NPDC's Draft 10 Year Plan

Office Use Only: 3204

Submission No: 1401

Chloe Jackson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

It's not going to be beneficial for anything because you are still going to have the parking issue and the issue of the sports teams not having anywhere to warm up because of all the sports that are played on that day

NPDC's Draft 10 Year Plan

Office Use Only: 3206

Submission No: 1402

Carol Gillingham

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Steady progress should be made at an affordable rate

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters were introduced where I lived for 17 years on the Kapiti Coast. Of course residents water demand fell and then the cost per litre of water used was increased to provide council with funds so residents were paying much more than the old water portion factored into the rates before meters were introduced. The obvious solution was to pipe water from the never-dry Otaki river, but KCDC did not take that option.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The board walk is a feature of New Plymouth but does not need to be extended. New Plymouth has so many tracks and trails already for a small population.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

I have lived here for 14 mths and enjoy and appreciate the facilities in New Plymouth, but on a fixed income I cannot afford 10-12% rates hikes. I contribute to the district by working with a few local charities.

NPDC's Draft 10 Year Plan

Office Use Only: 3208

Submission No: 1403

Paula Sole

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Strongly against the multisport hub. It removes one of the only areas in New Plymouth for horse riding with no suitable alternative being developed for equestrian events.

NPDC's Draft 10 Year Plan

Office Use Only: 3210

Submission No: 1404

Darryll Senior

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Been saying for years put in water tanks at every new build , everyone can put in water tanks , build more water reserves also

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Infrastructure needs urgent care first

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Dorsett Avenue reserve trees don't get looked after and leafs block the water run out so flooding our land

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

With covid and the funding problems of all sports we are better in maintaining what we have in the region

What else?

Time to stop wasting money e.g. like the colored painted lines that need repainting. Water leaks have been a huge problem here so Citycare need accountability, public toilets in some areas are need of attention with leaking toilets and dirty water going into cracked floor tiles in Waitara

NPDC's Draft 10 Year Plan

Office Use Only: 3212

Submission No: 1405

John Dowker

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

make it fit for purpose, and future proof it. There seems to be a significant increase in building houses in this district without the corresponding infrastructure.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

water is plentiful 7/10 of the planet is water but less than 0.5% is drinkable. Not all water needs to be brought up to drinking standard. Provide safe bottled water for drinking allowing a greater throughput of existing water supplies at a lower treated cost. A household needs to use "x" amount of water adding a meter will not change this. I would hate to see new plymouth become a third world region where people are not cleaning themselves or their house, and not flushing the toilet simply because the water is metered. You are forcing poverty and unhealthy lifestyles on families who are already struggling because they would not be able to afford water. And what about families who have infinity water heaters that are cheap to run but use a lot of water while waiting for it to heat up. Tenants will not have the ability to change them and most homeowners will not want the expense (resource consent) to replumb the house. This region is awash with water all you need to work out is how to store it and then transport it to homes.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

do not live in Waitara

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

you need more circular 3-4 hour walks that are not on the mountain.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

will the ratepayers get money back if the trees planted can be harvested in a sustainable way? if so plant as many trees as you like. this council is appalling at recycling how do you propose to recycle this new electric fleet particularly the batteries. what are their lifespans and where is the extra electric coming from. have you actually costed up an electric fleet compared to existing technologies, and the environmental impact of extra electric and battery production?

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

you keep promoting initiatives to bring visitors to the area, then you moan there is not enough water and the area's usage is too high.

What else?

the salaries you pay to the executive team are too high, compared to local salaries I can not see the CEO justifying a salary of over \$1000 a day. In reality what do they actually do? You shut down the downtown car park on very short notice without making any extra parking available in town this affects tourists, shoppers, and businesses. This decision I understand was based on a report you had been sitting on for nearly two years what was the rush at that particular point in time?

NPDC's Draft 10 Year Plan

Office Use Only: 3213

Submission No: 1406

Kevyn Harris

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters will mean additional costs in the bureaucracy needed to administer it. It may also lead to a separate "water authority" with less and less responsibility directly to ratepayers. Water should be available to everyone and included in the Rates. The Rates should reflect whether or not there is a swimming pool or other consumer of water on a property and charge a premium.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

While very sympathetic to an extension of the Walkway to Waitara and don't believe it's expenditure is warranted at a time when fresh and waste water supply requires extra money.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is not a priority when we face issues around water supply and waster water disposal. The present essential infrastructure first.

NPDC's Draft 10 Year Plan

Office Use Only: 3215

Submission No: 1407

Barrie Williams

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

You can't introduce water meters to save in the long run if you device to charge more for rates as the savings add up in the future. I'll take a meter, pay for what I use, but an additional increase is only going to infuriate residents.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

I have no vested interest in Waitara.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I love the coastal walkway, but a it would only need enhancing some time in the future. Most people walk the main part a few kilometres either side of the wind wand. Extending it to Waitara sense excessive currently.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

What would the hub bring?

NPDC's Draft 10 Year Plan

Office Use Only: 3216

Submission No: 1408

Ethan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Stop making us pay for Yarrow Stadium

NPDC's Draft 10 Year Plan

Office Use Only: 3217

Submission No: 1409

Alan Cudmore

Organisation: Indywell Farms

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Rural residents not on the system should not have to pay as no one helps us with our water tanks and septic tanks. We just get charged when replacing.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

You carry out non essential projects when the economy is strong not when coming out of a pandemic with many unemployed and others on reduced hours.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Another non essential project in uncertain times for many Ratepayers.

What else?

Get real we have had enough lies with Len Lye gallery.

NPDC's Draft 10 Year Plan

Office Use Only: 3220

Submission No: 1410

Helen Frank

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It's essential work unfortunately, seems to have been neglected and without this investment, further problems causing environmental damage and significant repair costs will occur.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Don't particularly want water meters, but recognize it's probably the only way to cover cost and make people think about their water use.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Think this would significantly boost visitors and business in Waitara, providing much needed income to the township.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Seems a lot of money - and centralising sport? Seems it would mean a lot of folk travelling in to do sport as opposed to partaking in sports in their local area. Surely investing in the smaller clubs would be more feasible?

Option A: Pay for it from rates

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

money better focused elsewhere

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

planting trees in a small location like NZ only works to hurt a small nations economy and provide no change to climate on the whole

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

if you do this you kill off smaller clubs, local clubs who have been running for the last 20 years will see a very large member drop, much less funding Its just not needed yet

What else?

Please do not raise rates as much as you have proposed When I purchased my first home I had roughly \$50 a week spare after bills if interest rates go up, along with a rates increase, you will cut out or cripple young families who are in this situation

NPDC's Draft 10 Year Plan

Office Use Only: 3232

Submission No: 1416

M Weir

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Priority

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

As long as it's fair and not put out to private contractors

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Water first, then roads and existing footpaths . Core things

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Buy electric bikes for the council to use

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3233

Submission No: 1417

Peta Chapman

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3234

Submission No: 1418

Susan Brooks

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

An essential service that impinges on the whole of the community one way or another. We are entirely self contained living rurally.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Makes sense to pay for what you use, should reduce wasteful use. Need to make sure that low income households are not penalised

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Yes I feel quite strongly that in the uncertain times that we are in that there are many more pressing issues that need fixing than spending large sums on trails etc. I am by no means anti new and extended trails but at present there are other important issues, housing, health, education and poor living conditions

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Not quite Option 1 but I think electrifying the vehicle fleet could stay perhaps holdfire on trees until people are more able to pay an increase in rates

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

NOT needed at this time make use of existing facilities again until there is greater certainty about the use of such facilities.

What else?

People are struggling to make ends meet and you the council are on your way to make them struggle even further. Look to the security of the rate payers so that they can be gainfully employed and when there is rather less of the under privileged in our community then we can forge ahead with the fancier projects. The environment needs to be a major concern alongside the health, well being and welfare of the people. Making use of existing projects rather than reinventing the wheel.

NPDC's Draft 10 Year Plan

Office Use Only: 3237

Submission No: 1419

Gordon Rail

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The Government state they are providing infrastructure support to stimulate the economy. What level of support has been indicated for New Plymouth?

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Water meters are needed.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Pensioners are under a great deal of pressure as costs increase. Many who own their own homes have low savings to support their future. They are often frugal with their utility costs. A recommendation to increase the rebate subsidy would make sense to cut any initial hardship. This is linked to Government support.

NPDC's Draft 10 Year Plan

Office Use Only: 3242

Submission No: 1420

Leak-Wah Ong

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Please provide details on cost saving for with and without water meter.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

It is not fare for new plymouth tax payers to pay for waitara.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Please stop wasting money into this type of white elephant project. Council can proof any economical benefit to rate payers for this project.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

What is the economical benefit for rate payers ?

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

I am upset by the unnecessary million dollars wasted on nice to have projects.

NPDC's Draft 10 Year Plan

Office Use Only: 3243

Submission No: 1421

Diane Dickson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Pay from rates of people who use these systems. ie residential rate payers not out of town rate payers that have no services.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

If you want water meters then the water users need to pay for meters. Dont expect rate payers that have their own water supply and pay for their own setup to pay as well.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This will benefit a very small part of community. Ridiculous to build in middle of city at race course. Will cause major traffic and parking issues.

NPDC's Draft 10 Year Plan

Office Use Only: 3244

Submission No: 1422

Steve Ilkovics

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Only do essential work only to ensure maximum amount possible is invested in 3w infrastructure. Greening our place is not essential.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Only spend on essential 3w infrastructure.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Only spend on essential 3w infrastructure.

What else?

3w infrastructure is in crisis. Spending on any non essential work is not justified at this time. A rates increase is now inevitable due previous mismanagement of investment in 3w. The rates rise must only be for essential 3w infrastructure investment with all non essential expenditure stopped until 3w situation resolved.

NPDC's Draft 10 Year Plan

Office Use Only: 3245

Submission No: 1423

Rudie

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Walkway can wait. Rather spend on important infrastructure.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Before trying to milk your ratepayers make sure that your current expenditure is kept within their budgets. I have first hand knowledge of budget blowouts on projects that are due to mismanagement and bad decision making.

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters will put an even larger strain on our already struggling population. It will affect the vulnerable families and young families

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Please focus on our infrastructure rather than leisure! Our population is growing rapidly and our infrastructure will not keep up as you can already see, it isn't keeping up at current demand

NPDC's Draft 10 Year Plan

Office Use Only: 3278

Submission No: 1436

Courtney

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Office Use Only: 3279

Submission No: 1437

Heather

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Try spending money on needed things rather than things that look pretty for photos. Everything is going up except our wages, where do u expect us to pull all the increases in rates from. Easy for people on big wages, not so easy for us commoners who work day and night to make ends meet.

NPDC's Draft 10 Year Plan

Office Use Only: 3281

Submission No: 1438

Ulla Curtis

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

In my opinion watermeters do not save water People have to learn to use water sensibly and cut down the waste

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I do not think the multi-sport hub should be in the N.P. Raceway area

NPDC's Draft 10 Year Plan

Office Use Only: 3283

Submission No: 1439

Min McKay

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

The state of the plumbing needs the investment and has been under invested in for many years. Get this done and up to scratch and manage the assets better long term moving forward

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Water conservation is super important and I like the idea of water meters. Will also help to increase the life of the assets moving forward

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The walkways we have are great and get fantastic use. While I see that long term it would be great to extend the walkways I just think with the huge increases proposed for us rate payers that this is a "nice to have" and not essential. I would think completing these projects should be reconsidered at this point and for NPDC not to invest in new or additional tracks in the next 3 years.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I think this is a great initiative and is a tangible way for NPDC to contribute to this. Its simple but effective. I also love that there is some funds allocated for community planting projects, we need more education and involvement around the district on the impact that we can make through working with mother nature and not against. I would love to see some consideration around the use of chemicals to maintain weeds. I seen a contractor spraying a curb (for tiny weeds) which when it rained would wash right into our water systems. So love the initiatives to invest but lets also look at existing practises to make sure it is working the best way for the environment. Otherwise additional investment becomes meaningless.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is another "nice to have" at this point in time. Focus on the core infrastructure that you have fallen behind, get that in order and then look to develop from there

What else?

The Brooklands zoo I think needs to be reconsidered. Is keeping animals captive something that people really need to see. It teaches children and adults that its ok to keep animals in cages - which it is not. We have seen steady (although no where near enough) changes to legislation around holding animals in captivity for the personal gain of humans. So long term are zoos really viable?? If they are no longer viable down the track - what will you do with the animals?? Step away from the zoo game now and create a better space that people will still visit. A native, natural space will attract biodiversity (naturally) where animals and insects are in their natural environment which brings great benefits to the environment. A much nicer thing to do would be to use that area to plant more gardens and tree areas. Or a botanical garden.

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This is vital infrastructure that clearly sounds like it needs to be maintained, however it does not seem feasible for a large project at such huge amounts. If a regular maintenance and renewal program was set up there wouldn't be the need for huge upgrades. An asset management plan should outline depreciation values and if this isn't required it should be banned in a reserve until it is required for times such as these. Agree that these works need to be prioritised but should never have got to the state where this amount is required

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Look into other water saving methods - Taranaki gets a lot of rainfall, subsidise tanks, develop ways to utilise grey water, permeable paving etc. Just because other cities have meters doesn't mean we can't look outside of the box for new initiatives that aren't going to impact ratepayers so much especially when so many people are hurting from the costs of living in NZ, the housing crisis, the pandemic etc.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Look into stormwater harvesting, permeability etc - sustainable options for reusing the water. Agree that works need to occur to protect homes etc. Is the cleaning and maintenance of this network adequate as this often the root cause - develop a CCTV program to check the status of the pipes and then develop a cleaning budget from there.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I love the idea of developing tracks and trails and utilise these often when I am at home in NP but I don't think this is a necessary project right now for the cost of it. I also don't think bell block to Waitara is necessary and would rather see the walkway extended toward oakura first as I feel this would be more popular and better utilised. Economic recovery should be the focus for you for your ratepayers and this does project does not address this and only adds further costs.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I am not against the planting action, however at \$200k a year this perhaps could be downscaled - perhaps \$100k per year instead. I don't agree with purchasing electric cars - they are not sustainable with lithium batteries etc. You will also need to install charging stations etc which is additional costs. Perhaps cutting down your fleet would be a better option, providing incentives to keep cars off the road, subsidizing public transport, car sharing, e-bike etc until better more sustainable electric vehicles are developed. There must be other actions that could be implemented to look at sustainable outcomes and reduce emissions

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I agree the need for upgrading sporting facilities but am unsure this is the right location for an already busy area. I also don't know that all these facilities need to be together and don't see how doing these works are going to allow NP to host national tournaments etc bringing people in. Given the economic climate this work is potentially more a nice to have an some upgrades to existing facilities may reduce the cost and be better spent in the interim.

What else?

Given the current economic climate I think priorities really need to be evaluated. A 12% rate increase followed by 6% in the years after is astronomical and unaffordable for many people at any time, let alone this year. I understand the need to be able to continue to provide and maintain amenities and there are rising costs but this is the time to reduce the optional extras and focus on the necessities.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I'm totally against water meters, I have had experience with them and all it seemed to do is enable council to raise the cubic meter rate. meters were installed, via a loan. Water consumption dropped. Council then needed to increase the meter rate to pay the loan. old folks gardens were left to die due to fear of water prices. Stupid idea.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We already have plenty of coastal walkways. Nice idea but a 12% rate increase? come on!

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Seems planting trees may add to the problem. Electric cars will become cheaper in time. Low cc petrol cars are cheaper to run than electric. Buy bikes.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I live in Bell Block. You cant even manage to look after the assets at Hickford Park. How on earth could you manage a sports hub?

What else?

I deeply resent our Mayor spouting on about how placid rate payers are. How arrogant of him and council to treat a 12% rate increase as a joke. After Covid the last thing we need is a rate increase of that size. Consider those on a fixed income. Honestly what planet is council on?

Comments

Alot of these are just wants and not a need.

What else?

I come from a family of 6 and yes am the owner of my residence. It is a struggle already with just the bare necessities let alone keeping a roof over my families heads and food on the table. School fees they call Donations (which if you dont pay your child gets disadvantaged) power, insurances, kids extra curriculum for school events along with the maintenance on my house.I was affected by covid and only got the goverment funding that was provided for that period provided then went with no income after that period had ended and my company had to reapply and didnt meet the criteria. The introduction of water meters (extra bill) with a 12% rise in rates followed by a 6% increase there after yearly raises alot of concern into the welfare of my family and alot of other families in our region. As a concerned father and a resident of our region i fear this would increase our homeless numbers on the streets and people are going to turn to crime and gangs to able to provide for our kids.

NPDC's Draft 10 Year Plan

Office Use Only: 3309

Submission No: 1455

Alex Hepburn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 3310

Submission No: 1456

Peter Barleyman

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Have we taken into account the nature of the soil type in Taranaki, very porous volcanic soils that require more water than that of other city's that have a heavier soil type. Think of the Rhodo Festival and other tourist garden attractions. Spending 16 million on water meters is only to gain revenue. Why not spend it on fixing leaks ? Plus we need to invest long term in securing our water supply if we hope to attract urban development. Surely at a time of low interest rates it is better to borrow prudently. Install water meters for private swimming pools saunas etc. but do not penalise larger families at the lower end of the socio economic scale. What will it do to those renting etc. with all the other compliance issues on land lords it could be the final straw. What about the storage levels and the arrangements with the Taranaki regional Council. People will respond to using less water with a good education programme.

Saving water and water meters

Comments

I am not convinced that water meters will produce the savings sought in consumption. I think the water supply issue needs to be grasped fully as we look to the future. To me it seems negative if we want to encourage growth in this city of ours. Comparisons with Auckland usage, high rise apartment style housing etc, different soil types do not make for a fair comparison with New Plymouth. Perhaps we have to spend so we can save long term with the cost of borrowing spread over the years and over increasing the number of ratepayers and housing developments so as to spread the load. The bottom line is that household ratepayers cannot pass on increased cost, nor absorb the continuing increases so much work yet to be done on our options

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

There was talk originally about extending the coastal walkway to Oakura. What happened?

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

A great option. Then evaluate all other grounds and consider their possible use for housing.

What else?

Like to hear more on gas reticulation in Taranaki given the Govt outlines on future use. That the council keep mindful of the expectation that every household will be endeavouring to keep pace with climate change and all the associated costs. We cannot pass on to others our costs. Are there other sources of funding that the Council can look to.

NPDC's Draft 10 Year Plan

Office Use Only: 3311

Submission No: 1457 **Hlly**

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Submission No: 1458

Natalie

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3319

Submission No: 1459

Ellen Squire

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Re-prioritise spending from 'nice to haves' (e.g. new art, new sports facilities etc) and focus on this critical infrastructure.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Increase education around water conservation and usage. Other cities are able to achieve this without installing water meters, why can't New Plymouth? We have a large and adequate catchment size for water, it is our infrastructure which hasn't kept up with population growth and city expansion. Address the issue by improving infrastructure in the first instance as it will always be required. Water meters are not the answer in this case, they are only delaying the issue.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Encourage and enable people to cycle and walk as commuting/recreation options by providing these trails. Ensure cycle safe trails are provided from suburbs to access these tracks and trails. This would encourage people to utilise these trails more and provide commuting options. This contributes to our climate change responsibility when done correctly by connecting access and tracks throughout urban areas.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Ensure Planting our Place programme uses eco-sourced plants found in the Egmont Ecological District. Contract locals to grow and supply plants instead of buying in, to create local employment.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Do not invest in the development of multi-sports hub. Instead continue to maintain existing sports facilities throughout the region that are perfectly adequate. Concentrate expenditure on essential infrastructure upgrades and avoid unnecessary 'nice to haves' until this has been resolved. Cut back severely on non-essential investment until you have resolved the infrastructure crisis. This is an issue of intergenerational inequality.

What else?

12% (and 6% thereafter) rates increase is an unreasonable change to New Plymouth ratepayers. Household income does not typically increase by this amount each year, especially in the current financial climate. Support and encourage New Plymouth district residents by providing basic infrastructure to a good standard, avoid unnecessary spending and work within a budget that is reasonable and fair for all those who pay.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Don't charge rural residents extra rates for this bullshit that we do not use!!! We have to pay for our own plumbing and water, townies can do the same!

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Don't care, but again, don't charge us rural residents to pay for all these metres that again, we don't use!

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Fund your own council cars! You take enough money from the tax payer as it is!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We have enough, no one cares

What else?

Rural rates rising is a complete and utter joke! We don't use any of the services we pay for in our rates, yet they continuously rise as if we did!

NPDC's Draft 10 Year Plan

Office Use Only: 3329

Submission No: 1463

Matthew Geary

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Strong project management is required and a clear scope of work to ensure both productivity and efficient use of capital and no budget blow out.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Majority of our water goes out to sea. Build a more robust system (per the investment around fixing the pipes). We can encourage water saving without water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

What we have is already the envy of most city's. Some things need priorities and this should be one of the areas.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I do not support electrifying the NDPC vehicle fleet with all the other issues facing ratepayers. This should be deferred and reconsider in 5yrs when the cost of electric vehicles has reduced.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

This should have been prioritised over the rugby stadium. I support this due to the large number of people that this will positively impact (compared with that of the rugby stadium).

What else?

The council needs to have a productivity improvement strategy to help offset any proposed rate increase. The targeted rate for the rugby stadium we have incurred is disgraceful given the issues facing the city.

NPDC's Draft 10 Year Plan

Office Use Only: 3331

Submission No: 1464

Tiaki

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

If water rates had to come into effect where all households pay I would expect this to be taken out of homeowners rate bills. I believe water something that we shouldn't charge for... An incentive should be put in place for homeowners to install water tanks which in turn would lessen the demand on our main water sources... We know that an average household uses about 240l each day. This should be free, before charging for water.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Again, an incentive of some sort should be put in where homeowners can purchase water tanks to help limit the pressure on our main water sources... Charge households for water once they are over their daily limit of 240l for example.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara has been waiting a long time for their township to be looked after, by being on the backfoot on every decision. Especially when towns like Oakura are out before low socio-economic towns/areas.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Although I see the huge benefits to this multi-sports hub, is it really a necessity at this point, when we could utilise our sports parks in other towns within NPDC... I.e instead of relying on Waiwakaiho's netball courts, why don't we share this with Waitara, Inglewood, Okato, and etc... Waitara has just had their hub developed so would be awesome to see more games played there. The only thing I would suggest is to build more of a multi-purpose turf (hockey) in Waitara, Inglewood, and Okato to promote the sport of hockey for example. I know Hockey is something really difficult to promote or do in Waitara as we don't have the proper resources.. It is not as simple as popping players into a car and driving into town... I know this from experience being a teacher at the local intermediate having coached for Hockey for 5 years now.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Stop bloody charging us for the monumental [REDACTED] that is the yarrows stadium . I have never nor will I ever in the future use this facility and should not be footing the bill for this [REDACTED]

NPDC's Draft 10 Year Plan

Office Use Only: 3333

Submission No: 1466

Adrian Maxwell

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Comments

Dnt spend money on things like len lye center

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

Concentrate on core infrastructure before spending on sexy items. Work on the stuff that should have been worked on in the first place instead of building a len lye center we had to then boost from rate payers who probably never go there

NPDC's Draft 10 Year Plan

Office Use Only: 3336

Submission No: 1467

Joanne Keith

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

NPDC is at fault for dropping the ball over this. You've under invested in Waitara for over 40 years. Waitara pays the same contribution to rates yet not an equal share of money is spent out here

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Meters are required for an evenly distributed user pays plan.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

See previous comment about under investment in Waitara for over 40 years

Extending our tracks and trails network

Comments

Extend the walkway from Bell Block to Waitara. Further development on the Taranaki Transverse could be funded by introducing a user pays charge. Ratepayers should not have to bear all costs.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Sports receive significant funding, rugby is professional. NPDC should look to these governing bodies to develop a multi-sport hub. It is not a facility that the majority of rate payers are going to get any advantage from so why should they pay for it.

What else?

How can any single person, people on fixed incomes, beneficiaries and low income earners whose income is fixed or not increasing in line with the significant rate percentage increases afford these increases? There is huge development in Taranaki with more homes paying rates so this income should outweigh the need for significant rate increases. Have the top 25% of NPDC employees taken a pay cut? Maybe NPDC need to look at salary reductions and reduce employee numbers. Significant rate increases are punishing people, causing unnecessary mental health and stress issues and forcing people out of their homes. Where is your understanding of how financially hard rates increases are? Look at how to save and reduce costs rather than sucking more money from rate payers. Introduce a tiered levy system for households occupants eh 1-2 occupants nil, 3-4 \$50, 4+ \$100.

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Ensure cycle safe trails are provided from suburbs to access these tracks and trails. This would encourage people to utilise these trails more and provide commuting options. This contributes to our climate change responsibility when done correctly by connecting access and tracks throughout urban areas.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Ensure Planting our Place programme uses eco-sourced plants found in the Egmont Ecological District. Contract locals to grow and supply plants instead of buying in, to create local employment.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Do not invest in the development of multi-sports hub. Instead continue to maintain existing sports facilities throughout the region that are perfectly adequate. Concentrate expenditure on essential infrastructure upgrades and avoid unnecessary 'nice to haves' until this has been resolved. Cut back severely on non-essential investment until you have resolved the infrastructure crisis. This is an issue of intergenerational inequality.

What else?

12% (and 6% thereafter) rates increase is an unreasonable change to New Plymouth ratepayers. Household income does not typically increase by this amount each year, especially in the current financial climate. Support and encourage New Plymouth district residents by providing basic infrastructure to a good standard, avoid unnecessary spending and work within a budget that is reasonable and fair for all those who pay.

NPDC's Draft 10 Year Plan

Office Use Only: 3351

Submission No: 1473

Jim Eastwood

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Seeing the reports on repairs needed to bring New plymouth plumbing up to standard it makes me wonder What council have been doing with rates money.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I am against water meters because if Council had kept up with ongoing repairs to pipes etc we would not be in the position of water wastage through leaks and we have been paying for supposed repairs for years. Where's the accountability?

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Options 2 and 3 are WANTS not NEEDS. For goodness sake people ... how can Council even consider these types of WANTS when the previous questions regarding pipes etc are far more important. Even more so with the current economic climate due to Covid ... ALL wants should be off the table. People don't have endless funds to pay for the "pretty things" that are not needed. GET REAL!!

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Please stop wasting money and find the line between helping the environment and being seen to do the right thing but really just showboating.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Yet another WANT! New Plymouth is not going to die if we don't do this, at least not in the near future. So many ratepayers will never use this facility so it's unfair to expect all ratepayers to pay for it.

What else?

A lot of people who have worked hard to be home owners and thus ratepayers are being hammered with all these extraordinary costs. Just because people are ratepayers they're not necessarily well off due to many and varied reasons. Should not those who live in and get the benefits of what Taranaki has to offer but who are not ratepayers, eg renters, also be contributing?

NPDC's Draft 10 Year Plan

Office Use Only: 3352

Submission No: 1474

Richard Goodall

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Why has it become so super urgent now and ignored for so long. Something like this is major and it's hard to understand how it's just been completely ignored. And now it's our problem to fix it.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Water meters if you drop the current fix rate and don't be snakes like Auckland and bring in a grey water charge later on

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Fix major issues we have before making new development

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Sort existing issues first

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Do private fund raising for a multi sports hub. Enough tax payers money wasted on yarrow stadium and nothing has been done

What else?

I really hope someone actually pays attention to what rate payers want

NPDC's Draft 10 Year Plan

Office Use Only: 3354

Submission No: 1475

Nathan Wood

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Office Use Only: 3360

Submission No: 1476

Mike Gibbins

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Water is a critical and an important role the NPDC needs to address asap...its one of the core jobs the council needs to tackle .

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is not an essential service the council needs to tackle. Lots of us ratepayers are struggling and cant see the justification for increasing the rates by the proposed 12%. The Council needs to concentrate on its core services and cut out all the feel good / nice to have proposals at this point in time.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Stick to your basic services please!!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Not required ...leave the racecourse as it isutilise Yarrow stadium if you must.This stadium must be one of the most under utilised areas in the whole province.

What else?

No way can the council justify a rates rise of 12%. Start saving money by being more efficient ...top heavy staffing and over use of consultants could be a good starting point to have a serious look at. Please focus on the necessary services you have a responsibility to provide and look at the nice to have proposals later without inflicting a massive rates rise on us ratepayers who dont have wage rises around that figure.

NPDC's Draft 10 Year Plan

Office Use Only: 3364

Submission No: 1477

Mary Parker

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This is a nice to have that you can't afford at present. Fix our infrastructure and get the basics right then move on to the nice stuff.

What else?

Stick to the basics and let private enterprise and central govt fund the nice to haves

NPDC's Draft 10 Year Plan

Office Use Only: 3365

Submission No: 1478

Caro McKee

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Don't let the plumbing get to this point where its now costing millions of dollars. Stop putting a bandaid on the pipework and when a section needs replacing fix it properly by qualified companies who won't rip ratepayers off. Maintenance means monitoring constantly not ignore it because guess what it wont go away.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

With the amount of rain Taranaki receives over the year I find it very surprising we have a need for water meters. As for wasting water how about the money you have used for these sculptures we have scattered around the city goes towards repairing pipework which would prevent leakage. Hence water shortage. Leaky pipework means water shortage. Money doesnt grow on trees and families are already struggling with general cost of living. Adding another charge will cripple middle income earners who are already stretched with finances.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

I'd like to know why it costs \$20 million. Again if you bothered to fix the storm water at the time of damage instead of using ratepayers money on sculptures, art center etc the council would have money available for the upgrade of the stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I believe at present this is not a necessity. Stormwater for Waitara and upgrading our water pipes is priority not upgrading or extending a walkway.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Council do not need electric cars when average household cant afford one. Waste of ratepayers money again spend thus money on Stormwater upgrade and repair/replace of water pipes.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Again multi sport hub won't fix stormwater drains or old pipework. Fix one problem first instead of spending unnecessary money elsewhere on electric cars, sports staduims. Fundraising goes a long way, grants from Lotto etc better options.

What else?

Fix NP's infrastructure before spending money on non necessary agendas.

NPDC's Draft 10 Year Plan

Office Use Only: 3366

Submission No: 1479

C Lambourn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

In a all ready struggling housing market more rats hikes will simply be passed down to renters making life harder for those to get in their own home. Water meters are a complete joke and do nothing to stem water usage but simply create more income for fat cat councilors water should be free it falls from the sky. Why should rate payers have to pay for a new sports ground we paid for a multimillion dollar stadium which is condemned why anrnt those who design surveyed and built being bought to account why should the rate payers pay again

Saving water and water meters

Comments

Water meters are a joke and do nothing but create revenue for the pockets of councilors. Used water goes back to the environment to be used again we need more rain captured not saved

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Waitara rate payers can pay for it

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Tracks can be improved for sure extending the walk way to waitara is a waste of money. I think walkk ways such as the one now to wilkys pools is an abomination and a scar on the mountain plastic grip treads aren't we meant to be taking plastic out of the inviroment.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

New Zealand should not be sucked in to electric cars we are nothing on a global scale of car pollution. Spend the money on the water infrastructure.

Developing a multi-sport hub

Comments

Make the people who do not build our current stadium to the correct standards front up and fix the problem out there pockets not ours.

What else?

Allow all green waste to be dropped at the refuse free including palm fronds flax etc it can be used for mulch for park areas dump prices are ridiculously high.

NPDC's Draft 10 Year Plan

Submission No: 1480

Raelene Myers

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Please dont spend \$45million dollars to put in water meters on top of the \$42million needed to fix the actual problem. For goodness sake.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I would like to see the walkway extended but if it means rates go up, then do nothing at the moment. Our rates were \$750p.a. 20 years ago and are now over \$3,000p.a. at this rate we wont be able to afford to live in our home.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

For goodness sake if you spend this money make sure it's done right the first time. I'm very angry we had to fund the rugby stadium then when its engineering failed noone was held accountable and the ratepayers are having to fund it again. Not good enough.

What else?

We cannot keep having massive rates increases year after year. It needs to end. Work within the budget you have. Get some better financial planners in there. Stop wasting money.

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Maybe if it had been a higher priority for the council of the years it wouldn't be such an issue now

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Fix the storm water system first. I am going broke just looking at all of this

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Maybe if so many artsy things hadn't been done in prior years and the basics had been done the issue wouldn't be so big

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I'm running out of money to pay my rates

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

What else?

I was so excited at 51 to buy my first home. Now I am sad because in 8 years I was looking forward to retirement, but this won't happen with how much my rates are going up, along with everything else. My husband has cancer I have had a major stroke but still we work. I guess at 65 I will be looking at selling my home, possibly moving back to Stratford. Not ideal as we moved up here 18 years ago for a better quality of life. Oh well it was nice while it lasted

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

to many pet projects obviously getting in the way of maintainance. As a rate payer water, sewage and roads are council core responsibility. pet projects and nice to haves should come last!!!

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Theres already an abundance of walking tracks ect for people to use. Stick to core services

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

do you really think spending \$1 million electrifying the vehicle fleet and \$200k on trees is going to make one iota of a difference to the so called climate emergency!! It just stinks of a feel good and look at me scenario. As a country we contribute 0.15% Spend the \$1.2 million on something use full like the bloody plumbing

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

No thanks. I would have said yes if the council had listen to the rate payers theyre meant too represent and not spent the \$50 million on the rugby stadium. Its for one code. Just a joke.

What else?

I think the NPDC is out of touch with rate payers. the proposed rates increases are simply unsustainable. Where does it end?I seen where someone calculated at the currant proposal rates will be up to \$4500 in 10 yrs!!!! Thats crazy. Councils seem to be the only entity that feel the need to raise taxes every yr! Central government seem to operate without increasing Tax year on year. They actually give out tax cuts from time to time. Its about time you learnt to operate within the budget you all ready have. To much wastage. One that stands out is that under utilised Pink bike rack at the bottom of town. Came with a price tag of \$5000. Having done a lot of engineering theres probably around \$300 worth of steel. A few hours of labor and paint and install. maybe \$1500 max. Who vetts and aproves these little pet projects. I know its only small amount but just shows the incompetence of the people spending us the rate payers money

NPDC's Draft 10 Year Plan

Office Use Only: 3383

Submission No: 1486

Steve Wilson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

These should have been covered in previous rate years rather than prioritising luxuries. E.g cycleways, art galleries, art installs. City beautification and efforts at increasing desirability of New Plymouth as a tourist destination should only become a priority when the basic needs of the local population, who pay the rates, are satisfied. Pretty sad planning and implementation on behalf of NPDC

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Another way to charge rate payers fir misappropriated use of funds in previous years that should have been used for updating infrastructure

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Suburb and district funds from rates should be spent proportionally from where they originate. Inglewood is being allocated only a fraction of funding

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Great for tourists

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Make New Plymouth district/suburbs pay for this. The benefit for the Inglewood community is minimal

What else?

Have been silent previously but this draft plan and funding allocation is a shambles. Questions of equity and allocation of resources must be asked of this council and its councillors

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Close to half of our water supply is used to power the small hydro station on hydro rd which produced no significant output. This supply completely bypasses the water system and if it was re introduced or the station shut down would solve the majority of water shortage issues. Water meters are a waste of money and an additional expense again on top of already exorbitant rates.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Not at this time when tourism is limited to covid and the returns on such an investment would not pay off

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Electric cars are bo better for the environment due to the waste produced by the batteries needed.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Should have used the yarrows stadium money for a multisport hub instead

What else?

Listen to the people! It seems that there is so much feedback given from the public and even with overwhelming opposition the council still pushes through projects that are complete luxuries at a time when many people are struggling with necessities.

Submission No: 1490

Wayne Dowsing

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2: Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Option 1: Do not develop a multi-sport hub.

What else?

Talk to people ask if they can afford for rates to go up, most family's will say no! It's a struggle already, don't hit people when we're down. Still recovering from the after effects of Covid lock down, and a lot of uncertainty in business with change and unrest with Covid.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Should not effect rural property whom supply there own wastewater and water supply. No additional cost on rates.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Develop the Taranaki traverse only.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Plant trees only. Too much dairy country.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Remove the old rugby park. Renew one at the racecourse.

What else?

Don't raise the rates that high in the current environment.

Vanessa

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This is essential so this is where money should be spent (even if it is at the expense of non-essentials ie:art galleries, entertainment things).

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Encourage houses to have their own water tanks, then we all collect a large share of our water we need and the town supply is just for drip feed.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This is a non-essential and we can not afford to fund this if we want to fix the water system. Rate payers do not have enough money to cover their rate increases so we have to cut back on these non-essentials.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

This is a non-essential. Residents being able to pay their essential bills and not the extra rates is more important than electric cars. NP residents will burn extra petrol to go to work more so they can pay rates to cover the electric cars - that is pointless!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I have children and we manage fine without it now. This is a non-essential. Residents can't keep paying for these luxuries.

What else?

Times a tough. New Plymouth residents can not afford a large rates increase. Please just spend money on essential things - water, roads, rubbish collection. Everything else is a luxury. Families do not have income increases very often. And when we do it is small (like 2%). We can not afford a 12 % increase in rates and then 6% yearly after that. That is money we need for all the other bills (that keep increasing too).
