Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Some of us have already got water meters and pay for what we use. If it is good enough for us to pay everybody else should pay too.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

NPDC should have done it years ago.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Fix water and sewage before spending money on tracks and trails.

Boosting our Climate Action Framework

Comments

Keep planting there will be plenty of blackberrys and gorse etc to pick in a few years and NO to electric cars where are we going to get all this power to keep them going.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

A multi sport hub is going ahead in Stratford. We don't need a second one in Taranaki. Contribute some money to them.

What else?

We are over our rates increasing continually. Art in public places is a waste of ratepayers money. 50,000 a year could repair something else. Where is the art in Inglewood (so nothing gets spent here). Selling Council land cheap, eg selling land on Koru Rd to Green School, when I was prepared to pay twice as much as what the Council sold it for. It should have gone up for tender not sold like it was. Reduce the amount of leaflets from NPDC and advertising, rates demands it is fed into recycling bins without looking at them.

Submission No: 3678

Clare Lawn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I hope the Council will take Egmont Village into consideration with increases as we provide our own plumbing and septic tanks.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Again Egmont Village supplies own water so our rates should reflect this.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I feel strongly that numbers should be limited and that non-ratepayers should be charged as is the case with Len Lye Gallery.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

When the Stratford gas-fired power station was granted permission the agreement was the trees would be planted to compensate for emissions. This did not happen!

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Roading infrastructure would be a huge problem as Coronation Ave at certain times comes to halt because of congestion. Trucks and population increase and more cars also contributing factor.

What else?

Some houses in Egmont Village have problem with drainage and water coming from main road is causing problem with sewerage and septic tanks. If the drainage of water from main road could be improved it would be a cost effective way of dealing with this. Increased traffic has made a once quiet village very noisy. Requesting trucks not to use air-brakes would be helpful. A roundabout at Egmont Rd cross roads would be effective slowing traffic and allowing people to get into flow. Next time road is sealed a sealant that reduces noise would be great! Additional footpaths needed. Not needed is streetlighting = light pollution. Lack of lighting is good security as people using main road not aware of village housing.

New Plymouth District Council

Re. Submission to Draft Long – term plan 2021-2031

This paper is being submitted as part of the Draft Long –Term Plan 2021-2031 on behalf of Surf Life Saving New Zealand for the provision of Regional Lifeguard Services at Fitzroy, East End and Oakura beach's during the peak summer holiday period. We wish to thank the council for the partnership which ensures that there is continued funding for the Lifeguard service on these beaches.

The budgets within the attached documents show the main costs associated with the Regional Lifeguard Service within the New Plymouth District over the next three summer seasons. Please note these are subject to change but are provided to give a likely estimate to assist in long term budget planning.

- 2021-22: \$ 105,574 (+GST)
- 2022-23: \$ 107,075 (+GST)
- 2023-24: \$ 108,416 (+GST)

It is important to note that these costs do not include the training and skill development programs the service requires.

Surf Life Saving New Zealand understands that council are obliged to apply annual inflation to these annual budgets as per the CPI adjustment and appreciates this consideration as our costs continually to incrementally increase.

We would like to take the opportunity to present our submission and answer any questions the councillors may have regarding the Provision of a Regional Lifeguard Service within the Taranaki area.

SLSNZ acknowledges and values the on-going support of the New Plymouth District Council and is proud of the collaborative relationship shared both with the council and the Lifeguard Services which provides positive impact to those who live and choose to recreate at Beaches and within the wider community.

Yours sincerely,

Charlie Cordwell

Provision of a Regional Lifeguard Service 2021 - 2031 New Plymouth District Council

Prepared By: Charlie Cordwell – Regional Manager – Central
Date: April 2021

Contents:

1. Executive Summary	3
2. Community Needs Identified	4-5
3. Current and Future Funding	6
4. Reporting and Responsibilities	7

1. Executive Summary

1.1 Introduction

Surf Lifesaving New Zealand's purpose is based around "Protecting our Community in the Water"; this is a massive undertaking and remains a constant challenge. As an organisation we rely on building strong partnerships on a national and local scale. Surf Lifesaving- Central Region consists of 20 clubs stretching from Wellington and the Capital Coast to Hawkes bay and Taranaki. We are aligned nationally with three other Regions (Northern/Eastern/Southern) and together we provide Regional Lifeguard Services across most beaches throughout New Zealand. This allows us to take a consistent approach to Council Funding Submissions and Service Delivery.

Our current focuses are

- To be New Zealand's leading aquatic essential service
- To be recognised as the #1 authority in drowning and prevention
- Have effective partnerships in the aquatic sector
- Be flexible and responsive to community needs in water safety
- Have Clubs and the national Association functioning effectively and will be vibrant and well resourced
- Have a 'one organisation' view to drowning prevention and our sport
- Have members who do better in life than non-members
- Ensure all stakeholders reflect positively on their relationship with SLS

2 . Community Needs Identified

2.1 Objectives

The main objective of the Regional Lifeguard Service is to prevent death and injury at Fitzroy, East End and Oakura beaches. Funding will provide the means to have patrolled beach areas during the busiest periods. By having patrolled beaches this will assist the area by encouraging greater tourism and maximising the aquatic usage safely.

A regional lifeguard service provides a safe swimming area for beach users during the summer holiday period. Qualified lifeguards assess the safety of the conditions, and establish a patrolled area if conditions are suitable. Swimmers who follow the directions of lifeguards and swim between the flags can enjoy the beach safely. Lifeguards also monitor areas outside the flags and perform preventative actions to reduce the risk of drowning and injury.

A key objective is to reduce the number of rescues required by performing preventative actions. This may include advising against swimming in a designated area because of:

- Sea conditions such as rips, holes, strong undertows, and the size of the surf and force of waves which may be considered dangerous.
- Presence of stingers in the water such as jellyfish and stingrays.
- Presence of dangerous/high risk sea life such as sharks.
- Pollution problems.
- Inappropriate or incorrect use of surfboards, boogie boards or other floatation devices used in the water.
- Warning swimmers who are venturing past safe limits in relation to their swimming abilities.

Proactive preventative actions aim to prevent beach users from getting into danger while at the beach and educate them in ways to enjoy the sea environment safely through interaction with the surf lifeguards. If conditions are deemed unsafe for swimming, the lifeguards remain on duty to advise the public against swimming, and perform any preventative actions or rescues as required throughout the day.

Should people become endangered, the safe return of people to the beach, without drowning or injury, is a surf lifeguard's main objective.

Regional Lifeguards also provide the following services to the public and emergency services should the need arise:

- Administer first aid.
- Carry out searches (shore or sea based).
- Call emergency services should the seriousness of an incident require it.
- Work with the Coastguard and Police as required.
- Provide important information to the public.
- Deliver public education messages proactively and directly to beach users.

- Informing public of council bylaws with regards to animals.

2.2 Who will benefit

- People of all ages, gender and cultural backgrounds
- Local residents
- Beach going public
- Visitors to the Region
- Will provide employment for local youth
- Local businesses

2.3 Link to Council Priorities

There are a number of key areas where this service links into Council strategies and priorities these are the following:

- Social Wellbeing of Residents – To support healthy, active and connected communities.
- To create vibrant, connected and safe communities.
- Access to the natural environment in a safer way.
- Working with community groups.
- A prosperous community through the encouragement of Tourism.

3. Current and Future Funding Requirements

3.1 Current Service Provided

Location	Start Date	Finish Date	Total Number Days	No of Lifeguards	Days per Week	Hours Per Day
Fitzroy	21/12/2020	29/01/2021	30	9	5	7.5
East End	21/12/2020	29/01/2021	30	9	5	7.5
Oakura	21/12/2020	29/01/2021	30	9	5	7.5

3.2 Proposed Service 2021-2022

Location	Start Date	Finish Date	Total Number Days	No of Lifeguards	Days per Week	Hours Per Day
Fitzroy	20/12/2021	28/01/2022	50	9	5	7.5

Oakura	20/12/2021	28/01/2022	50	9	5	7.5

3.3 Funding requirements – projected 2021-2024

Expenditure	2021 / 2022	2022 / 2023	2023 / 2024
Uniforms	\$1830	\$1830	\$1830
Equipment / Repairs	\$2178	\$2178	\$2178
Kiwi Saver	\$2544	\$2544	\$2544
Club Grants	\$6000	\$6000	\$6000
Wages	\$88110	*\$89431	* \$90772
Supervision	\$5085	\$5085	\$5085
Management fee	\$6007	\$6007	\$6007
TOTAL EXPENDITURE	\$105,754	\$107,075	\$108,416

*assumes 1.5% CPI adjustment to Wages years 2 and 3

4. Reporting & Responsibilities

4.1 Reporting

Surf Life Saving New Zealand will undertake a full review of the service on completion of the services provided. This review along with a written report will be completed and reported back to the Council within one (1) month of the contract completion.

Report provided to each Council will include:

- Summary of patrol statistics
- Type of rescues performed, equipment used
- Details on types of first aids performed and cause
- Detail of any influences on the delivery of the service, e.g. weather conditions, king tides, events occurring in the area.
- Any other information that will assist in the delivery of the service now and in the future.
- Any recommendations to improve the service, or the safety of beach goers.

4.2 New Plymouth District Council Responsibilities

The Councils will be responsible for the

1. Funding of the Regional Lifeguard service to the level recommended in the Coastal Public Survey for the expenses identified by SLSNZ.

4.3 Surf Life Saving New Zealand Responsibilities

Surf Life Saving New Zealand will be responsible for and supply the following:

1. Recruitment, appointment and human resource management related to this service along with any transportation of personnel and equipment.
2. Supply of rescue and first aid equipment, IRB's (inflatable rescue boats), communication equipment at locations where a SLSNZ affiliated Club is located.
3. Supply of Clubrooms for administering first aid, storage of all equipment, and staff requirements at locations where a SLSNZ affiliated Club is located.

Saving water and water meters

Our water supply is limited and most of the treated water goes down the drain literally. Perhaps council could consider making it mandatory for new builds to gather rainwater into tanks and this water could be piped to the outside taps where it could be used for watering gardens or cleaning vehicles etc.

As it would not need to be treated and it is free water in Taranaki, it would save unnecessary spending on treatments. Maybe this system could also be extended and piped to laundry and bathroom use.

In the event of supplies running out during a dry period this scheme would at least ram home the message that water supplies are finite and users would be educated into monitoring their usage.

Water meters cannot come soon enough to every property, maybe there could be a scheme where there is a public/private system to share in the cost of implementing this.
