roads rubbish are needs not wants . we are already paying out millions for the cock up at the yarrow stadium

---

## What else?

council needs to look more at needs not wants . we are in very trying times . jobs being lost business closing. stop the ego trip stop funding Len lie

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

I don't care what you do just don't charge me for it I already pay the state an a horrendous portion of what I earn, no rates hike, no water meter that costs... ask the government they've got all my money get it from somewhere else.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

No water meter. No additional costs for people who already can't afford what you ask for

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

#### **Comments**

Fix it unless it's gonna be something I get billed for again ask the government for money

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

This is honestly a waste of time... the generation that goes outside will have died off in 20 years or so

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

#### **Comments**

Add a zero to that and make the government pay it

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Cesars circus is a waste of input, I'd suggest arts and music but the chrome house of worship to an artist that isn't even a kiwi that no one knows suggests you can't get that right either. Put money into intellect not pugilistic displays

---

### **What else?**

Life has never been harder... stop reaching in pockets... your shit effects every aspect of our society and those in the higher end of the middle are struggling so the lower end of the socioeconomic structure must be suffering... so whatever you decide to do... no rates hike, no meters no more hidden charges... reach into the governments pockets not the people's.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Plumbing etc is the most important thing that peoples rate should go towards as with out water concert events will be unable to go ahead in New Plymouth no use have lovely stadiums rugby stadiums etc if you don't have water.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

It is ridiculous that we are facing this as there has been so many new builds in New Plymouth if it was helped funded for every new build to install water tanks we would not have water shortages and also be in a better position in the case of a civil emergency as the more water the tanks the better. We should be look at trying to get people to install water tanks in all new and any exisiting homes that we can.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

It is like maintenance on your own home these things need maintenance all the time so you do not have these urge expenses coming up.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Once again we have all these things they need to be maintained so they do not require urge big amounts to be spent.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

My feeling are that vehicle fleet is a waste of money as it is not as if those cars been driven now will be taken off the road they will still be driven around polluting only with somebody else driving them if rate continue to climb like they are the general population will be must longer before they will be upgrading to more electrified cars.so I don't feel that replacing them would be any advantage at all.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Water should come before the sports hub as well as traffic roads as New Plymouth can not cope with the influx of people at the racecourse when we have events now like Americana woman etc. Also in current situation with Covid 19 is putting everything in one area maybe the best idea. Doing up already existing hubs would be money better spent why can you not use the rugby stadium for other sports.

**Daryl Hayman**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 2594

**Submission No: 1145**

**Liam Richard O'Neill**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Why has the focus of Council spending been on 'cultural and sport' projects like the Len Lye Centre and Sports Hub? I understand we need tourists. Yet without infrastructure such as proper plumbing, sewerage, public lavatories, power lines, roads, and other amenities if tourists come here and see how poorly we maintain our city then it is a self-defeating effort.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

I do not believe water metres are the solution. I am in favour of the council actually going out, identifying the defective pipes that are leaking, and then repairing or replacing the broken pipes. If the council, past and present, had actually taken the time to do routine proper maintenance then we would not be in such a dire situation.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Waitara is often forgotten about. I am glad the city council is focusing its efforts in the outlying communities of New Plymouth.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

I think, that with the Corona Virus situation, given that we will not have anywhere near the level of tourist traffic as we once had for quite some time, that giving the tracks a small boost over the next ten years would be preferable so that the council can focus on delivering what is needed right now for the community.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

The CAF is admirable. I do however think planting trees, particularly native flora, is much more urgent than the need to electrify the vehicle fleet. As the infrastructure for charging electric cars is not very well established in New Zealand yet.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I am currently not in favour of the sports hub. As I think, with all honesty, that we have other pressing urgencies facing our community. I also object to the ratepayers being billed on their rates for the sports hub when some segments of the community will never use it. I also object to ratepayers having to pay for Yarrows Stadium, once again when some residents never use it. Make no mistake, I love sport, however we have an abundance of parks, cricket clubs, rugby clubs, bowls clubs, all of whom have their own turfs. As well as the hockey turf in town also. I do not see why we need a multi-sport hub when there are already plenty of grounds available for a variety of sports codes.

**Submission No: 1149**

**Liz Gooch**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Our plumbing should not have been allowed to get to this state. Water pipe replacement should be a part of ongoing planned maintenance. Leaky pipes, evidenced by continual wet spots on roads or pavements need to be dealt with urgently.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Unfortunately you only offer 1 option which does not include water meters. I believe water meters are not a water saving device as those prepared to pay will continue to use as much water as they wish and will not be prepared to limit their usage based on council requests. A preferable system would be to encourage people to buy/use water tanks - council could either offer a one off payment for the householder or help with installation.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Get on to it, replace and upgrade, you have neglected this and done nothing despite this being part of the rates fee

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Water meters is not the solution to a population that has more than doubled. You can't keep having more and more people using from the same reservoir you need to increase capacity. We are one of the wettest regions and yet all the water which falls freely daily during our wet periods is wasted as the reservoir is at capacity, then with only a couple of weeks without rain, restrictions are in. Water meters will impact on our large families, poor families who can't afford fancy appliances. It will affect rentals, and quite likely breaches the TOW. Stop trying to make people pay for a basic human right. educate. My experience is that it is businesses using water irresponsibly, sprinklers going on sun divisions in the middle of summer, concrete layers etc. How about all new build have to have a water tank for gardens from their first system, or for flushing toilets etc.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Where do you get these numbers from? It seems you get given a cost and then double it like Yarrow's stadium. You told rate payers it would cost nearly \$20 million more than the actual cost.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

### Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

#### *Comments*

How about the race course be closed and Stratford and Hawera race course be utilised, the conversation and stupidity of carrying horses into the middle of town when most of them live on the outskirts of new Plymouth and Stratford. Make the sports hub, with a proper olympic sized pool, the acuatic centre is not enough to service new plymouth

---

### What else?

Start listening to the community and do some pepper forward thinking. The way you keep allowing me sub division after sub division with no new infrastructure.. Using the same congested arterial and other roads, the same water reservoir, it's sorry sighted and NP will be just like Aucland if we keep going at this rate.

# NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### Comments

I might change my view on water meters if I had an idea of what would be a charge rate

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### Comments

I think the more we do to improve tracks etc the better as it will attract so many more people to the region, better for the economy as well as for locals to enjoy

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### Comments

Improve what we already have don't build more

---

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

I want to see our rivers and beaches safe to swim in again, especially the Te Henui Robert mouth

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

I only think water meters should be used if our rates went down significantly first, I don't want to pay for both, high rates and water

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

#### **Comments**

We do not need a sports hub when our rivers and beaches are not safe to swim in

---

## What else?

I also think the outdoor seating in Devon st east is a waste of money and parking spaces. It's hardly used and what about the 9 months a year they are not being used cause of bad weather, I also think the te henui walkway entrance need a pedestrian crossing near by to connect the 2 for ppl in a wheelchair or people with bikes or pushchairs, it will also allow down trucks that come racing down there too fast and shake the houses and bridge violently

### *Comments*

Fund households to put in water tanks to catch rain water as well. I think we need to get everyone actively participating in environmentally friendly and sustainability programs for the future.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

Prepare for the rebound of tourism. Taranaki is a goldmine and it is totally underutilized in this market! There is so much potential here, it's basically untouched and this is what our overseas visitors are wanting, a real connection with locals, real New Zealand.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Taranaki is way behind the rest of the country with this type of infrastructure. I've recently moved back here after 20years and it's like nothing has changed! Apart from the coastal walkway, that's amazing! Taranaki needs to catch up!

---

### **What else?**

I think Taranaki should take a more drastic approach to sustainability and environmentally friendly infrastructure. Become the leaders in this area creating good publicity for the region for the future of tourism and health and well-being of the people. Start giving NZ the clean green image again that has been tarnished over the years. NZ is way behind the rest of the world.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Sewerage and stormwater needs to be upgraded everywhere to provide room for expansion on housing development as there is clearly a housing crisis in New plymouth and all of nz and npdc seems to be the only council without a plan to provide the means for housing to be developed to solve this problem.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

Introducing water meters will be a good way of determining who uses the most water but will it save money for the people who don't? Will it just cause a hassle?

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Stormwater in waitara definitely need to be improved it is the reason that development of waitara housing has come to a standstill and this issue needs to be addressed sooner than a 10 year plan

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

This is not a priority it would be nice to see this but it is not going to help the way of life for people that are going without housing. A house is a necessity where as a walkway is something we don't really need.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

This would be nice to see also but is not really a necessity of life and should be put on the backburner until electric cars are improved

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

This is a good decision to start the building of this later in the 10 year plan which should be also the same with the walkways

---

## What else?

I think that we should focus on things that are a necessity first and then move on to things that are more of a want and not necessarily something we need such as a sports hub and a walkway

# NPDC's Draft 10 Year Plan

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

### *Comments*

Just do it

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

### *Comments*

Rivers not profit

---

## Improving stormwater management in Waitara

### *Comments*

Waitara should decide

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### *Comments*

For the little extra rates the third option provides so many advantages. This will do more for climate change than electric cars. Invest far more in this. Also though, you need to stop dogs running wild on these walkways (leash control isn't enough when idiots have long leads and take up the entire walkway) and figure out a way to slow down people on ebikes (total respect to people who get speed up on their own accord, but ebikes are causing issues). Coastal walkway to Oakura would be amazing, and then to Okato maybe?

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

### ***Comments***

Yes, but accelerate walkways rather than electric cars. And plant way more trees and do it quicker. Plant them in Bell Block (Hickford park farm) and in poorer parts of town. Climate change will lead to urban heat problems so need to plant trees today so they provide cool places in the future for those that will most need them. Also use this to tidy up some of the crappier parks in the city (you focus too much on keeping a few good).

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Make sports pay for it more. Use it to improve entrance to Pukekura Park. Get rid of racecourse or at least charge them rent

---

## What else?

You need to invest more in parks, playgrounds and keeping the city looking good. Invest more in keeping sewage out of waterways. We've been too cheap for too long, up our rates by a good amount (particularly on richer properties) and then provide some decent social services. Invest in affordable housing. And the consultation document thing looks so much better than the disgrace last time, it is readable and high quality (I hope this is because you sacked whoever made the last embarrassing one). But why does the form use different option words than the document?

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Vital infrastructure requirement, we cannot allow sewer into our sea anymore either

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

Introduce water meters but those who can afford to will still over use their appropriate quotation ie gor swimming pools. Please require own storage tanks on all lifestyle properties immediately, we are we funding that extra water. It should be mandatory for sale lifestyle blocks to be self sufficient for all outside of primary dwelling water use. Subsidies for residential water tanks for garden and vehicle washing, this should become our normal management of water use

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

Great gor local mental wellness family time. Great local and national tourism opportunities and economy, allow option gor commuters from Waitara to New Plymouth

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

We are doing ok here keep momentum without sacrifices elsewhere

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

This is becoming essential for traffic flows, community participation. Part ofvdhst makes us a great place to live. For the participation and wellbeing of our youth.

---

### **What else?**

We cannot please everyone, we cannot pay for everything. Build a solid foundation of the basis get it started.

# NPDC's Draft 10 Year Plan

Office Use Only: 2714

**Submission No: 1183**

**Robert Oliver**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Clearly a priority but needs to be fixed over an extended period of time so the cost is spread over a generation of ratepayers and also at some time in the future it doesn't need fixing all at one time again which could happen if all fixed now in a short period.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

It would still be very helpful to know precisely why we have high water usage compared to other cities. This would help in making a decision as to what level of response is required.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Waitara has survived to date so why the sudden urgency. However could look at some priorities with option 2

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Surely the Council already has a replacement plan with funding already in place (i.e. depreciation allowance in accounts) for its vehicles. The extra cost of those vehicles can be offset with the reduced running costs. We already have extensive parks and walkways with trees as well as the nearby national park around Mt Taranaki. It will not serve anybody to have more areas. If we want trees for climate change then use commercial trees (eg pine) so at least there is a return.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

It needs to be very clear that the sports organisations and users contribute a significant amount towards the total cost, not just the ratepayer.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

### *Comments*

I do agree with water meters/saving water. However, I believe you should retain a base rate charge (a fixed supply charge - as minimal as is possible to still support water treatment, infrastructure upgrades, water conservation initiatives) in conjunction with a set water use rate per household that does not incur a charge. A volumetric charge should only be added to the household bill IF they go over that set water use rate. This would encourage people to make efforts to lower their usage so not to incur anything above the set council rates which includes a base water rate (much like it currently does). This also means that low income households do not forgo using water they need for hygiene and healthy diets in order to avoid spending any money on water as long as they use only up to the maximum 'free' water rate allowed for their household. We all know that, when money is tight, you go to extremes to claw in what you can, even when it means giving up the healthy things eg. fruit/vegies, and water will just become apart of this extreme saving mechanism. Any 'benefit' set up to counteract this will never reach all that it affects as we know from other benefits/social funds. This way the council can get all the useful information they need from the water meters, get income from high volume users, encourage water saving to dramatically cut splurging, promote leak repairs, unite the population in reducing water wastage, whilst still supporting lower income households. I think Caterton District Council may do the charge out only above a certain cubic metres used. Another big thing the Council needs to put in place when improving the infrastructure is through improving WATER COLLECTION AND STORAGE. How many times do we have extreme rain events which could be filling up reservoirs only to go into water restrictions a few weeks later because all the water has been lost out of the water sources. I adhere to water restrictions, even going so far as to always have water collection bowls outside in case of rain and even one in my shower so the garden can get at least a bit of water during these times but I often hear others state that they don't adhere because of the amount of rain we got weeks before and if the council can't even sort out a way of harnessing that why should they adhere to council restrictions. Also, make greywater/rain water collection tanks compulsory in new builds - they do not have to be huge but would prove invaluable in any Civil Emergency if water is cut off, as well as cutting the use on main supplies under shortages/restrictions because it can be used for outside use eg. watering gardens. To support this, existing builds could be offered discounts on water tanks to retrofit onto a property. I believe Wellington Regional Council offers something like this. Again, the tanks could range in size depending on available space.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

Start the new sports hub now. The grandfather rights of professional rugby, horse racing and golf have enabled these sports to leverage numerous opportunities in the past. Other sports such as basketball, volleyball, netball, hockey and athletics need greater opportunity. We need to be investing facilities that encourage and allow as wider cross section of the community as possible to participate in sport. Court sports have a far greater appeal for female participants and are easier to play in social teams.

## What else?

Close the race course, sell some of the land for high density Kiwibuild type housing. Use the funds for the sports hub, create urban landscape like Hagley Park in Christchurch, with trees, space to walk & run, space for sport & recreation every day of the year.

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

#### **Comments**

Clearly if there's a broken piece of public infrastructure it needs to be fixed - esp. if it's leaking water!

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

Keep dogs on leads!! Enforce regularly please!

---

### Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

#### **Comments**

ASAP for our community please!!!!

### *Comments*

i feel like this multi sports hub would really benefit our community and i feel, as a sport mad student, that having all of the sports facilities in one place and having a vast variety of sports on offer.
