# NPDC's Draft 10 Year Plan

Office Use Only: 8089

**Submission No: 3501**

**Helena McLeod**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

### *Comments*

Leasehold land sales are worth more than \$20M

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### *Comments*

Multi hub should not take over our beautiful racetrack, find somewhere else to put it

---

# NPDC's Draft 10 Year Plan

Office Use Only: 8090

**Submission No: 3502**

**Sarah Balsom**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 8091

**Submission No: 3503**

**Joseph Bailey**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

It needs to be fixed. We don't want to end up with the situation Wellington is currently going through. <https://www.nzherald.co.nz/nz/wellington-water-in-dangerous-spiral/MRFFBI3EZTTGO4XC2CA44UWXJY/> It seems unfair on rate payers to foot the bill because of the Councils neglect.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

I think it would be wise to continue to charge the default amount every rate payer is currently paying for water which includes a set amount of liters. This way most users won't see an increase in their water rates, the council will make money on the users who under-use and make money on users who over-use, which then can contribute more to "Fixing the Plumbing".

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

#### **Comments**

I would like to choose option 3 but I don't think the return on investment from a tourism perspective would justify an extra \$30 million.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### ***Comments***

There needs to be more discussion around the manufacture of electric vehicles. The initial upfront cost of going Tesla isn't great but the long term lifespan and being able to get "1 million miles" from the battery before it needs replacing means less need to replace vehicles so frequently but also the environmental impact of the replacement batteries if the council was to replace the batteries in it's fleet years down the road verses replacing the vehicles outright again.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I'm all for the multi-sports hub but the location is not the best for many reasons including traffic along Coronation Ave, light pollution, effect on neighbors, wildlife at Pukekura Park etc.

---

# NPDC's Draft 10 Year Plan

Office Use Only: 8092

**Submission No: 3504**

**Roger Malthus**

Organisation: Property Owner

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Can we use and expand the flood retention dams built in the early 1980's to substantially increase our city's storage capacity. NPDC to encourage property owners where able to increase rainwater storage for their own use ideally from roof catchment. Build new large scale storage dams to save Mount Taranaki winter rain runoff.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

Not enthusiastic about the use and cost of water meters as a priority option

---

## Improving stormwater management in Waitara

---

## Extending our tracks and trails network

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

The about items for submissions are obviously well intended. However, I would also like to expand my submission to include the following.

- 1) A long term plan with regard to roadside weed control, especially with reference to Bristle Grass.
- 2) Traffic management with reference to replacing the dangerous one lane bridge on Corbett Road to redirect the amount of industrial traffic using Henwood Road.
- 3) NPDC liaison with Transport NZ to construct north and south passing lanes on State Highway 3A

# NPDC's Draft 10 Year Plan

Office Use Only: 8093

**Submission No: 3505**

**Roger Maxwell**

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Conservation measure need to be introduced. eg meters. Our system of collecting water needs to be improved and more storage of run of the river schemes designed. the local area is unsuitable for large dams but smaller Turkey Nest style storage similar to large irrigation ponds in the South Island should be investigated.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

#### **Comments**

Introduce a education programme into schools highlighting waste and how important water is to the community.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

### Boosting our Climate Action Framework

#### **Comments**

With the planned hike in rates every effort should be to minimise the cost of new initiatives and use funding for new programmes available from the Government if following their policy

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

### **What else?**

Sewerage for Urenui. Investigate local processing of combined waste collection such as Advantec systems . Pio Pio has a successfully operating system which discharges quality effluent into a local sensitive water catchment. This would eliminate the need for an expensive pipeline system to transport the waste to the New Plymouth system and avoid over use of that facility

# NPDC's Draft 10 Year Plan

**Mike Hardy**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

N/A. I think your minds are already made up.

# NPDC's Draft 10 Year Plan

Office Use Only: 8099

**Submission No: 3507**

**Brigit Otero**

Wish to speak to the Council: Yes

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 1. Do nothing. Status quo. No additional funding.

### How do we pay for fixing our plumbing?

#### **Comments**

w live in the country and pay rates which presumably goes toward our roads, not water as we supply our own water. My concern is that my money would be used toward something that I does not impact my home, such as water, when what we need is that one "council funded thing" i.e., the roads. (The roads here in Uruti are in a horrific state with some jobs have been on the books for over 9 years )

---

## Saving water and water meters

#### **Comments**

Again -- where do homes that do not use city water fit in?

---

## Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

YES! We CAN be a "Queenstown" of the North Island. We have the natural resources but do not promote and maximize this potential.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

### What else?

E-WASTE. With consumerism on the rise, and annual purchases of new electronics a given, where does one "throw away" the old computer, phone, remote control? At the New Plymouth transfer station. But do they really? Proper recycling of e-waste through the transfer station is expensive and embarrassingly people hoard their old electronics until they can find a cheaper solution, such as a willing farmer who likewise throws away e-waste in a landfill on his property. I live in the country and sadly, I see this all the time. E-waste is a global problem and the nations that I believe have tackled the problem efficiently are those states that impose an e-waste surcharge on top on any new electronic purchase. When one wants that new i-phone, one is more likely to dismiss the extra cost up front as opposed to when the phone is no longer desired; why pay to throw it away then? Money collected from the e-waste surcharge purchase are used towards ensuring e-waste disposal is easily available and used. Our land does not need more buried TVs. Let's dispose of e-waste correctly.

### What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am an Employee at elite kitchens. The intersection at Egmont Road/State Highway 3 presents a great danger to the community unless immediate measures are taken to improve the safety at this intersection. We will see a fatality! We can no longer wait to see action. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. I understand the council were to build a connecting road between Egmont Road and Henwood Road. This has not happened, and communication regarding this plan has fallen silent. I request the council urgently prioritise this issue to either: 1. Introduce traffic lights for motorists to enter and exit Egmont Road safely 2. Build the interconnecting road between Egmont Road and Henwood Road as planned NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I/we request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### **Comments**

It'd be nice to add safer biking lanes and extend biking lanes. Also, educate the public on bicycle safety.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

I don't believe sports is our biggest problem. Don't we have a housing crisis? I am from the US, so I see things differently, but I think NP could benefit from a large apartment complex. They can be nicely built with a clubhouse for entertaining, grassy areas with grills and picnic tables, safe parking, pools, gym, etc. This could open up opportunities for jib, as the grounds and apartments need maintenance and someone needs to be in the office for applications, maintenance requests, problems, etc. I know someone else is advocating for a tiny home complex. Either way! We need more affordable housing options for people. O get the motivation behind the sports complex, but I think that has to come later. We could offer a housing complex and invest more in organizations offering activities for young people. In the states we often have community centers that offer all sorts of classes and groups and trips and teams. There's a catalog that goes out to tell you what classes are available, the times, where they meet, and the cost. I have taken tennis lessons and ceramic classes and participated on softball team. We can do both.

### **Comments**

Whilst I am definitely not against the Hub I think the proposal to have it in the center of the race course is very bad idea.

1. Traffic now on Coronation Av, Rogan street and Gover street is already a nightmare during major events at the stadium. During Americana traffic is banked right along Rogan street onto Coronation Av for several hours. Turning right from Rogan street onto Coronation Avenue is and will become a serious health and safety issue.
2. This proposal allows for no expansion at all. The proposed location will be at capacity from the minute it is opened. Once the population has grown by 10% , more facilities will need to be constructed elsewhere. We have this exact problem at the Waiwhakiho netball courts now. My feeling is a area that can be expanded in the future should be found if this is to go ahead (maybe the old tank farm near the port or somewhere further out of town??).
3. The cost has not considered any roading changes needed. These are likely to be substantial.
4. The middle of the racecourse has to be one of the windiest places in Taranaki I am guessing. I have spent years playing sport there and it is a horrendous experience on a bad day.
5. Will the extra noise generated by a sports hub here, spoil Pukekura park?? Pukekura park is one of the jewel's in Taranaki's crown and brings thousands of visitors to our province. We can't destroy any of this experience.
6. I would be concerned about the viability of the Racing club if this proposal goes ahead. I really cant not see how the sports hub and the Racing club could operate together? Racing brings around \$20m annually into our province from what I understand. It also employs a large number of people locally.
7. It is concerning that this survey does not give the option of a sports hub, but at a different location. Has this option already been decided??
8. Where does the extra \$51m (the difference between the \$40m that NPDC will commit to and the \$91m final cost) come from? These projects always blow out on cost so who will be responsible for any overruns?
9. If the pony club is being relocated, who is paying for that? Has this been budgeted?

---

### **What else?**

The NPDC survey fails to include a option on the proposed sports hub, whereby a sports hub is built in another location. I am for a sports hub, just not in an area which could destroy Pukekura park and be at capacity from day one.

# NPDC's Draft 10 Year Plan

Office Use Only: 8106

**Submission No: 3513**

**Sonja**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### **Comments**

I'm not opposed to extending the walkway but think its not a priority as the other proposals. Maintaining what we have the walkway and tracks etc would be adequate.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### **Comments**

Reviewing use of vehicle fleet and necessity of all that use them

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Does the proposed plan offer sufficient indoor multi sport stadiums? Outdoor netball courts? Why not indoor- yes the cost but maybe start thinking long term. Is the site thinking to the future for extension? Find a bigger site, start smaller then add in the following 5 year plan

---

# NPDC's Draft 10 Year Plan

Office Use Only: 8107

**Submission No: 3514**

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### **Comments**

Hockey New Zealand is strongly supportive of the proposed multi-sport hub and in particular the value it will add to Taranaki Hockey. Hockey has had constant and strong participation growth across the country including in Taranaki and because of this is now having to implement strategies to provide opportunity for all those that want to play. This includes having matches/trainings late at night, often at times that are less than ideal especially for the younger members of our community. It has also lead to hockey opportunities being provided at venues/facilities not built or designed for hockey providing a less than optimal experience. As such this facility is important because it will bring additional turf capacity to a region that needs it. This project however will provide much bigger value than just the straight hockey participation opportunities. The multi-sport design will create many added value benefits to the social fabric of sport and the wider community in New Plymouth. It will allow families to participate together across various sports, it will provide a focal point for activity creating safe and engaging environments. Covid-19 has shown us the importance of community activity including sport to the mental and physical well-being to communities and this facility will create amazing outcomes in this regard. We are strongly supportive of the approach taken by Sport Taranaki and the leadership role that Taranaki Hockey is playing in it and are happy to support this project in anyway we can. Thanks Ken Maplesden

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Why is it not done on a rotational basis so that the oldest ones are checked every year in rotation like they used to be.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Why not put on hold until people are in a better financial position due to Covid.

---

### Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

#### **Comments**

Do nothing until a lot of other countries come on board with climate change.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

The Sports hub should NOT be in the middle of the racecourse. I do not go to the races but still think it should be built somewhere else.

---

### **What else?**

The council need to look at themselves as a whole and perhaps cut the council employees back and also their salaries. There are too many high paid people working there which would help go towards keeping the rates down.

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### ***Comments***

I think this should be a high priority and take precedence over all other projects.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### ***Comments***

I don't think water meters are the answer to the problem. If the necessary work is done on the water infrastructure this would solve a lot of the problems.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### ***Comments***

I think this along with the water infrastructure works should be a priority too.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### ***Comments***

Post COVID19 I think this falls in the 'nice to have' bracket and is not essential. Given that many families are suffering hardship post COVID 19 I think budgeting for these types of projects is wrong. The Council should only be highlighting the necessary projects to keep Rates increases to a minimum!

---

## **Boosting our Climate Action Framework**

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

I think the planting of the trees is a good idea but the electrifying of the vehicle fleet could wait a while yet.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Absolutely not!!! It is not needed at this time.

---

## Fixing our plumbing

**How much should we invest in our plumbing over the next 10 years?**

**How do we pay for fixing our plumbing?**

### *Comments*

The three-waters reform by Central Government seems to suggest a complicated package to take over the control and funding of these necessary repairs and improvements. If they do, which is likely, then this game-changer and the values outlined in the LTP consult will be redundant. I'm undecided on this issue as it is both complicated and political.

---

## Saving water and water meters

### *Comments*

Possible more work on maximising the use of existing assets such as increasing the volume of lake Mangamahoe by cutting vegetation back and raising its level. Again wait to hear what Central Government has to say.

---

## Improving stormwater management in Waitara

### *Comments*

My concern is sea level rise and the long term effect of this on the low water table. Clearly in the long-term (20-30 years) this is going to be a big issue. Spending too much here maybe is money down the drain. Repiling houses might be a better and cheaper option; householders paying part through a NPDC lien on the property.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

### **Comments**

Tracks and Trails should be high priority for our community. They provide the opportunity for wellbeing and health benefits for the whole Taranaki region. It is exercise that all ages can do that has no cost involved, walking and biking can be done at any time of the year. It will also allow a greater number of people to safely bike to work. Connecting the tracks (biking and walking) from the Maunga to the sea are very important not only for the community but for attracting tourists and should be high priority.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Needs to happen sooner rather than later. It provides a place for all ages to come together to be active. It has wide reaching benefits for a large proportion of the community, in particularly our young people to be active for life.

---

**Shelley Ingle**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option A: Pay for it from rates

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Make another water storage facility so that we have enough water when it is dry over summer. We have enough water but not enough water storage

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

I am in agreement that the community needs these sports facilities, and I like that the sports codes have come together to present a united community space. I strongly agree that the racecourse needs to be better utilised for the whole of the community and not just serve one statistically small interest group. However, not all the community can or wish to play sports, and there is currently such a strong focus on only this one area of the community. I would like to see more options to include more community engagement and participation within this proposed space, without taking away from any sporting codes. Some of our other community groups, especially those in Social Services, are struggling for space or recognition in our community and also deserve to be represented and supported in this planned community space.

**Noel Moratti**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

#### **Comments**

Council should forget about water meters and instead spend that money and more on increasing our water storage and catchment. Nothing has been done about this despite the fact that the population and amount of new housing is still growing. Money for this could come from the perpetual fund, which previous councils and CEO's told us would cover our rates, then mismanaged the fund. Living in Waitara it is possible to see water leaking up through roads and footpaths, often for weeks.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Costs involved in meters will only add to rates ,so called savings (probably overstated) will just disappear in the system

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

---

### **What else?**

Think of people on fixed incomes when spending our money, in 2006 the rates on our property were \$1048 now \$2317 . Incomes have not risen by those percentages

# NPDC's Draft 10 Year Plan

Office Use Only: 8135

**Submission No: 3534**

**Nigel Harrison**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

There should already be retained earnings or the Council equivalent thereof to fund at least 75% of what is required. I'm sure astute Councillors will have analysed at least ten years of Council accounts, have found the funds lacking or perhaps frittered away elsewhere.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

#### **Comments**

water saving plan is ill defined on this submission form. Maybe it's elsewhere for viewing. Links to the various options containing more detail should have been provided. Water meters are a must. Be careful you don't have a Tauranga issue where the fixed and variable water charges were initially totally wrong.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

It appears the Council prefer the gold plated option. A phased approach is far more preferable rather than attempting to predict high level of inundation which may not occur. A phased approach of level 2 would be preferable with areas prioritised.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

The Council need to mark time and cut expenditure on nice to have.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Delete option 1. This is a questionnaire fault in not being able to reverse an initial choice I have not selected any option but propose a combination of hybrid vehicles and ICE where hybrid are used for around town and ICE on longer trips. Unless the Council can access carbon credits or conversely reduce a carbon tax liability and show some financial gain at best or breakeven at worst, the planting trees serves only as a feel good factor.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

A nice to have, not needed. Council already have dropped the ball at best or were caught with their pants down at worst with Yarrow Stadium fiasco.

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Ratepayers are picking up the tab for successive incompetence. Endorsement of any action must come with accountability on the part of NPDC staff employed to manage this in the past. You have been given the message regarding water meters so stop pushing the issue in a bid to achieve 'resistance fatigue'.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

#### **Comments**

Our free-draining volcanic soils are in part responsible for the comparative use measure. Council(s) continue to consent new build property without grey-water systems which would have a significant usage impact. It is expected ratepayers foot the bill for meters to assist the provider in identifying leaks they have been paying to be managed?! Only the Public Sector gets to operate in this obscene manner.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

#### **Comments**

Yet conventional construction continues to be consented for replacement and increased density housing further compounding the problem?!

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

We'd all love to see investment in the 'nice-to-haves'. It turns out though that a lot of what we do have now was prioritised over the management and care of critical assets. Learn from the mistakes of the past, and live within your means.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### ***Comments***

Try and exercise some restraint in the spending of other people's money - especially where it's fundamentally all about self-promotion. Only a Council could find a way to spend \$117k+ per ha on tree-planting. Seriously?

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### ***Comments***

Again - a nice to have, but recognise the long-term benefit and "Paying it Forward" captures it well, but for what proportion of ratepayers? Not entirely convinced all the implications of the proposal have been considered, especially where funding is concerned. A concentration of facilities would allow for the release of existing assets (Aquatic Centre, Netball Courts) which would make a significant contribution to the end costs. The implications for Pony Club and other users need to be considered. This is starting to look a lot like a 'Legacy Project' for the current crop. Tread carefully.

---

## What else?

Ratepayers are rightfully frustrated at having been let down by successive Elected individuals and employed Council Staff who they have failed to hold to account, all the while swelling the number of employed personnel. Councilors would do well to focus on core delivery and value for ratepayers. Far too much grandstanding and using the privilege's of Public office to push personal agenda. No wonder the electorate is ambiguous where the feedback is concerned - there is too much evidence to support the sentiment that NPDC will do as it pleases regardless. Council through it's actions and lack of action has failed to bring ratepayers along on it's preferred journey. Getting bogged down in debates on Ward representation and ridiculous expenditure on Chambers has not helped. Finally - when do these unsustainable rates rises come under control? Anything above inflation is a FAILURE on the part of those elected and employed to deliver.

### What else?

DANGER AT EGMONT ROAD / STATE HIGHWAY 3 INTERSECTION I write to express my deep concerns for the extreme danger presented for motorists of the Egmont Road/State Highway 3 intersection. I am an Employee on Oropuriri Road. The intersection at Egmont Road/State Highway 3 presents a great danger to the community unless immediate measures are taken to improve the safety at this intersection. We will see a fatality! We can no longer wait to see action. Due to the busy State Highway 3' East and West bound traffic, entry and exit from Egmont Road is dangerous and difficult. We see motorists taking extreme risks to exit to the East against 80km/hr traffic heading into New Plymouth. Collisions for Egmont Road entry and exit traffic present danger not only to those directly involved but also the State Highway traffic. Additional to the danger presented, accidents here cause major disruptions and roadblocks to incoming and outgoing highway traffic to New Plymouth. I understand the council were to build a connecting road between Egmont Road and Henwood Road. This has not happened, and communication regarding this plan has fallen silent. I request the council urgently prioritise this issue to either: 1. Introduce traffic lights for motorists to enter and exit Egmont Road safely 2. Build the interconnecting road between Egmont Road and Henwood Road as planned NZTA have no plans or budget to improve the safety of the intersection, even though it is their responsibility to do so. Therefore I/we request for the NPDC to step up and take responsibility for the safety of their citizens and constituents.

Please stop closing tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

### *Comments*

A good idea would be for shops to slightly increase product costs which the buyer would then get back when returning their rubbish. This would be an incentive for people to stop littering. We also need more rubbish bins.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

### ***Comments***

We already have too many sports areas that aren't used to their full extent. Including the cricket nets that the public paid for but aren't allowed to use.

---

### **What else?**

I was hesitant to fill out this survey as we've had other surveys in the past that nothing has come of. It feels like the council asks what the public wants as a publicity stunt. I'd be happy to meet with the council sometime to discuss some of the many problems. Please at least send someone to walk around the city and ask the public how they feel. One of the many problems I have with the council is around access. For example, where the coastal walkway crosses the railway line to the playground there's a line of boulders setup like steps to make it easier to access the sand. That was really useful and was a good idea, but now while working on the railway safety improvements has put a boulder and flax to block access without a valid reason.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Too much money will be spent on installation and maintenance involving more staff, more wages, more vehicles. Water meter of poor quality give poor results. There should be more public awareness like Cambridge to save water.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

We need to get our priorities right. To fix leaking and old pipes and sort out Waitara's stormwater issues first.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Sort out infrastructure first like leaking pipes and old bridges. Also proposed venue not a good idea as there will be major traffic congestion.

---

### **What else?**

Sort out infrastructure first. Compulsory fitting of water tanks and small pumps to all new builds. Should be building more dams and reservoirs. Large rate increase and water meters affect low income facilities and people on fixed income. This is not fair.

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### **Comments**

With building a multi sport hub it will let more people have a go. I play intermediate grade hockey and with all the teams entered in our grade there is not enough time to let everyone play a full hockey turf match. So if the council decides to build this sport hub, there will be more space to let everyone play a full turf match.

Office Use Only: 431-A

**Submission No: 3547**

**Gaik Poe Nicholls**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

### *Comments*

Too much money will be spent on installation and maintenance involving more staff, more wages, more vehicles. Water meter of poor quality gives poor results. There should be more public awareness like Cambridge to save water.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

### *Comments*

We need to get our priorities right. To fix leaking and old pipes and to sort out Waitara's stormwater issues first.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 1: Do not develop a multi-sport hub.

### ***Comments***

Sort out infrastructure first like leaking pipes and old bridges. Also, proposed venue not a good idea as there will be major traffic congestion.

---

### **What else?**

Sort out infrastructure first. Compulsory fitting of water tanks and small pumps to all new builds. Should be building more dams and reservoirs. Large rate increase and water meters affect low income families and people on fixed income and this is not fair.

# NPDC's Draft 10 Year Plan

Office Use Only: 432-A

**Submission No: 3548**

**Rimu Taiapa**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

I don't want too much debt.

---

## Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

#### **Comments**

We could have underground tanks at houses.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

Because it's peoples houses and lives.

---

## Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

#### **Comments**

Because it would also give jobs to do that work.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

#### **Comments**

And got to remember all the money for different things as well.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

### ***Comments***

Good idea because you can go to lots of places in one day.

---

### **What else?**

I love the zoo upgrade. I want more te reo speaking and signs, more connection with Maori decisions and more Maori in government.

# NPDC's Draft 10 Year Plan

Office Use Only: 433-A

**Submission No: 3549**

**Kathy Farley**

Wish to speak to the Council: No

---

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

### *Comments*

I believe all new builds should have grey water facilities and garden watering. It is crazy to see people washing cars with water that has been chlorinated and cleaned.

---

## Improving stormwater management in Waitara

---

### Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

### *Comments*

Get onto the Pukeiti to Oakura cycle trail. So many people are now taking cycling holidays and looking for trails - great for accommodation also.

---

### Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

### *Comments*

Get cars off the roads by getting trains back into New Plymouth. Move freight for more by trains.

---

## Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

### *Comments*

We already have a need for our teenagers. Waiting 6 years will see them leaving New Plymouth. We need it now - so much money spent on Yarrow's for professional rugby and has about 4 games a year - so wrong.

---

### What else?

I continue to be disappointed that there is never mention of getting passenger rail going to and from New Plymouth. In the 1960's, with the population less than half what it is now, we had a rail service. With the need to reduce the number of cars and trucks on the roads, we have a viable rail line unused for passengers. With many people now choosing cycling as part of their holidays, we could be part of a circuitous route - taking people from Auckland, stopping Te Kuiti for Timber Trail ride, on to Taumarunui for Ohakune riding, onto Wellington then back via Taranaki for the new Pukeiti to Oakura ride and Round the Mountain. Also parents could have safe travel for students studying outside New Plymouth by having them travel safely by rail. Taranaki/New Plymouth really needs to push for this - other countries have rail that travels the full length of their countries.

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Water supply is a core business for any council. Spend money on this rather than for the "nice to haves" or entertainment and parties and festivals.

---

## Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

#### **Comments**

This problem needs to be sorted out sooner rather than later. Better to spend the money now and get it done rather than spending on tracks and trails which is non essential and can wait.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

#### **Comments**

Another "Nice to Have!" \$36 million or \$60 million! Both are outrageous amounts. Spend \$20 million on the stormwater problem in Waitara instead. Get outdoor pursuits companies to fund all this track and trail network in exchange for naming rights.

---

## Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

---

## **Developing a multi-sport hub**

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

### **What else?**

People on fixed incomes (like us) can't keep coping with large increases in our rates every year. Council core business (and spending) should focus on water, sewerage, drainage, local parks, libraries, footpaths, lighting of our streets and keeping our streets clean and rubbish removal. As well as doing all these things cost efficiently! Sending our rubbish to Eltham or further is ludicrous. There needs to be a better long term solution for the rubbish problem. Also spending on the "nice to haves" needs to be curtailed.

# NPDC's Draft 10 Year Plan

## Fixing our plumbing

### How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

---

## Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

---

## What else?

Core services are a priority as they have been so neglected for many years. We cannot keep spending money on councils personal 'wants'. Roads, streets, footpaths and water are a necessity. Many past decisions have been a total spending spree. Remember whose money you are spending. Think wisely.

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

### How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

#### **Comments**

Because you have done nothing over successive years.

---

## Saving water and water meters

#### **Comments**

None of the above. No water meters. Use the \$\$ to fix the pipes. We live in one of the wettest regions in New Zealand do your job properly and fix the pipes and get better water storage.

---

## Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

---

## Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

---

## Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

#### **Comments**

At last - it's great to see our council making a commitment to take climate change seriously.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

#### **Comments**

There are more pressing needs in our community.

---

## What else?

While successive councils have concentrated on high end arty farty projects you have completely ignore core infrastructure ie sewerage etc and now you expect us to pay for your mistakes and lack of forward planning. You pay lip service to acting like we are consulted but you have already made up your minds. Think of the average ratepayer struggling and we are!!!

### *Comments*

As tangata whenua, gathering of mataitai (sea food) been halted, bathing, basically use of the river and beach front. This needs immediate action. The sewerage is 1st priority in Urenui.

---

## Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

---

## Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

### *Comments*

I'm in support the above being actioned.

---

## Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

---

## Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

---

## Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

---

## What else?

I would support a replacement bridge to access Urenui (town village) and beach. This a priority for our community.

# **NPDC's Draft 10 Year Plan**

Office Use Only: 443-A

**Submission No: 3557**

**Lance Girling-Butcher**

Organisation: Positive Ageing NP

Wish to speak to the Council: No

---

[www.positiveageingtrust.org.nz](http://www.positiveageingtrust.org.nz)

**This document prepared for New Plymouth Positive Aging has been written by Lance Girling-Butcher and covers a range of different issues.**

#### **General:**

We have to express our sincere thanks to the council for all the support it and its community partnership team led by Callum Williamson providers during the year. Free use of committee rooms for trust meetings and public forums makes a lot of difference to our operating costs and enables us to draw a lot of people into our educational programs.

the partnerships team has also played an important role in assisting us with the development of an Age friendly strategy and in getting its action plan under way we also delighted to be involved in development of the council's access strategy and in being invited to make submissions on a wide range of Council activities. We have to praise the ongoing use of the Age Access Issues working party that is the envy of other areas. It has provided sound advice for a number of years and assisted in making the city one of the most accessible.

#### **Rates Increases**

As an organisation representing many older people on fixed incomes I first have to remind the council that any rates increase will hurt these people in their budgeting and ability to survive so close to the breadline. A rates increase of about 12% without careful consideration and that mini are essential to the continued operation of public services in the district. All I can recommend is that the council continues the battle with central government for better ways of funding capital works and finding the operational costs to keep the district running current funding rates rebates are a good way to assist those on low incomes meet these increases and the council has done well to promote and assist with these over the years but there is room for improvement. A large percentage of people still do not seem to be using this

#### **Water conservation:**

The need to conserve water and improve the underground reticulation system that has served us so well for so many years is obviously a large part of this long term plan's budget. We have to support this move and its implications for ratepayers but note that the Governments three waters scheme could reverse the strain on the rates, and in fact reward the Council for all it has done to keep things up to date.

With drinking water usage so far above the national average we are obviously wasting a lot of this treated water and if the introduction of water meters helps to reduce this and put the power to control the expenditure on this in the user's hands, that can only benefit many of the people we represent. We do however suggest that an initiative introduced after the coronavirus lockdown to reactivate the economy by using interest free loans and provide work for trades people. This included a number of items like trapping solar energy, improved heating and also saving rainwater for use irrigating gardens. At the moment we suspect that a lot of the water treatment for human consumption is being used goes to irrigation and car and house washing and suggest encouraging people to save rainwater could be a very useful. This adds to the ability of people to maintain new Plymouth as a garden district that takes pride in the way the council and the community look after the districts vegetation and to enhance the clean green beautiful reputation.

Rain water collection storage facilities do not need to be complicated or expensive and perhaps the council could encourage the process by coming up with some basic simple designs and assistance in finding necessary materials and pumps.

### **Rubbish collection**

While we can only admire the cities attempt to increase recycling and reduce the amount of rubbish going to landfill we do have concerns about the number of bins and the negligent way they are left cluttering footpaths blocking passage for the disabled, prams, and those on mobility scooters. I should point out that Positive Ageing has tried to help here by staging a free public forum which people can learn more about the ins and outs of the refuse disposal system.

### **Electric vehicles**

I see the council is planning to spend \$1 million on buying electric vehicles to replace those in need of replacement. This is a very fashionable move and one that will obviously help the environment. I do wonder whether this option is the best and how much research has gone into modern developments in diesel fuel. The use of biodiesel is becoming another viable option because of its low emission values. I don't think this idea should be dropped but I just wonder whether we should investigate further the alternatives available. Electrical vehicles are still very expensive to buy, there are problems disposing of used batteries and too drastic change in the use of diesel vehicles could cause severe problems with the resale value in the modern diesel car for example has become a far more efficient vehicle than a few years ago.

### **Increase charges**

Obviously increased charges are another way for the council to grow its revenue. We understand the need to lift charges at places like the swimming pool there are downsides to this as well. With a reduction in the number of school pools, access to the public facility is essential, if we wish to teach our youngsters how to swim. They also play an important role for disabled and older people in staying fit and reducing weight. It would be sad if increased charges reduced accessibility for these users.

### **Transport**

It is long past time that we had a look at our bus terminal. With a magnificent terminal at the airport contrasting with the inadequacies of the existing bus terminal in Ariki Street only highlighting another blow to equality. It leaves the impression that the rich and those who can afford to fly deserve better than the lower income earners who use buses. The existing half-baked facility creates a disgraceful message for people arriving and departing. What an awful welcome to our beautiful city. It is also even more of a disgrace considering the wonderful facilities we once had. At an excellent terminal at the old rail station or even across the road from the clock tower. it's incredibly disappointing. Both intercity and local bus passengers deserve better. It is also long past time that we have sorted out the bus links to Bell Block and Waitara for people who cannot drive. I have huge problems getting into the city and it's a long time past that we put some of those cars with single commuting occupants off the road. They dominate traffic early in the morning and later in the day.

### **Our Green Plans**

More tree planting and walkway extensions sound wonderful and will obviously meet with much public approval, but we still have to ask whether we can afford them in the face of the steep rates increase. One advantage is they do have an impact on tourism and making the city more beautiful and viable.

## **Summary**

In the end to issues of greatest importance to Positive Ageing at the Age friendly Strategy and the Age and Access Strategy.

Some 60% of people over 65 suffer some form of disability and both of these strategies are vital to deal with the growing number of problems that have developed with growing number of people in this age bracket. Council has budgeted money and we would like to ensure that that stays in the budget and we get the full benefits. Positive Aging has raised considerable sums and spent a lot of time on the Age-friendly Strategy and the council budgeted funds covers only the work that the council needs to do to improve its facilities.

We will continue to work with other organisations in the greater interests of New Plymouth.

Nga mihi nui...

## **Submission on New Plymouth Long Term Plan 2021 – 2031**

Thank you for giving us the opportunity to make a submission on the Draft New Plymouth District Council Long Term Plan

Te Rūnanga o Ngāti Mutunga is the post settlement entity that represents the Ngāti Mutunga iwi who's rohe is in North Taranaki from the Papatiki Stream – inland to the Waitara River and the Taramoukou forest and in the south to the Waiau Stream.

### **Key Points of Submission:**

#### **LOOKING AFTER OUR ASSETS – FIXING THE PLUMBING**

We welcome the NPDC priority of putting money into our existing infrastructure such as wastewater, storm water and supply of drinking water.

While below we have singled out the items that most effect Ngāti Mutunga and our whānau we support all the spending in this area that will ensure that our infrastructure throughout the District is improved and made more resilient.

We also support it being a priority area of spending for the NPDC over some of the other items included in the Long Term Plan – it is important that as a community we concentrate on the things we need to have rather than the things that would be nice to have.

#### **Urenui and Onaero Sewage Systems**

This is obviously an issue that is extremely important to all Ngāti Mutunga uri as it is about the effects on the wairua and mauri of our tupuna awa due to contamination by sewage.

Ngāti Mutunga take our Kaitiakitanga and manaakitanga responsibilities seriously which is what led us to make the very difficult decision to place a rāhui over the Urenui river last December. It was very important to us that everyone had clear information about what the risks were to their health – both cultural and physical – if they used the Urenui River.

We have worked hard alongside the Urenui and Onaero Communities and schools to bring this issue to the attention of the NPDC, TRC and District Health Board and to make sure we had robust western science proof to back up what we and the community had been saying for the past 50 years. This meant that action had to be taken.

We are very pleased that concrete action is now being taken that means that our awa and beaches at Urenui and Onaero become safe again for Ngāti Mutunga whānau, our community and manuhiri to swim, fish and eat from.

TRONM would like to sincerely thank the NPDC councilors and staff for including money to solve this long standing community problem in your long term plan.

We may still have differences about the timing and are expecting some robust debate about the siting and design etc. but these are details that can be worked out now that this funding has been secured.

The cultural, health, community wellbeing and economic benefits of preventing further contamination of these taonga areas is hard to quantify for our community.

We would like to thank the Urenui and Onaero Community, local Schools, Curious Minds, Emily and Thomas from TRC, Ian Ruru from Mauri Compass for helping us bring this issue to everyone's attention.

### **Water mains in Urenui**

We note that these are scheduled to start at the end of this year or the beginning of next year. This is important to our community due to the loss of service that occurs regularly when the pipes in Whakapaki street in particular fail. This is a problem here as it wastes valuable drinking water and also floods areas that contain the dispersal fields for septic tanks thus adding to the dangers of contamination in our estuary

### **Waitara Storm water improvements**

TRONM support the expenditure on this in Waitara in order to prevent the spillages of wastewater into coastal waters off Waitara that have a direct effect on the health and mauri of the mahinga kai the Ngāti Mutunga rohe.

### **Water meters**

TRONM welcome the introduction of water meters as an important part of the NPDC water conservation strategy. Water meters are important for identifying leaks (both NPDC and households) and making people aware of the water they are using. We do not think this will penalize older members of our whānau and community as they are already very good at conserving water and take the restrictions placed on them in summer by the NPDC very seriously.

We think some method of support for larger families on low incomes should be included in the scheme

## OTHER ISSUES:

### Urenui Swing Bridge

TRONM support the inclusion of funding for a new swing bridge at Urenui in the Long Term Plan. The swing bridge is an important much loved and used community asset. We would like to stress to the NPDC the importance that Urenui residents and visitors place on the swing bridge. It is also currently the vehicle that allows Wi-Fi and water to get to the Campground from the township.

### Fees and Charges

**Cemetery charges** – Should be kept at current level

**Charges for swimming pools** – Swimming is a key way many of our community and whānau have of starting back into exercise and improving and maintaining fitness. In particular the Waitara Swimming Pool has had a long history of supporting our community to learn to swim which is more and more important when fewer schools have pools and providing an atmosphere that encourages people to get moving and improve their fitness levels.

We think for this reason that the fees at the pools should remain at their current levels even if this is a cost to NPDC due the wider health and community benefits the pools provide.

### Zero Waste

Te Rūnanga o Ngāti Mutunga strongly support the creation of a well-run local organic recycling facility in the New Plymouth District (or in wider Taranaki if run with other Council's)

We strongly support composting as one of the ways we can work towards Zero Waste for our district. We think that if this facility is:

- Sited in a suitable place i.e. taking into consideration suitable soil type, rainfall patterns and closeness to water ways
- Uses current best practice methods that minimize leachate runoff and use best practice composting methods – i.e. pile size and shape, turning times, materials used
- Has limits placed on volume and types of materials entering the site
- The site has a robust stormwater plan
- The environmental effects of the site are monitored using both western science and mātauranga Māori, and Consent conditions ensure that the negative impacts on the environment are well known and avoided.

**We wish to speak to this submission in person.**

Ngā mihi
