NPDC's Draft 10 Year Plan

Office Use Only: 1349

Submission No: 601

Beth

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1351

Submission No: 602

Richard Alan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Comments

Was under investing due to over investing in dividends paid to shareholders of the NPDC LTD!

Saving water and water meters

Comments

Does your own policy prohibit charging you public for water?

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Lower the dividends paid to shareholders.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Put it on new plymouth racecourse.

NPDC's Draft 10 Year Plan

Office Use Only: 1353

Submission No: 603

Jones

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1356

Submission No: 604

Victoria Jones

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It is in serious need. We have seen countless times of stormwater over flowing and causing big problems in wastewater overflow. They both need upgraded - wastewater more importantly

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Wastewater needs upgrading in bell block! The constant overflow into the river is disgusting. I want my children to be able to safely swim there as well as many other generations to come

NPDC's Draft 10 Year Plan

Office Use Only: 1358

Submission No: 605

Sarah Clarkson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

We need more water storage, rather than allowing so much of our immense rainfall to flow out to sea

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Many people already keep their water use as low as possible, so meters will not incentivise them to use less. We receive so much rain that it only makes sense to capture and store that resource more effectively.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

At present spend money just on maintaining existing tracks. Change name of Coastal Walkway to Coastal Cycleway, as it becomes more and more difficult to walk there, especially for infirm and elderly people and families with small children and dogs (even tho on leads).

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Keep researching the actual value to the climate of planting trees indefinitely.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1359

Submission No: 606

Brian

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

This is the best option for our environment, worth that little bit more to look after the waterways

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

But does Waitara have a future with sea level rises and climate change?

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The long term vision is amazing, let's do it now! Get the Traverse done ASAP, before Waitara extension

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

This is a start albeit an insufficient one. Where are these trees going? I would suggest Hickford Park in Bell Block could really be the centre of planting here. It could be a substantial new forest rather than the cow/methane farm it currently is. It would make a wonderful recreation area for BBK, and could have some nice paths through it to explore. With all the new housing in BBK we lack a big park area that we can actually use. Up the tree planting and see if you can get all of Hickford Park planted in 10 years. Maybe work with the schools for nursery and planting so the kids are contributing to making this a better place to be (what a feeling those kids would have)

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Make sports pay more. What happens if they don't raise enough money? Do you stop it? Also, any revamp of the racecourse area should really aim to also improve access to Pukekura Park

What else?

Invest in making this the greenest city in the world

NPDC's Draft 10 Year Plan

Office Use Only: 1364

Submission No: 607

Stephanie Baker

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

I could not find any where what the money gathered from the water meter was going towards, to fix the water problem. If the NPDC go ahead with the water meter than they could use some of that money to go towards fixing of the network of broken pipe eat. Or to make more Wells ect to catch water. May be reducing the rate bill as rate pays are paying for there water usage and take the water bill out of the rate bill people are struggling to pay the high rates.

NPDC's Draft 10 Year Plan

Office Use Only: 1367

Submission No: 608

Jeny martin

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

I want the main intersection in Inglewood to have a new road layout, it's dangerous and hard to navigate. It causes a lot of stress to locals. Library services in Inglewood should be retained, it's very accessible for the community, especially the elderly. Commercial business should be encouraged to stay the bank, petrol station, chemist, everything the town needs to remain a community.

NPDC's Draft 10 Year Plan

Office Use Only: 1368

Submission No: 609

Kevin Steele

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Replace the water network in the areas that fail the most first! not the areas where there is no regular breakage.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Submission No: 612

Mervyn Walsdorf

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Slowly slowly fixy problem.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Without water, we die. Without water meters, people waste water. If you use more water than me why should i pay for the extra you use. I was in Auckland when water meters were introduced and instead of the one rate covers all, like here at present, my water rates were at least halved and the water savings for the city were massive. Keep water as part of the council and don't put it un the hands of an outfit like watercare in Auckland. It's just another bureaucracy and the one we have now is massive enough!!

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

These are just 'nice' things and we've got enough of them. Does Len Lye spring to mind? The current walkway is fine. Auckland and Wellington have got them too but they're called streets and don't need millions spent on them.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Yes. Develop it at Yarrow stadium. It will get more use than the redeveloped place will.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Great asset to city for schools and clubs excellent use of racecourse land, much better than as is...just wasted as a racecourse

NPDC's Draft 10 Year Plan

Office Use Only: 1379

Submission No: 616

Robert Gordon

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

A high priority. A need.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Metering is fair as long as the Water Rate is removed from the current rating system.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We have pretty good tracks now. Extending the Coastal Walkway to Waitara would be useful for many of us. The Taranaki Traverse will be of use to fewer people and should be funded by users (a nice to have). A dream for the local tourist operators who want the rate/tax payers to provide the infrastructure for their businesses.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

This is a 'feel good' project. Water is far more important.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This project is good for the whole district and for a large number of people.

NPDC's Draft 10 Year Plan

Office Use Only: 1380

Submission No: 617

Melanie Frank

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

We really need the multi sports hub to be built ASAP. School kids are having to play their sports at 8.30 - 9pm at night because the TSB stadium is so heavily booked. We need a larger capacity hub. We're encouraging our community to be more active, a multi sport hub built ASAP will help us achieve this.

NPDC's Draft 10 Year Plan

Office Use Only: 1381

Submission No: 618

Keith Cochius

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

As I don't use either water or waste facilities, I don't want to incur any expense for either.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I am a frequent user. They are a tourism asset according to my frequent visitors I take there. So, in essence, they are an indirect revenue earner as more visitors of all capabilities come specifically to utilise these assets.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

For the minimal impact of the fleet, it should be phased out during business as usual I.e. end of life or end or lease with no additional investment.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

A multi sport hub should increase utilisation and decrease operational maintenance by reduction in the number of facilities.

What else?

Being a small city of low-medium income earners with dwindling large industry (given the removal of oil & gas and the knock-on effects), I would prefer a slow uptake on any non-essential initiatives. Given the financial impact of Covid now and in the future, I feel we need to conserve council funding for essential maintenance and upgrades. Unless government funding is provided for targeted initiatives, the council should primarily consider the additional cost to the ratepayer in every initiative.

Comments

Building an excellent water supply is more important for ourselves and future generations.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Water infrastructure is much more important

What else?

I would prefer if every spare penny was thrown at making the water and drainage/sewage infrastructure better. It would be a better legacy to leave than a sports hub.

NPDC's Draft 10 Year Plan

Office Use Only: 1388

Submission No: 623

Grant Lilburn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Ditch the education programs. "You use it, you pay for it" is all the education that consumers need. Rate payers do not want unnecessary funds going to the council propaganda department. You won't know the extent of your leak problem until you have meters installed at the consumer (or do you). Either way leak detection and repair should be part of your operating program. If leakage within your distribution system is significant, as some rate payers suspect, then water use savings could be as significant as that achieved from changing consumer behavior, and if not then the costs of repairs will be less. If, after installing water meters at the consumer, the data indicates significant distribution leakage then you will have to fix them anyway.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

If \$100M has already been added to the Infrastructure Strategy then I assume this cost applies to options 1 & 2 also. The study indicated that resolving these issues would cost \$100M so the \$20M should surely be part of that project or are you going to waste \$20M over the next 10 years "planning and consulting" on how to spend the \$100M. Get on and fix the problem.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Give Bell Block to Waitara priority. The focus should be a safe commuter route for cyclists not a family outing. The surface need only be gravel initially progressing to seal as usage dictates. The Mountain to Sea trail sounds like a wish list for the already over accommodated mountain bike community and glossy eyed Oakura café owners. How many local people, the ones paying for it, will really use it. Rate payers do not want to pay for free facilities to attract tourists to support that sector either (another Len Lye).

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The TSB Stadium was built to be extended out the back wall. Why not do this to improve space for indoor activities. The Multi sport complex plan is a mess. You can't do the job properly while racing is still operating at the same site. The present plans look like trying to satisfy everybody but will not improve the lot for anybody. The present stadium requires a significant area of grass for parking when events are held there. This parking does not appear to be available under the plan and is not compensated for by the small parking area provided on the far side of the race course. This means that only one or two sports can be accommodated at a time. Are the sports present facilities, like netball at Waiwhakaiho, to be abandoned, leaving them no better off, or maintained, meaning they still are unlikely to host larger tournaments because they would have to manage two sites. The same applies for most of the sports vying for space on that site. There are no more fields/courts there than they already have at other sites.

What else?

It is not the councils job to attract customers to the central cities retailers. I am tired of hearing the business lobby groups wingeing to the council to spend money to attract customers to their businesses. "Close the street and build a mall." "Rip out the mall and let traffic in." "Rip out the trees. they make a mess and are a H&E hazard." The footpaths were slippery before the trees were installed due to the Bluestone tiles used. Stick to core infrastructure. The road (street) and parking. The rest is for the retailers to sort out.

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

You have been talking about the water problem for more than 10 years. Under the local government act the council is required to take 20% of rates per year and undertake infrastructure repair. As far I have seen nothing has been undertaken on any infrastructure in the city. I am not in favor of borrowing money we have already borrowed over 200 million dollars which has saddled the rate payers with high rates.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Around 3-5 years ago the council advised that they were going to put water meters in. These meters were bought and rate payers were told these would last 10 years at least, some were put in, then the council announced these meters would be lucky to last 5 years. Councilor Handley proudly announced that he was putting in a meter and announce every month how much water he saved. Since then nothing has been said. A number of years ago Mr. Langford the city engineer announced that every person was using around 330 liters per day but he also informed the rate payers in another breath that the water pipes were leaking around 29% of the daily total. Again today the 13th of March Mr. langford announced similar liter usage but he said nothing about leakage. So, if you take 29% from 330 this equals to around 90 liters, so, rate payers only use 240 liters per day.

Improving stormwater management in Waitara

Comments

This all that rate payers can afford.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electric cars are not required as it is fallacy that electric cars are cheaper.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We do not need a sports hub as we have a lot of very good facilities already and are spending \$50,000,000 on rugby park.

What else?

The council have loaded up the rate payers all ready with large loans, with expensive nice to haves, large numbers of staff with high salaries, e.g. over 100 people earning over \$100,000 per year. In 6 years staff have increase from 350 to over 650.

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Do it right the first time. Make the contractors understand that they are contracted to do it right the first time.....no red is like Inglewood.

Saving water and water meters

Comments

Why not build more water storage or is that too much like commonsense council members. Also new builds should be made to put in water tanks for run off from their gutters. Works well in rural settings just saying.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Really climate emergency for real. Just words to make you sound good 😊.

Developing a multi-sport hub

Comments

What about the pony club, what happens to them the children and ponies, are they still going to be there or they a causality of your plan. Pony club teaches children responsibilities about caring for their pony. More so than playing some other sports.

What else?

No the rates should not go up like you are proposing. Alot of home owners are just making ends meet, your proposed increased will put many in financial difficulty, causing financial, emotional strain on families. How about you the council members take a pay cut look at cut backs in your organization. Do you need so many on the councilors. The number you have seems to many to me.

Comments

I think urban areas should be more accountable for their water consumption, we are rural and have our own water storage and collection.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Our coastal walkway is a great investment for the district

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electrifying NPDC fleet vehicles seems fairly low on the priority list compared with other issues raised in this survey. We personally can't even afford to electrify our personal vehicles so to pay for it in our rates would be a bit disappointing.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

I am 100% against the massive 12% increase in rates to cover all the proposed infrastructure. It comes at an unstable time in NZ's economy, Covid 19 has caused massive troubles with job availability and housing. Rentals are few and first home buyers are only just scraping lending together, burdening already struggling rate payers is unjust. Perspective by decision makers (who are most probably in favourable conditions) is needed.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

If you are considering installing water meters in all homes, let me tell you that this does not work. I come from a council that installed water meters. The first thing that all people stopped watering was all of the council owned verges. The next thing was that the reduced water usage meant that the council did not have enough revenue to cover their water costs, so they had to increase the water rates. This was a good option but a lot of people couldn't afford the increased cost. So the usage dropped further. The best thing that could have been encouraged was to allow the collection of water off the roof for both domestic use and garden watering, like we used to, until bloody regulation got in the way. None of us died. The other problem we have in New Plymouth is the rampant explosion of new land developments without the same rapid expansion of water storage and supply. This is all Council's problem fir NOT PLANNING properly. Get your own act together, before you impose additional costs on a population that cannot afford your largess.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Don't introduce water meters as our poorer people will become poorer!!! More health issues, and more crime!!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

No meters. Increased costs will place more pressure on poorer people that can't afford. Find out who's using lots of water and fine them instead.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

EC cars still have an excessive carbon footprint with the mining for the lithium and the costs of disposable of old cars - the bigger picture stuff. I think status quo as people are learning- and using bikes and walking more- more emphasis on car pooling biking and walking and zoom calls.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have enough sporting places for now. Spend that \$ more on encouraging people to use bikes and walking and I taking a healthy lifestyle. Not everyone is sporty. Just tidy up what we already have.

What else?

Focus more on a health and happiness of all- not just select groups. Everyone travels- more emphasis on healthier safe travel options- safer biking tracks- more bike lockers- that's sort of thing. More events for people to attend to do plantings and clean ups of areas. Get the people involved. Don't add more bills to make our less fortunate have to spend more time at WINz with water charges. Maybe add to rates- pro rata as per occupants in each residence?

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

A water saving plan is absolutely necessary! However, I strongly disagree with the plan for residential water meters. Just include a reasonable average into rates. This will save the "extra" fee seen on rates bills and more importantly the cost of installing, monitoring and billing water meters in every house in New Plymouth. Business water meters I would agree with.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

I agree with Option 4. As per option 3, plus a lot more.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This problem has been caused by the "no rates" brigade and needs to be fixed. You need to ignore [REDACTED] etc.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Do the option best for the environment not the cost savings

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Support doing as much as possible but need a plan and need to think about global warming and sea level increases. Don't waste money on parts of the town that will be under the sea

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

There is so much potential here. What about the little walkways in neighborhoods? So many are not complete or good do with an upgrade. What about more in the eastern hill country? What about a walkway along the Waitara river up to the mountain too?

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Barely sufficient given the global crisis. A start. C+. Do more. Spend more on this. Plant more, plant it faster. Electrify the pool heating systems, and whatever else you use gas for. Convert your fleet to electric today, not a slow rollover. Help the community reduce their emissions. This is why tracks and trails investment is so important so people have alternative transport through ebikes

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Not a priority compared to climate change and sorting out the problems of the no rates mob. Happy for sports to find this though themselves

What else?

Don't listen to the no rates brigade. The reality is most council services are underfunded. Parks are a prime example. We need more investment in maintaining our parks, looking after the walkways, planting trees etc. So much parkland is left to graziers and is effectively privatised by stealth. Don't raise pool fees, you are hitting those most in need the hardest, look at other Councils that have removed kid's fees. Spend more on economic stimulus and development, particularly for economic transition. Spend more on library and museum and go back to having kid focussed exhibitions at the museum bottom floor. Spend some coin on more Len Lye works to display at the gallery and get rid of the ridiculous entry fee for out of towners. More dog control staff is an absolute must as we have too many dogs off leash and harassing people everywhere

Comments

Need to sort the major issues first. If we fix the pipes we will have a lot less water wastage due to leaks

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

If we fix our pipes we will have less wastage due to leaks. I'm sure leaky pipes are a big part of new plymouths water wastage. Also maybe look at removing the silt at lake Mangamahoe mean storage is increased. Atm you can walk on the sediment in both winter and summer

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Look at adding catchments/filters in ALL storm water. This will help remove littler and other stuff being washed out to sea. Also look at emptying all sumps in the new plymouth district once a year. Most are full of sediment and the water just runs over the top

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

This is something we should invest in. We need nature and more plantings to help balance all the harm we have done over the last 70 years

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Need to be careful with electric vehicles they are always getting better but don't want to be having to replace the entire vehicle every few years. Plant more trees just not pines

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is a luxury we need to focus on core issues like water and nature

NPDC's Draft 10 Year Plan

Office Use Only: 1437

Submission No: 651

John Elliott

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Take a longer term view. Start encouraging installation of water collection, not just for garden, but for drinking too. We have always collected rain in the country and are currently in process of moving to NP. I would like to have a small collection tank, 10,000 lt that is trickle fed by metered council supply when required. This would reduce demand incredibly as well as reduce stormwater. It seems madness that we pay to get rid of such a precious resource that falls from the sky. If public health is a concern, council supply could be run to the kitchen faucet as well as tank supply. Easy.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

As previously stated, encourage those of us who want to to install private water collection and storage systems.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Is the lease land income also contributing to this?

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Lead the way with wetland restoration. Forget trees, we have many wet lands to restore that will offer more positive environmental gains for the same investment.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 1439

Submission No: 652

Wayne Robertson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

It is very sad that planned maintenance has been deferred over the years and now the cost of repairs and maintenance is going to be huge. Poor vision on behalf of previous councilors and senior staff.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Maybe the council should have a system where water leaks on the road are repaired quickly, rather than leaving them to leak for weeks on end. What is the council doing about finding alternative water supplies for the city. For so long we have relied on the water from Mangamahoe and the river. The city is expanding so alternative water supplies are required, not just more storage tanks. Desalination plants could be a way to go as we live by the sea. WE NEED ALTERNATIVE WATER SUPPLIES URGENTLY.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Walking tracks and Coastal Walkways are nice to have but are not essential. When there is a surplus of money then lets do it, but now water infrastructure and Roding are in urgent need of work which means money. DO NOT EXTEND THE WALKWAY.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

The council need to show how much the cost of running the electrical vehicles is going to cost and justify it.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Again the sports hub is a nice to have. If there is support and sponsors are found then lets start it. The money going into Rugby park for the rugby fraternity should have been put into a multi sports hub not just for rugby.

What else?

Too much time and money is being spent on touchy feely nice to have items. The council is there to run the city and this is infrastructures, i.e. the three waters and Roothing. It also concerns me on why we have to truck all of our rubbish to the Manawatu when money was spent putting in a system for rubbish in Eltham??? Why do we still have to send all the food waste to Hampton Downs when there is a facility in Uruti. Someone has to be accountable for the mistake and they should stand up and own up. The Senior Council staff and the elected councilors MUST accountable for mistakes they make, no excuses. Afterall it is the rate payers money they are throwing around.

NPDC's Draft 10 Year Plan

Office Use Only: 1440

Submission No: 653

Val McEldowney

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The longer you leave it, the more it is going to cost. It has to be done, get on with it.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Why should Waitara always be the poor relations

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This is a must and will bring extra benefits to our community

What else?

Rates rises add pressure to everyone, including us, but keeping our heads in the sand is not going to achieve great things for our city. People had the same thoughts about Kawaroa Baths (and the old ones were disgusting when I was a kid), the art gallery, the walkway etc. You only have to read the comments from first time New Zealanders visiting here during Covid that justifies the expense of always moving forward and makes us proud to live here. I do wish someone had been held accountable for the disaster of Yarrow Stadium east stand though, I don't think that situation has been handled well enough.

James Evans

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Excellent tourist income investment! This is a great feature of Taranaki

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

The one road corridor into New Plymouth from north is really dangerous. I travel on it daily and most intersections are incredibly dangerous and not user friendly. Please please invest in this. Thank you

NPDC's Draft 10 Year Plan

Office Use Only: 1452

Submission No: 658

Robyn Stafford-Bush

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

I would have to say that you need to budget and allocate based on the CURRENT rates take. Your job is to ensure that public services, water, sewerage, rubbish etc is maintained to the level that it should. This constant wastage of money has to stop!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

You do not need to charge the rate payers more, when you should have been investing in the services for this many years ago! again you have wasted rate payer funds!

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Again this should have been adressed and managed over the years! STOP wasting our funding and do the jobs you are mandated to do!

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

There is still no place and facilities for the 11000 dogs in New Plymouth. this is a low priority sector compared to water! Get your PRIORITIES right

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Climate Action is a crock of that wet smelly stuff!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Please advise where this is a necessity?

What else?

I believe that you need to stop WASTING our hard earned money and start being accountable for the money that you seem to think grows on trees! You are not in your position to create monuments to yourselves.... This is a public service department! GET YOUR PRIORITIES RIGHT! RATE PAYERS CANNOT KEEP FUNDING YOUR FRIVOLOUS SPENDING

NPDC's Draft 10 Year Plan

Office Use Only: 1454

Submission No: 659

Mark Grogan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Living in Okato, we always have restrictions every year. 2 years ago there was a consultation regarding fixing this, but despite being asked for shovel ready projects, nothing has progressed. Why?

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Focusing on water meters doesn't solve the problem. The infrastructure needs upgrading. There's no point spending millions on meters to find that in the future, with an increasing population and more houses being built, we still have the same problem, only worse. Sort the infrastructure, and if water usage does not decrease, then go with the meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

The recent floods show we need it. Let's get it done!

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We've plenty of trails already, sort the problems first.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Electrifying the fleet will add nothing fundamental in terms of reductions as council employees still drive to work, therefore negating any reduction. Don't jump on the bandwagon, think of better solutions.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I can't see the benefit of this, what will it add to our economy vs. cost?

What else?

We've a great region with great facilities already. Instead of shiny trinkets to show how great we are, look after the people who live here. Sort the important issues that we endure, look after our needs instead of doing stuff that isn't that important.

NPDC's Draft 10 Year Plan

Office Use Only: 1456

Submission No: 660

Mary Sagen

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Slow and steady wins the race

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Focus on rain water collection and offer subsidies for residential tanks.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Not a huge fan of extending walkway but definitely agree with developing and maintaining trails with focus on pest eradication and restoring biodiversity

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

What I'd like see is some attention to existing outdoor basketball court by the skatepark. Would be great to see it extended to full court or at minimum with proper netting on the hoop. It does get used a fair amount but it's a bit lacking.

What else?

Keep up the great work and the awesome events such as FOL, Taranaki garden festival, and many more.

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Water waste is massive. We lived next to a house on Fernbrook drive. When they put down their lawn they turned the sprinklers on Friday afternoon and went to the beach until Sunday night. This was at the height of water restrictions which confirms they won't work without rigorous policing and this isn't happening. Every new house should have to instal a small water tank.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

They are essential.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

I find it totally abhorrent that we are in this position. Councils spend inordinate amounts of money putting up statues, art works, maintaining gardens etc in the name of "beautifying" a city. This is not the role of the council. The first and foremost role of the council is to maintain the infrastructure to the appropriate standards to maintain the expected population growth; and allowing for statistical error in that projected growth. People who want a beautiful city to attract tourists should find the way to pay for that themselves, not out of the rates. Ratepayers should not be subjected to additional taxes to pay for the basics just because councils are more focused on pleasing people and getting re-elected. This is so wrong.

Saving water and water meters

Comments

The council got us into this mess by misappropriating ratepayer's money so they should work out how to get us out of this mess.

Improving stormwater management in Waitara

Comments

The council got us into this mess by misappropriating ratepayer's money so they should work out how to get us out of this mess.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

What a waste of money this is. Focus on getting the basics right and then any surplus rate money left over should be redistributed back to the rate payers. I recently asked around 80 of my close contacts when was the last time they went for a walk along the coastal walkway. 4 stated they had in the past 2 years and the rest had NEVER been on it. It seems to be a haven exclusively for a small group of regular users and visitors to NP. Everyone else is funding them.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Before we focus on placing more pain on ratepayers we should focus on the main culprits - the large corporate who spew most of the emissions and then use clever "spin science" to maintain their "low carbon footprints".

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Focus on getting the basic infrastructure aspects right first.

What else?

Stop wasting our money on useless projects, focus on your job of ensuring that basic infrastructure is appropriate and sustainable commensurate with the expected population growth in Taranaki.

Office Use Only: 1500

Submission No: 677

Dennis Shaw

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Why do we have to have water meters, the council should have been spending money on the system in the past instead of spending on wants not needs. They need to focus on the basics and stop putting the rates up. You can't just keep putting the rates up above the cost of inflation, the day has to come when you just stop putting rates up and just supply the basic services.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Use the \$\$ from the Waitara lease sales for this as it comes in

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We can pause for a while, this is a want not a need, we have enough trails for the present. Listen to the rate payers they don't want increases over the rate of inflation.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

We don't need electric vehicles, just buy the most economical petrol, stop wasting money on wants get back to needs

Developing a multi-sport hub

Comments

Cancel the Rugby Stadium and spend that money on a combined stadium for all , How can you justify all that money just for one sport , which really doesnt have that much support .

What else?

LISTEN TO THE RATE PAYERS AND STOP RAISING RATES OVER THE RATE OF INFLATION

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I have ticked to not develop a multi-sport hub because you have to pick one, and if you are going to insist on putting it at the race course, I would rather not have one at all (and i am a sporting person myself having played netball, hockey, basketball etc) I feel that a multi-sport hub would be best constructed in a place that will cause minimal traffic disruption and with plenty of space for a lot of parking. Constructing it at the race course would be a bad idea in so many ways. It is already a traffic nightmare around there quite a lot of the time and that would just make it worse. Horse racing is a sport too and it will spoil the race course if a big ugly complex of buildings are built in the middle of the track - WHO WANTS TO GO TO THE RACES WHEN YOU CAN'T SEE THE HORSES GOING AROUND THE TRACK!!!! Somewhere a bit out of town with a lot of space would be so much more suitable.

NPDC's Draft 10 Year Plan

Tom Philipson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Why are we in this position. Councils over a decade ago were supposed to cover asset depreciation. Consequently rates have risen at many times the rate of inflation. Seems like councils have increased their size and wage bill at the expense of infrastructure.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We do not have a water shortage in New Plymouth. Water meters will be nothing but an extra revenue gathering exercise. Manage the assets and the cost better.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We have enough walking tracks and cycle ways. Meanwhile our roading system has been neglected and car uses have been ignored and taken for granted. Our roads are narrow and congested.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Virtue signaling waste of money. Like we are short of trees.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is madness. We already have too many white elephant money pits in New Plymouth. Yarrows stadium and the airport. And you want to build another. Its a nice to have but it just duplicates existing facilities. Its bad enough with traffic parking, congestion, and rubbish with the current events around the racecourse and this will make it worse for the long suffering residence in the area.

What else?

Roading in the city is the major issue. To much emphasis has been on walking tracks and Cycle ways etc. They are important but roading has been totally neglected. Roads are narrow and congested. eg. Two logging trucks go down Elliot street and we have gridlock. What other major city has heavy semi trailers going through the CBD. We need a ring road around the city to the port. That is vital for economic long term growth plus for the livability of the city. There are intersection in the city that people will avoid and drive several extra KM to go around the danger. Need a focus on roading and it needs to be taken seriously. Little things as well, like traffic lights. Phase them so it can clear traffic quicker at peak hour sometimes there is no logic to how they work.

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Rates are already high enough for substandard and keep going up with contentious projects such as a rugby stadium that very few residents ever get to actually use other than as spectators.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

How do water meters save money to residents? All you will do is then charge us more on top of our rates.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

How many million has already been spent just talking about the idea when there have already been other surveys asking if the people want it?

What else?

Time to start trying to reduce rates not increase increase increase.

NPDC's Draft 10 Year Plan

Office Use Only: 1535

Bruce Ellis

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It has to be done and the longer we procrastinate, the more expensive it becomes.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

When water restrictions are in force, all commercial car-washes should be closed down. I don't see why my garden should suffer through lack of water while fat-cat oil companies continue to waste and profit from it.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

These tracks are world class. We must maintain a high standard.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electrification of the vehicle fleet sounds nice & cozy in the short term. Where are we going to get the extra peta-joules of electricity to run all these fleets? The only way right now is to use fossil fuels to generate the required power, thereby negating the principle of vehicle electrification. How do we dispose of the unserviceable batteries? As a major producer of Lithium, China will end up holding the world to ransom with massive price increases coupled with reduced production. They have done that sort of thing before and they will not hesitate to do it again for economic or political gain.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Hickford Park in Bell Block would be a great venue for a multi-sport hub.

Saving water and water meters

Comments

I 100% oppose water meters and believe there must be other ways of funding improvements. We are encouraged to grow our own veg gardens to help keep household expenses low then told we will have to pay for the water to grow those gardens. The kiwi life style of playing outside in summer or swimming in the pool will be lost to a dead lawn and an empty pool. Taranaki has high rainfall through the winter months, money needs to be spent capturing, treating and storing more rainfall to combat water restrictions through summer along with better water saving education. I don't believe water meters are the answer

Improving stormwater management in Waitara
