

6. Individual Neighbourhood Parks – Management Objectives and Development concepts

This omnibus plan provides direction for the management of 6 Waitara neighbourhood parks administered by New Plymouth District Council (NPDC). The general policies and levels of service in **Section 4 and 5** apply to all of these parks. In addition, the following section outlines specific management objective and development concepts for each reserve. If there is inconsistency between the general policy and the reserve-specific policy, the reserve-specific policy will take precedence.

The development concept plans have been prepared for each park. Funding for the various aspects of development concepts is conditional on decisions made as part of the Long Term Council Community Plan process. An implementation plan will also be prepared as part of the management planning process. This plan will outline the priority order in which reserve development will be implemented once the funding is made available.

The mana whenua associated with each reserve are recorded under tangata whenua interests. This association does not necessarily mean there is waahi tapu or any significant historic feature within the reserve but rather acknowledges the rohe each reserve falls within and the iwi and hapu who are connected to this general area. For some reserves there is more than one group with historic and cultural connections to the area.
