NPDC's Draft 10 Year Plan

Office Use Only: 4559

Submission No: 1901

David Cambie

Organisation: TRC

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

not to be constructed in the middle of the current racetrack keep it green for field sports

What else?

no more

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 4563

Submission No: 1903

Nichola

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 4575

Submission No: 1904

Max Allen

Organisation: Courier Post

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

The way the council are planning the "future" walkway we will be able to cycle to Hamilton. Bell Block is far enough...no more spend

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Spruce up the current walkways which need track repairs...some need to be widened to cater for both walkers/runners and cyclists.

NPDC's Draft 10 Year Plan

Submission No: 1906

Hannah Weatherall

Organisation: Asplundh

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 4586

Submission No: 1907

Graeme Hanover

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Yes all I hear from council is that by installing water meters will reduce the water usage. All it will do is create another revenue stream that council did not have in the past, How many rivers are there in the New Plymouth area that have never in my lifetime ever run dry. Zero is the answer. Why not build more storage or is this too hard.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

My comments are in the earlier section.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Certainly develop the Hub but not at the expense of the Taranaki Racing Club. The Racing Club has to stay as is as per the lease that they have been operating on in previous years. The Hub should have been positioned at Yarrows Stadium where there is ample room. Why was it not incorporated with the rebuild of the two current stands.

What else?

Yes the water meter issue to me is like the expense created by the small food scrap collections. Has anyone in the council done a survey as to the average number that are being collected each cycle. I personally have never put my bin out since the scheme started and further more will never ever put one out. Most householders don't put them out. This to me is a prime waste of rate payers money. It's easy to install something when it's not your own money. At the end of the day Council will do what it wants to do because you really don't listen to what people have got to say. Fitzroy Golf club being the exception.

NPDC's Draft 10 Year Plan

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 4591

Submission No: 1910

Michael Appleton

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Environmental friendly.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Get the Traverse done quickly, and provide a link to Inglewood as well with it. And keep going, best thing about this district

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Drop EVs to fund the tracks and trails as alternative transport will save more carbon than converting your fleet. This should be seen as your number one priority and a core service

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

If anything has to drop out, this should be it.

What else?

Hope you listen to reason and not right-wing anti-rate pensioners who defunded the system, polluted the world and now expect to be looked after in retirement

Not a fan of water meters, already high rates here. Just think we have too many leaking pipes.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Will you fix it thou, look at the Oakura debarcle and cost overruns. Look at Fitzroy beach car park another bulls up, always surface flooding even a little bit of rain.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Love the walkway, but need some more coffee carts etc and council not hinder business.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Don't mind the planting

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

Roads and coming into New Plymouth are shocking .. not welcoming at all, needs beautifying and sorting out dangerous intersections. What a disaster they are if we have any sort of incident, his help is if it's a big natural disaster. Loads of development in subdivisions but the roading and infrastructure hasn't caught up. Council doesn't mind the extra rates and development costs Main Street looks very tired and messy only saving grace is the west prescience

NPDC's Draft 10 Year Plan

Office Use Only: 4618

Submission No: 1920

Nikki

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I think the NP area needs better water storage given our rainfall rather than just generating another revenue stream via meters

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Given the need for improvement in other areas I don't believe this is a priority.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Npdc doesn't need electric vehicles. Maybe as replacement over time but not as a specific need

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 4621

Submission No: 1921

Janine Sirett

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Do not build on the racecourse, leave as a green space, training course and playing fields. Where do you propose to house all the WOMAD and Bowl of Brooklands concerts people if you have a Sports Hub there. The Racing Industry brings a large amount of money into the province and gives a lot of people employment.

NPDC's Draft 10 Year Plan

Mike Spencer

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Okato water supply should be upgraded by installation of new storage. Currently water is short every summer and this will only exacerbate with climate change.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

We have been metered on our property for a number of years now and this is beneficial in two ways: one, it makes one very aware of leaks and causes a fast fix; two, for many people, it will mean they end up paying less—this is our experience. Overall, meters should save water by providing the incentive to be economical with water use. In addition, the use of water tanks should be encouraged: for example by making them mandatory on new builds (where there is room).

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

All improvements to outdoor exercise facilities benefit the community's health as well as giving people essential rest and relaxation in natural settings. So this is money well spent. In addition to the options mentioned, the coastal walk from Oakura to Okato should be completed; it currently only extends about halfway.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Fully support a sports hub provided the venue is appropriate and not taking away from existing iconic and community benefitting infrastructure

What else?

Strongly opposed to a sports hub being built at the New Plymouth racecourse. 1) The racecourse provides a beautiful green-space entry to our city in addition to a fitting direct neighbour to Pukekura park. 2) Sports fields and the entourage that goes with is not compatible with training of young hot blooded thoroughbred horses, to think the two can safely collaborate in one space is extremely naive and short-sighted. Take the sports hub elsewhere...

Organisation:

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

How do we pay for fixing our plumbing?

Comments

You have the PIF (or whatever the current in vogue name is)to deal with this. Powerco sold off (too many eggs in one basket - that turned out well didnt it!) The PIF costs money to administer (a heap from the 'cost wheel' I saw), for what - it goes up and down. Here is a chance to invest in the infrastructure for the next 100 years. Spend it for future generations now- dont saddle the current ratepayers with all the cost. Why is the use of the PIF not put forward as a way of solving this as an option above?

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

See my comments re 'Plumbing' above

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

See my comments re 'plumbing' above. PIF is there for this purpose

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Ask for Govt funding. Spend no more rate payers money on these 'nice to haves'

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Ask Govt for funding. Gosh look at our national park & Pukekura Park - We are doing very well. Have you ever visited Tauranga and seen the dearth of plantings there. No to electric cars but I am okay about electric buses as the diesels blow fumes all over the place. Do the big polluters first!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

No action to be taken until Yarrows Stadium is paid off. Apparently that is 'multi use'

What else?

I remain disappointed with the options given in the 'survey'

Boosting our Climate Action Framework

Developing a multi-sport hub

What else?

The intersection at Egmont road needs traffic lights, I, as well as many of my friends and family have had and seen so many close calls there, which would of resulted in very serious accidents. I used to have to pick up my step-daughter from kindy up the road and everyday I would get very worried knowing I would have to get out of that intersection, especially at peak times. I also have had many people pull out in front of me from that road when I am travelling into town and slowing the speed limit has not helped. If anything it's made people risk taking more gaps.

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

I would not want this added to our rates as we are rural and on tank water. As it is we are funding other things through our rates that we do not receive

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Can't understand why it would cost do much, we need to see an accurate breakdown of costs as it's looks like someone is rorting the system

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Forget climate change, spend no money on it, we are a tiny country and make very little difference. It is a waste of money better spent on housing

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Hawera has one, woefully under utilized

What else?

Spend your money on fixing the northern outlet. Stop wasting it on frivolous rubbish as it makes you all look a wee bit stupid.

NPDC's Draft 10 Year Plan

Office Use Only: 4678

Submission No: 1942

Henry Tongi

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Submission No: 1947

Paul Baker

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Update and maintain , ,continuing

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Hurry Hurry and do it!

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Do it!

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Do it and people from outside Taranaki will come and spend locally.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electric Cars are a PR hoax. Small efficient petrol engines are wonderful.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Just do it! Ratepayers are small minded, they don't see the big picture.

What else?

New Plymouth city is starting to look under loved, under funded and poorly maintained, the roadside berms, trees and roads are appalling condition. The road surfacing is of a poor quality in a lot of areas. The Northern Gateway is a prime example.

NPDC's Draft 10 Year Plan

Office Use Only: 4721

Submission No: 1948

Paul McCurdy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Office Use Only: 4723

Submission No: 1949

Phil Rock

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I do not support water meters as this unfairly impacts households with larger numbers of people, which will be those already most disadvantaged. There is also much more that NPDC can do to encourage saving of potable water from the network, eg. encourage installation of rainwater tanks (as Wellington did a few years ago)

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I would support option 2 except that the money is better spent elsewhere.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

This money is definitely better spent elsewhere - water and others are much more important.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Spend on the fundamentals: waters, roads, etc., before spending on the nice to haves.

Submission No: 1953

Kevin Taylor

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

We need to fix the main infrastructure ASAP it really old and is letting us down

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

User pays, I back this idea all the way. Should have come in years ago

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Just fix up and maintain the current tracks and trails. Also build up a mapping network and share the trails and track maps with the local bike shops, information centre for visitors and locals to explore our city

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Get this going ASAP this is a necessity for our North Taranaki community as well as getting revenue back into the region by hosting big events. Also make it big enough for all sports including cricket

What else?

Fix the Egmont Road SH3 intersection with lights or put a road through to Henwood road from Egmont road

NPDC's Draft 10 Year Plan

Office Use Only: 4760

Submission No: 1954

Sean

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

All the rates over the years I'd expect things to be done. Look into contractors milking it

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

You cant do much to stop a natural river from flooding in heavy rain, maybe should have thought about build location first...

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Climate emergency is a joke, electric vehicles have a short life and ar considered worse for the environment through production...but not in our backyard right...

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

If it will actually get used

What else?

Egmont road intersection onto bbk expressway needs a roundabout entering town. Leave both lanes heading north clear so traffic runs, but traffic coming to town have the roundabout that side. Its location will help actually slow traffic as alot are still speeding into town. This will also help traffic flow trying to turn out of egmont and onto egmont road, which in turn will reduce accidents at that location which are happening more and more frequently. Look to the roundabout near Bayport in Mount maunganui for similar reference

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The most important aspect of daily life. We need it fixed first before we can think of adding other assets to our province.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

We should pay for the resources we use, water included.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 4767

Submission No: 1956

LeAnn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Submission No: 1957

Peter Huzziff

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Assuming that these options have been arrived at after considerable consultations, then no more funds need to be spent on investigations etc before implementation?

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

While this option makes sense in the longer term; sewerage treatment must NOT be tied to water consumption as per Auckland where the sewerage part of the water and sewerage was significantly more expensive.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I'm unsure of the actual use of the current walkway. I cannot see that extending it through to Waitara will enhance its usage, especially walkers. Conceptually it has potential, but at what costs, especially to a huge majority of N P people.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I'm concerned about where these 17 hectares are, how they are going to be maintained? How are weeds going to be controlled? Current organisation is not very good, while the lawn mowers are fantastic. Please no more flax. Silvan Reserve is a good example of planting, but pampas, gorse and woolly nightshade needs better control.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 4772

Submission No: 1958

Leila Field

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Fix the egmont rd intersection into the motorway

NPDC's Draft 10 Year Plan

Office Use Only: 4779

Submission No: 1959

Gabrielle Coles

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Need more to support growing population

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

If we use meters you need to remove the water side of things from rates. With housing being an issue for people to get in to eg first time buyers.....would they be able to afford to pay increasing rates bills. Everything is expensive as it is eg power going up and groceries

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Don't charge those in New Plymouth for this only those in Waitara region

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

No one really uses the part around Bell Block, its very quiet so I don't see a need to expand it. Waste of money

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I like the idea about planting heaps if trees but not changing the vehicle fleet

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I was hoping it would also be a huge indoor facility where big artists could perform concerts but great facility. Hopefully it would get used the right way and have loads of activities for all ages to join in on

What else?

More free parking needed for workers in NP CBD and area by the park

NPDC's Draft 10 Year Plan

Office Use Only: 4782

Submission No: 1960

Keith Bland

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We already have adequate sports hubs spread across the city. Use funding to further develop player facilities on their present site. Minimise funding for Yarrow Stadium as it is a redundant resource built for the habits and interests of previous generations. The roading infrastructure around this proposed hub area is already heavily congested and not coping with traffic flows in relation to schools, WITT, access to the city etc. This will only compound it unless something is done to seriously address it. (See below). Taranaki and New Plymouth is trying to promote itself as a modern, family centred and environmentally sustainable region and city and yet daily increasingly hundreds of trucks crisscross the region and travel through the centre of the city to and from the port creating air and noise pollution, major congestion and infrastructure damage. This is even more absurd when you consider the totally under-utilised rail network and various possible loading hubs that exist. The utilisation of loading hubs and the rail network would also increase employment opportunities for the region. The solution looks simple but from previous experiences and interactions I have the impression both the NPDC and TRC seem reluctant to address this even though it is impacting on the lives and lifestyles of people in very real ways.

What else?

I have not been able to find any information in the 10 year plan on how future transport corridors and roading or alternative transport infrastructure is to be developed and would be pleased to receive it or pointed in the right direction.

NPDC's Draft 10 Year Plan

Office Use Only: 4783

Brenda Davies

Organisation: Sanctuary Hill

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

I am unsure to vote for the multi sport hub because of not wanting further big buildings damaging the environment. However I do think there is a huge need of an environmentally friendly HUB for families.

Comments

Just make sure it is for all sports not just rugby and cricket

What else?

The intersection of SH3 and egmont road is becoming extremely busy and as a business owner who has premises on Oropuriri road this intersection is becoming dangerous and people are getting impatient and taking unnecessary risks when exiting egmont road to turn north, it only a myth of time before someone is killed. I have myself seen at least 5 accidents over the years and am amazed at the design of the intersection when the bypass was put in. Another issue is the speed limit

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

it is important to make Ngamotu an easy place to continue to build houses. Water is one of the things that is needed for this. All new builds should have water meters as should any property that require their connection to be repaired.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

I dont know what the plans consist of but my previous comments should cover my view on this. water meters on new or modified connections. water meters on connections that require repair.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

make it easier for property to be made available for new builds around Waitara (brown road Raleigh street and Waitara east. Use rates from the new properties to pay for the shortfall beyond 9 million.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I think 36 million sounds like a lot. I think you need other options between option 1 and option 2. Get the government (NZTA) to help.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I am surprised this needs comment it a comparatively small amount and electric vehicles will be all that you can buy in 10 years.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Again I have commented extensively on this before. 1. Set up a charitable trust to collect donations towards this project. Donators can claim a tax credit. much of the existing stadium was built by donations. 2. The stadium at the race course needs to be bigger but a simple extension to the rear into the stables area is all that is really needed (make it 100% bigger) there is room for this and it is all that is needed. 3. Having all the sport activities at the racecourse will create a ridiculous traffic management problem on saturday mornings therefore the multisport hub should not be considered. these things work well in towns like Hawera and Waitara and Opunake but its a silly idea in the middle of a city. the sports huns for cities need to be distributed. a hub might work if it was in the triangle somewhere between Bell Block and Waitara (and access from Inglewood via egmont road) as long as there is adequate access and traffic management plans.

What else?

The TSB show place (opera house main auditorium) is not big enough for a growing city. I like the idea of more walkways and cycle ways but they need to be mobility scooter friendly and NZTA needs to help with this. A bypass road from Burgess park Hydro road to Waiwakaiho Road is needed. The NPDC needs to relax subdividing rules so that it is easy to make small sections available for Small and tiny houses. There also needs to be more land freed up for long term caravan residents. Change New Plymouth to Ngamotu or at least use dual place names. This should be done while international tourism is at a low point. Lifestyle blocks should be easy to cut them up further almost without question.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Bloody oath, fix it up - Rolls Royce solution, for too long this country has underspent on infrastructure. Get some money out of the asset rich boomers before they spend it all on red wine and foreign holidays, cark it and then leave us holding the bag. We kept them alive through COVID, now return the favour.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

We need to respect water. Meter it all. People can put in their own rainwater tanks for their garden.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Yep, same comment as before - infrastructure that desperately needs fixed up - rolls royce solution. Shouldn't even mention which suburb it is cause it invites division between ratepayers.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Spend it all baby, open all the cycle and walking trails to gold standard. Embrace Ecotourism and all the benefits it brings. No other region can build a Mt Taranaki level of beautiful monument to ride around, no matter how hard they try, we need to leverage that big fella for all he is worth.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Spend all the \$\$ - get some money out of the boomers to help fix the climate problems they contributed to, before they cark it leaving us holding the bag.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Bloody oath, new infrastructure is great. Give the tradies something to during work hours and then also afterwards.

What else?

In general, lift my rates, build all the things gold standard. Cheaper in the long run to invest more up front, and we need to get more money out of the boomers to fix all the things they have underinvested in over their lifetimes.

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Living rurally we should have to pay extra rate fees for this as we don't use the water mains

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Don't see the point in this

NPDC's Draft 10 Year Plan

Office Use Only: 4842

Submission No: 1979

Justine Evans

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

We need to change the roading at egmont road and wills road and install roundabouts. Airport drive roundabouts needs to happen now.

NPDC's Draft 10 Year Plan

Office Use Only: 4854

Submission No: 1981

Graeme Riddick

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

It needs to happen. Asap

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

There's no option for no water meters. I'm not sure why. We live in one of the highest rainfall areas in the country. Its not use thats killing us, its retention resourcing. Dont blame us. Blame yourselves.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Do it so long as its not on ratepayers money.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Again. I support the planting but not the cars. We don't have the resources for that as yet.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

This has been a terrible survey, clearly defined for us to say what you want. I'm hugely disappointed in your spin on this.

NPDC's Draft 10 Year Plan

Submission No: 1986

Amy

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Infrastructure needs to be improved with this in terms of ample parking and amenities to supply the traverse.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

Speed limit needs to be lowered coming in to NP from the south. People still fly in to that intersection which is very busy and serious 2 big schools. Should be 80 from before mangorei road in to NP and 50km sign needs to be further away from a major intersection! Egmont road is also horrendous and dangerous - is a fatality waiting to happen

NPDC's Draft 10 Year Plan

Office Use Only: 4884

Submission No: 1987

Katy Eastlake

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

EDUCATION! Educate people on how to conserve water. Run workshops. Teach water conservation in schools. Give suggestions to residents on what they can do to conserve water. Sure, some people will not care at all but there will be many who do care but do not know what they can do to help. Personally, we are on tank water so water metres do not affect us but in my opinion i feel that water metres give families another bill to pay, more outgoings financially when times are already tough for many.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

It would be amazing to see the walkway extended.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Planting is a great idea, perhaps consider planting community orchards or something similar. The trees themselves will be inline with the CAF and the fruit harvested can help people in the community.

Developing a multi-sport hub

What else?

Please do something about our main highway intersections. New Plymouth is becoming more populated meaning more traffic on the roads which makes it harder to get through some intersections which in turn causes impatience and unfortunately, accidents. Namely the Egmont Road/ SH3 intersection.

Submission No: 1989

Helen Tully

Organisation: Manukorihi Intermediate (teacher aide)

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4: High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Personally, this is infrastructure that should be covered by our rates as this is a resource that we use obviously each and every day. Frilly stuff like the Len Lye Centre can be fundraised for and paid for in other ways.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Obviously the population has grown within the New Plymouth district, yet the water supply hasn't grown to accommodate for that

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I drive out to Waitara 4 days a week and the surface flooding is terrible, and it affects the conditions of the roads heavily

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

My concern is with electric cars, when you replace the batteries how safely are the old batteriees disposed of? And the cost of power to charge the electric cars...will that be coming out of our rates?

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

I know the roads come under transit/roading and is seperate from the council yet know you guys have a strong influence over roading and getting it sorted, yet the road between New Plymouth and Waitara is hidious! The amount of potholes, repairs...and repairing the same spot again and again and againd is horrid! It needs to be sorted, along with Coronation Ave it's actually becoming unsafe to drive on along with damage to suspension on cars over long term

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

If u have propper on off ramps at waitara and 3a intersection and 2 lanes so no traffic cars would get off road faster reducing the petrol they burn

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

On off ramps like bell block for the highway at all intersections. Such as all the australian main cities. The city is expanding. Get ahead before it turns into auckland traffic in 10 or 20 years then its done before hand. Be smart. You are prepared for the future if its done now.

NPDC's Draft 10 Year Plan

Office Use Only: 4935

Submission No: 2000

Liana Alder

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.
