NPDC's Draft 10 Year Plan

Office Use Only: 1086-A

Submission No: 4304

Rowena Wood

Organisation: Self Employed

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

No major concerns although there is a growing sense that the NPDC will elevate this issue in order to justify 'water meters' - we will be closely keeping an eye on the water situation.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Absolutely NO water meters. You do not control water. It is God given, back off our water.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We the people do not consent to AGENDA 21. Please stop with the EV agenda. If you were truly green you would never tolerate 1080.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Absolutely no electric car fleet. It is environmentally irresponsible. Please do your research before suggesting such a ridiculous option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

How can you even ask that when we have human beings living in tents + cars. I am embarrassed by this as an option.

What else?

Please remember that you work for 'We the People'. Your covert adherence to the implementation of the EV's Agenda 21/30 is very apparent. We the people will call it. We say no to rate increases, no to water meters. Please be honest about the "Green Screen". Stop washing over the real plans to break business and implement smart cities. We have educated ourselves. Your information about our water and using electric cars is all very shoddy and highly questionable. I am happy to provide evidence that your theories are flawed and incorrect.

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We get out and actively use a lot of the awesome tracks and parks and love them, on a frequent basis - every week or two - but we barely use a small portion as there is already so many. We don't need more.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

We don't need more trees, however would like the rollout of E vehicles.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I've been a professional sportsperson, and grew up playing most sports in NP, rugby, B-ball, cricket etc. Build some more netball courts in the racecourse, and continue to use the existing mix of indoor facilities, eg high school B.Ball courts etc, maybe build a very basic + 2 or + 4 indoor courts that users pay for as sport is not about the best facilities, rather running fun events/competition, that promote: friendship, fun, fitness and getting out of the house and away from work, we don't need to increase everyone's rate this much for a very small % of rate paying population. If they want more indoor facilities, co-fund a private, cost effective indoor 2 or 4 courts that those users pay for. Tell the hockey players to play on grass like they used to, they will still have fun. Families can't keep having rates go up this much.

What else?

In general we need to upgrade water infrastructure, however the 2nd and 3rd Big Calls, greening future + sports hub is far too big a burden to place on all rate payers, rich and poor, when only a very small % of population will use these, and our facilities in this area are already good and under utilised. Keep Brooklands Zoo the same, is perfect for young kids and if we want to see more animals or facilities, we go to Pouakai Zoo!! (where we are happy to pay). They are both awesome - no kiosk please.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Let's share this amongst those now and in the future.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Educate the community and supply water storage containers for residents to use and rain run-off facilities - to ensure water is "harnessed" - no need for a "drought" in Taranaki.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Comments

Once all other major impacting issues are solved this should be on the table. Buyer beware.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Let's get access to our province available to more people. Trails/tracks don't need to be finished to perfection - gravel trails are fine. Let's make it happen! Good for wellbeing, good for tourism.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Do you need all the cars? Could they be replaced with E-bikes? Let's make our city leaders in reducing our cars. NPDC need to lead the way.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Let's Go! We know our community will benefit from the one place. Parenting support/family connection space should also be an imperative space involved in this hub, and could easily be ready to go NOW! Flourishtarnaki.org!

What else?

Please can you consider supporting the development of a parenting education and support space. WE have about 1500 births in Taranaki EVERY year and the majority of our population is under 9 years old (Census 2018). It is URGENT that we focus on our whanau wellbeing NOW - not waiting until the problems occur and then rushing in to help. Service providers for family wellbeing need to work together to reduce fragmentation, duplication and the ultimate isolation and our whanau need ONE place to go to access support, connection, education and place to PLAY together. We are ready to help make this vision a reality. We have had two years working on this, a feasibility study completed, venues scoped etc. Flourish Parenting Hub can help to begin feasibility for the S.Hub, by testing the space as a community venue for all to go to. Let's work together, with TSBCT, sponsors + philanthropists. Thanks for your time.

Submission No: 4342

Pat Bodger

Organisation: Manukorihi Hapu

Wish to speak to the Council: Yes

Manukorihi Hapu strongly advocate greater priority be given to the Te Kohia Development. It is important that the project be continued and maintain the momentum that has been achieved by the working party to date under Kelvin Day. Additionally our history needs to be promulgated not only locally but throughout Aotearoa if not Te Ao.

No Reira

Heoi ano

Patsy Bodger

Chairperson

Manukorihi Hapu

Refer to next page for further submission

Tēnā koutou kātoa,

Please accept this submission that was written by Dr. Anna-Marie White and presented by Patsy Bodger on behalf of Manukorihi Hapū to those who attended the NPDC Long Term Plan Consultation held at Owae Marae on the 25th March 2021.

Manukorihi Hapū has a representative on the Te Kohia pā development Working Party and strongly advocate for greater priority to be given to the Te Kohia pā development in the New Plymouth District Council's Long-Term Plan.

Since the purchase of this site by then-Mayor, Andrew Judd in 2016, hapū representatives have worked with Kelvin Day, Principal Advisor—Strategic Projects, New Plymouth District Council, to consider how our history may be told to a broad interested public.

The project was slow to start and involved archaeological assessments and surveys of the site.

In the last 24 months, however, hapū have begun to form a clearer idea and intention for the centre proposed for the site.

Most importantly, the Te Kohia pā development has emerged in our minds as a project where our thoughts and ambitions may be publicly documented—visions that have been inspired by our participation in a range of other events and investments in the development of Taranaki Maori in a post-Treaty Settlement climate.

This includes the staging of the national New Zealand Wars Commemoration Programme, Putake o te Riri —te ra Maumahara at Owae marae in 2019 saw us revisit the first shots fired at Te Kohia pā.

The current exhibition, Tai Moana Tai Tangata by Brett Graham at the Govett Brewster Art Gallery has provided us with different ways of thinking about memorials and commemorative traditions.

Most recently the local commemoration event, Te Riri me Te Raukura, facilitated by Hoani Eriwata, featured Brett Graham, Ruakere Hond and Rawiri Doorbar as guest speakers and included workshops, which provided further inspiration for the Kohia pā development.

In the proposed LongTerm Plan, however, investment in the Te Kohia pā development is delayed to years 9/10 (2030-2031).

This proposal is entirely out of step with the local momentum for this project at a hapū level and the national conversation lead by the consciousness-raising exercise of Putake o te Riri, and the Prime Minister's determination to teach New Zealand history within our schools, to which the Kohia pā development has always expected to make a valuable contribution.

In conclusion, I want to stress that the purchase and development of Te Kohia pā was a council-led initiative to which hapū and iwi have become involved as partners, with external funding for projects of this kind currently available at central government level.

We have now begun to resolve our own vision for this project and for this reason strongly advocate for this project to have higher priority in the New Plymouth District councils long term plan.

No reira, tēnā koutou kātoa.

Patsy Bodger
Chairperson
Manukorihi Hapū

NPDC's Draft 10 Year Plan

Office Use Only: 1130-A

Submission No: 4348

AR Young

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Asbestos pipe is frail when getting old, must all be. Renewed in end. What is the life cycle of asbestos.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We are paying over and above for water rates now so will make no difference to install meters.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

Sheet piling should be installed to inbend on Waitara River to stop scouring.

Extending our tracks and trails network

Comments

Make a walking track all the way from Whitecliffs to Tongaporutu River.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Waste of money buying electric cars, plant more trees.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

There are other sports other than chasing a ball. Money should be allocated to Stratford speedway.

What else?

The Council and Government Te Ati Awa Manukorihi Otaraua have held lease holders through an emotional period of time. As far back as Mr Toohill CCC promising to freehold the land in Waitara. Right up to Te Ati Awa wanting the land back then making a decision not to buy the lease holders have been a loyal person to the Council and to all people of Waitara. As money that has been acquired. Has been in stopping the town of Waitara from catastrophic damage from flooding - also new subdivisions and many developments at New Plymouth City. We the lease holders in exchange would like the NPDC to look very closely as to what they have achieved through stolen land and also what emotional stress they have caused to their people. Creating severe anxiety depression and death. It would be of great importance from the NPDC to allow the lease holders of Waitara the right to lease to freehold at a price that was offered to Te Ati Awa and show empathy not only to Te Ati Awa Manukorihi Otaraua but also to the people who have been loyal to the town of Waitara in working hard to achieve a better town for all.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

No water meters.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Fix some of the footpath.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Put indoor sports hub on the overflow parking.

Age and Accessibility Working Party LTP Submission

The following items are endorsed by the Age and Accessibility Working Party through a submission to the LTP 2021-2021.

Item	Reason	Draft LTP Reference
<p>"Changing Places" Accessible Toilets (PB3009)</p>	<p>The AAWP endorse the proposal for "Changing Places" Changing Places facilities are specifically designed for a range of individuals who live with significant health problems and profound or multiple disabilities, and their families. The purpose of the facility is to provide a safe and secure place for people to change, toilet and clean up with the support of specialist equipment including a lifter, shower, adult sized change table, height adjustable toilet with hand rails/rests and a large enough space to manoeuvre. Having this facility will mean members of our community will not feel limited in their access to the community and will also provide a facility for people who visit from out of town, making our district a more desirable place to holiday for these people and their families.</p>	<p>The Accessible Toilets – Accessibility Strategy (PB3009) is planned for Years 4-6 of the LTP.</p>
<p>Neutral gender changing rooms.</p>	<p>The AAWP support the planned Okato Pool Accessibility Upgrade planned for Year 3 of the LTP. Parents of children with a disability have found that it becomes difficult for their children, particular as they enter their teen years, to have parental assistance in the change rooms where they are single sex change rooms, ie a mother assisting her son in either the male or female change rooms. The AAWP seek consideration of a neutral accessible change room be provided at Waitara Aquatic Centre and included at all district pools in the future.</p>	<p>The Okato Pool Accessibility upgrade (AQ3002) is planned for Year 3.</p>

Item	Reason	Draft LTP Reference
Footpaths in residential areas	<p>Grass berms are not accessible for wheelchairs and prams. Footpaths need to be considered in areas where there are none available on either side of the road in residential areas.</p> <p>The AAWP note that there is a subsidized footpath maintenance budget and would like assurance that new footpaths will be considered on residential roads on at least one side, throughout the district.</p>	125 Footpath Maintenance – NZTA subsidized (RD1011) is planned for Years 1-10 in the LTP.
Pool hoist for Aquatic Centre	<p>Since the decommissioning of the CCS Disability Pool, there is currently no swimming that has a hoist for use by those in a wheelchair.</p> <p>Whilst a portable hoist is available in the region, it is not practical and not always available for disabled users at the Aquatic Centre.</p> <p>The AAWP would like consideration of a permanent hoist being put in place at the Aquatic Centre.</p>

Views of people here at ASCOT re rates spending and we have a few
Matters for discussion

- Cleaning of roadside gutters/drainage grates on a more regular basis to clear leaves and other rubbish to reduce risk of flooding properties and to make our streets safer for all people using them (I do of course always have our elderly folk and people with disabilities at the forefront of my mind) - following stormy weather (like the windy days we had last month) - same as above, get the footpaths clear of debris, I did notice outside some of our local schools piles of
- Leaves and sticks (some very large branches too, not all twigs) for many, many days - and blocked drainage grates. and yes I did clear some of the sticks to the side of the pathway when I was out walking but there was no way I could carry all that home to put in my green bin! I used to regularly see the gutters and drainage grates being cleared. It would be interesting to know how often the contractor is expected to travel along the streets to clear the debris and rubbish that the weather blows in.
- More regular mowing of grass in reserve areas. I have lived in Fitzroy for about 35 years Peringa park used to be well maintained but over the years I have noticed a decline in, regular mowing of lawns especially around the playground area. I pull weeds out of the playground surface as this is another area that appears to be rather neglected.
- **Other folk here at ASCOT have noticed the same lack of maintenance in their local parks/reserve areas.**
