NPDC's Draft 10 Year Plan

Office Use Only: 6107

Submission No: 2401

Sophia Bolyn

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It is appalling that mayors, councillors and financial managers present and past didn't have a longterm strategic plan in place to look after the infra structure in New Plymouth. Waterpipes, sewage should have been upgraded as a yearly task . this is negligence on the council's part and ratepayers now have to fork out the money to right this.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Water meters is an option to teach people to be careful with water use. As a rural person , with a water tank, we know how to conserve water.

Improving stormwater management in Waitara

Comments

Is council refusing new house builds in these areas? We all know that low lying areas will be increasingly affected by flooding. Relocating might be better then investing money in a problem that will get worse.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Status quo for now. maintain what we have. This is no time to start new projects. Leave it for times when there will be no economic recession and high unemployment due to covid and the stop of the oil and gas industries.

Boosting our Climate Action Framework

Comments

Council does not need electric cars when you have filthy diesel buses going around the place. The public transport fleet should be sorted. Big empty buses during the day can be replaced by smaller vans. Make the schoolbuses electric. And by all means plant more trees, make sure there are paths so people can walk there.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

What else?

It is difficult to understand how councillors can be so free with rate payers money. These are times when young people cannot save enough to own their home and low income earners cannot afford the rental increases. No wage increases but rates increases???? In hard times we tighten our belts , in good times we can invest.

NPDC's Draft 10 Year Plan

Office Use Only: 6108

Submission No: 2402

Sarah Tullett

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

We need to have more emphasis on arts and creativity. The council needs to fund a regional arts development agency. People come here for the govett brewster art gallery and other art needs to be fostered and supported as well.

NPDC's Draft 10 Year Plan

Office Use Only: 6111

Submission No: 2403

Kim Sweeney

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We are already paying such high taxes, give your customers a break, stop undertaking unnecessary works, get back to your core jobs....the taxes are out of control...give productive NZ a break

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara is a large take for NPDC how about spending some on us for a change

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I am disabled, why do we all have to contribute when we can't even use them...not all are able bodied, not a core responsibility...we have plenty already

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Enough with all the cost breaking change, let things stabilise after covid and give the people a chance....too much taxation too many changes....bad government

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Everybody will not and some can't benefit from this.....we have plenty of SPORTS hubs, lets try and not spend on things we really don't need. People are struggling to pay for things now....concentrate on things people need - HOUSING for one

What else?

Our rates are too high and I consider you are not worth them

NPDC's Draft 10 Year Plan

Office Use Only: 6112

Submission No: 2404

Bryce Hannam

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 6113

Submission No: 2405

Gareth Ratcliffe

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

If council could provide interest free loans for property's to Acquire water storage tanks I think this may help

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

I believe there is a problem developing around New Plymouth with road routes and flow of traffic. Currently there are highways coming into New Plymouth but none going through. The small roads we have also have backlog of vehicles and very busy intersections especially during peak traffic. I imagine express highways similar to ones recently developed around Hamilton and the kapiti coast would be a game changer around our transport system, and I think this is a necessary investment for our fast growing region.

NPDC's Draft 10 Year Plan

Office Use Only: 6115

Submission No: 2406

Fenny de Ruiter

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Based on population numbers, the track to Waitara should have priority over a track to Oakura

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The current facilities can be used more efficiently.

What else?

Coastal erosion is a major issue, e.g. the erosion at Waitara where an old dumping ground is getting exposed. Please include sufficient funding in the plan to address this issue.

NPDC's Draft 10 Year Plan

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

NPDC's Draft 10 Year Plan

Office Use Only: 6124

Submission No: 2409

Elaine Sinton

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It's got to be done and I would think that costs will only likely increase if put off

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I strongly agree with water meters. As a rural resident I have a water meter and when the council advised the average use in the district I checked my use and was shocked because it was higher. So I made changes to how I ran taps etc, and now it is lower, thank goodness! This is likely how the majority of residents will behave once water meters are installed - no-one wants to be wasting our precious water!

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I believe that the residents of Waitara should be supported to the degree that New Plymouth residents are, and should enjoy the same standards of utilities that the residents of New Plymouth do.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

I strongly support anything that provides increased opportunities for people to exercise. I very strongly support the extension of the walkway to Waitara. People in New Plymouth will be able to cycle to Waitara, have lunch at one of the fab cafes and do the return trip. This is what happens in some of the South Island areas where there are extensive cycle ways between some of the smaller towns. An opportunity not to be missed!

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Excellent ideas. Communities will be behind the tree planting and costs may be able to be reduced by calling on community volunteer groups to help with planting. People like to know they are making a difference and tree planting always seems to fulfill that!

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I support the NPDC's recommendation on this. Through the media I am aware that our current sports venues are pushed to the limit, particularly around children's sport. So this obviously needs addressing.

What else?

Thanks for the opportunity to comment on the 10 year plan. As a walker, a cyclist and a ratepayer I am enthused about the plans that NPDC has for our district.

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Encourage water conservation and promote rainwater and grey water recycling

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

so long pricing is fully transparent cost recovery not a new revenue stream

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Need to consider Waitara design link for modes of future electric travel for commuting no just cycles and walking

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

consider planting diversity for promoting our gardening heritage not just natives

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

recommend a strategic agreement with all local councils on taranaki sporting assets as we run the risk of auckland with underutilised and over investment for competing assets also consider disposal of replaced venues. The location is very prone to weather so design consideration is required.

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Totally support the installation of water meters so residents take more care with water use, but why not also look to build more infrastructure to capture and store the water that our region produces? Maybe there is an opportunity to sell some of this captured water to other regions/countries in need.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

We have to develop a region that people want to come to and connect some of our most important tourist attractions (coast, rivers and mountain). I don't think extending the current Coastal walkway to Waitara will add any significant value but would rather see the money focussed on developing a trail from the coastal walkway to the mountain. Think about the accommodation, hospitality, environmental and adventure tourism that could be developed along the route.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

We are getting left behind other regions and need to invest in the creation of a new multi sport hub to ensure we can attract national and international events to our city and provide adequate sporting facilities for residents to maintain an active lifestyle and chase their sporting endeavours. The multi sport hub will also bring people back into the CBD, something that is going to be needed with the future development of the valley. Why not end the TRC lease and turn the whole area into a multi sport hub and world class green space for residents, and sell off the southern 1/4 of the area (where the stables etc are) for a housing subdivision to fund some of the development. Why not add an oval for international cricket, maybe this could be placed in front of the existing stand and members building so some of the existing infrastructure can be utilised.

What else?

Could more of the councils perpetual investment fund be accessed to speed up the start date on these projects (especially the sports hub) and reduce the impact on rate payers?

NPDC's Draft 10 Year Plan

Submission No: 2415

Erin McGlinchey

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

this proposal is needed asap. there is a significant lack of adequate sports facilities in New Plymouth. Lack of hockey turf and a big increase in the amount of people playing hockey especially kids is causing huge problems.

NPDC's Draft 10 Year Plan

Office Use Only: 6141

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

If the extra loading from population growth has been such a mitigating factor in the failure of our three waters surley new conections and resorce concents should be putting in the lions share. Should long term ratepayers be stretched at such a vunerable global finance event such as Covid? I know of a lot of families allready on the edge.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Install the meters to the street branches only would go along way to find your leaks if thats the true intention of using meters Our household is a low user of water but some of the most hard up families are the highest due to size. The only fair way would be charge after a fair use amount per permanent house dweller was surpassed. This would be a adminastrative nightmare. So is there a fair way that doesnt make the poorest houses pay for the richest?

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

If it is required FIX IT permanently. Invest in inferstructure before all the luxuries that are of no value when the core systems are failing the people

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The walks and parks are what makes this place so great. Yet at this time I think its time to pull in the belt and focus on the getting the water in and out. Without streching the rate payers to far who are allready streched due to financial down turn. Get real nows just not the time.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Should be an option 4: Plant the trees. Forget the electric vehicles as the technology is not quite there yet. The electric fleet would be more about looking good rather than doing good.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Needs to happen though I cringe when thinking of the stadium. Build it with longevity first in mind to give us true value

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I live in Bell Block & it is a regular occurrence that sewage spills into the Mangati stream & onwards to the pool at the beach. This is unacceptable as children & dogs play in that body of water. There are often signs informing us of raw sewage. So much for clean green NZ.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I personally believe water & sewage is more important at this time.

Boosting our Climate Action Framework

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 6145

Submission No: 2419

Paula Martin

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It is SHAMEFUL that sewage leaks/overflows into our streams and beaches so often. "100% Pure NZ"?

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

While we get a lot of rainfall in Taranaki, we have traditionally been very complacent and wasteful and with our growing population we cannot continue that way. The first step in becoming more responsible with use includes becoming aware of use, so water meters are a no brainer.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

What else?

Thank you for all the work you do. Really like that there are some strong plans for the future.

NPDC's Draft 10 Year Plan

Office Use Only: 6148

Submission No: 2420

Alison Brown

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I totally agree that the three waters are a priority and must be done. Plan should include budget that has continuous maintenance costs so that we don't have the same situation that we have at the sewage plant

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I agree with introducing water meters

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I agree with addressing the flooding problems in Waitara

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Do not agree with putting more money into the walkways or tracks in the early years of the plan, these are nice to have, that can be done when we have the facilities that are necessities for our current rate payers and their families, ie the multi sports stadium.

Boosting our Climate Action Framework

Comments

Agree with boosting our Climate Action Plan. What extra funding is planned for maintenance of the new Planting Plan or will we have more areas that are not well maintained with long grass and overgrown banks etc.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

I agree with the building of a multi sports hub , this is imperative for our city and should be one of the first projects to commence. We have many families who pay rates that have members who are missing out on their sports, who would appreciate using the complex instead of always paying forward on projects, or white elephants like Yarrow Stadium, that no one was held accountable for, or they will never get to use.

What else?

I am a ratepayer of NPDC and accept the rates increase as discussed at public meetings , but know that there are many families that will struggle with any increase. I also accept that water meters will need to be installed to help with water savings

NPDC's Draft 10 Year Plan

Submission No: 2423

Warwick Smith

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Seek out Government funding, given their priority to sort out water throughout New Zealand

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Ok to have watermeters, but phased to come in after 5 years, rather than an early priority. Do the most critical infrastructure upgrades first. Funding of the capital work should not be based on water savings, as we will need the infrastructure anyway.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Crates a better living space, but do within our means. Has to be affordable .

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

Build with quality in mind. The Rugby Stadium was built to a budget that ended up being insufficient and needs extensive rework. NPDC needs to build project management capability and not solely relying on contracted expertise. There are plenty of highly talented engineers and project managers in Taranaki, use them.

NPDC's Draft 10 Year Plan

Office Use Only: 6156

Submission No: 2424

M Lace

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Fixing the plumbing should be NPDC's NUMBER 1 PRIORITY. The issue has been neglected for far too long in favour of the arty farties who don't get it and prefer to spend the millions on crap. However NPDC's own document clearly highlights the critical importance of water for the sustainability of us all. It is to NPDC's shame that the plumbing system is in such a shocking state of repair. IT HAS BEEN NEGLECTED FOR TOO LONG AND ITS HIGH TIME IT WAS FIXED. It is a disgrace that in a province where our rainfall is one of the highest in the country, we regularly have a hose pipe ban. We should have water coming out our ears in this province. Forget spending the millions on all the arty farty crap that is here today and is out of date tomorrow. FIX THE PLUMBING!

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Charging residents for the water they use is fair provided that; - the charge is directly proportional to the volume used and that - the current fixed charge for water is removed from the rates bill. i.e. No double dipping from NPDC.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The district already has plenty of beautiful natural and man made trails and we have got enough to pay for with fixing the plumbing. Any further developments should be delayed until the priorities (Water and Roads) are sorted out. Any further developments require not only capital cost but ongoing maintenance costs which are ongoing BURDENS ON THE RATEPAYERS AND WE CAN'T AFFORD IT.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

We're already doing more than our fair share - we don't need to spend additional funds on this issue.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

We already have sufficient sporting facilities. You can't run any faster, throw any further etc just because you're in a flash new gizzillion-dollar venue.

What else?

In case you need reminding, the country is in recession and Taranaki is included. Thousands of locals are struggling financially due to lost business and unemployment. Now is a time to be prudent with the rates take, not to be spending up large. We can't afford it. PLEASE FOCUS ON THE ESSENTIALS AND DISREGARD THE NICE TO HAVES FOR A WHILE. ITS TIME TO RE-DRESS THE BALANCE. Fixing the plumbing and fixing flooded areas IS AN ESSENTIAL. All else is a trivial nice to have.

NPDC's Draft 10 Year Plan

Office Use Only: 6160

Submission No: 2425

Nick Cooper

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Why not subsidise small water tanks to capture roof water for residential properties. The water can be used in the garden and also as an emergency supply. It will also lessen the impact on stormwater systems

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Multi sport hub should also include other recreational / fitness activities. Take a look at the <https://www.mangawhaiactivityzone.co.nz/> One of the best facilities I've seen.

Submission No: 2432

Ritchie Will

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Improving stormwater management in Waitara

Option 1: Do nothing. No additional investment in Waitara stormwater.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Hamish Gunson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Find surplus land to sell off to help pay for infrastructure

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

If you introduce water meters you are going to kick up a hornets nest with the public... We have plenty of water it makes our region unique and to charge for it won't be popular. We need to build better storage lakes which would provide recreation areas and hydro power. Make our region one of the only places where you don't need water meters because of the way we manage our water they are not required.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Very keen for this work to happen but not if it is going to increase our rates by the amounts you are quoting

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Do the planting but save the 1 million spend on new cars

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Great idea but at the moment us rate payers cannot afford it Sell something to pay for it

What else?

Can you also come up with a long term plan for the neglected West Back beach, Spotswood, Port areas. Develop the Ivan Watkins Dowl site. Make sure they take all their toxic waste with them Get rid of the high voltage power poles sell the land they are on. Move the ugly scrap metal yard This area is the jewel in crown area in NP and we treat like a toxic waste dump. It should be the Diamond head of NP. Back beach is the most beautiful consistent surf beach in NZ it's deserves recognition

What else?

Egmont Rd/State Highway 3 Intersection - It's time to be heard! We want to see either 1. Traffic lights at the intersection or 2. An inter-connecting road between Egmont and Henwood This intersection is extremely dangerous and intimidating for the driver. I avoid this intersection whenever possible even if I have to take a another slower route. New Plymouth is growing and the roading isn't growing with it, we need to be looking forward and planning a four lane road to the other side of Waitara at least, with controlled intersections, either lights or roundabouts to move the traffic through safely.

Comments

Recently I have been aware of severe damage to a sewer pipes in the city at two friends [properties that became blocked due to the roots massive pohutukawa trees and the sewerage blocked the toilets which overflowed into their premises and carpets. It took sometime to repair and was very stressful for the owners. May I suggest that regular inspections of this sort of issue occurring take place. The trees in this instance should be removed as they are not going to become any smaller and this will be an ongoing issue. Peoples wellbeing and health should have precedence over trees of this magnitude in the city. These costs which escalate to serious and ongoing are totally unnecessary in todays day and age. All city planting by owners and council should always take into consideration long term growth and effects.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I do not understand how putting in water meters would reduce use of water from where it sits now. Example I own commercial property and I used to pay on my rates a set water fee of \$150 per year. This was taken away and meters were put in measuring the actual use of our tenants and the cost of implementing the paper work for this , sending out the notices and the quarterly costs we now pay for administration in this regard is way more than the actual water charges we now pay. To add to the story for just over two years the accounts have been incorrect and I have had to come into council to have them discussed and rectified at a cost of unnecessary travel and time for myself and the council staff. Common logic needs to be taken into consideration when these new changes are implemented costing way more than the original charges via the rating system. In admin alone. It was embarrassing for the administrators and not a good look for council and its rules.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Be wise in the decision processes around implementation of repairs in order of priority and seriousness.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

This proposal is interesting and needs serious debate right across the board and not with 'secret' committees put together without residents that are affected by the proposed walkways being included. Of note for us is the extension of the walkway from Bell Block to Waitara. I am well aware of what is being discussed and planned around our property after seeing drones and surveyors in our area during lockdown, asking questions and pursuing answers. What I have found out is beyond belief and the people of New Plymouth need to be made aware of the taking of farm land and the building of a new bridge over the Waiongana River plus all the other unnecessary costs that will occur if what I know goes ahead. I have resided at our home address for over 50 years and I can relay a story of neglect of our area and abuse from incessant litter, extra traffic, dust in excess from a paper road that once was at the very least graded regularly, but now not maintained in any way, shape or form. I fail to understand why a second bridge would be being discussed when a perfectly adequate bridge was installed several years ago to carry the sewerage and water for the Waitara community. Unfortunately after a recent bout of graffiti all I can see, sadly, is a marked increase of litter in our area. This extra expense to include a pa site which is 99% visible already from the road is beyond my understanding. At the very least these sort of actions should never be hidden from serious public debate and should have been 'out there' well before now. Threats of seizing private land for a walkway is not an open way to go about change.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

One only needs to travel around the city of New Plymouth to see how beautiful and heavily planted it is. I do not agree with the governments CAF which has come about as the Emergency put in place. For me there is NO emergency. Try manipulating the weather and see how successful you will be. CO2 is not toxic. Every human being breathes it out 24/7 and it is a very important part of our very existence. To run electric vehicles we have to produce a massive amount of CO2, which you believe is an issue, to produce rare earth materials that go into making electric systems, so what is the advantage? The resale of electric vehicles is in the bottom of the barrel so a very poor investment. There will be no change whatsoever to our environment as we are witnessing from all the predicted claims that not one of which has come true. We never hear the opposite side of the narrative with our present cancel culture.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I feel sad for the equestrian people but apart from that sounds like a positive for the city.

What else?

A small comment. When we become large we lose the openness and debate. I miss the smaller connected towns that were once self governed with their own mayors . Big is not always better. Honesty and healthy debate is always the best policy when it comes to the betterment of mankind. I wish we could vote for every councilor as I feel disenfranchised with our ward system as every council decision effects us wherever we reside in the city. I realise this statement has nothing to do with the ten year plan but thought I would pop it in.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

NPDC's Draft 10 Year Plan

Office Use Only: 6239

Submission No: 2451

Kelly Gordon-Stables

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

this needs to be done for a better quality of life in the region

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

should be left as it is otherwise it will hit people on low incomes

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

storm water systems are in serious need of an upgrade.the sooner the better

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

needs to be completed hopefully this year so people from waitara can enjoy the walk to new plymouth instead of putting their lives at risk on the highways

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

climate change is an important issue so planting trees is very important for the climate

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

would be a great asset to the province

What else?

the province needs to upgrade services if it wants to attract visitors and tourists to our beautiful province to make it number one in the country.

NPDC's Draft 10 Year Plan

Office Use Only: 6240

Submission No: 2452

Debbie Maltby

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

What else?

The road from Waitara to New Plymouth is such a danger, intersection of Egmont and Corbett Roads and Airport Roads urgently need attention before loss of life. The volume of traffic from Bell Block into town at peak hours shows the infrastructure is severely under resourced and needs fixing

NPDC's Draft 10 Year Plan

Organisation: Highlands Intermediate

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Kia Ora Sports Taranaki, My name is Charlotte, I am 12 years old and I attend Highlands Intermediate. I am writing a formal submission in response to the Multi-Sports Hub project. I myself play netball, hockey and basketball so this hub would be a great help to my teams being able to practice at a reasonable hour, and not to mention the impact on the rest of Under-13 hockey players! This hub could help us in a lot of ways, local sports teams wouldn't have to travel halfway across the country for a sports tournament, we could host many more of said tournaments, and as I touched on earlier, sports teams wouldn't have to stay up past 10pm on a school night because there were not enough courts to practice on and we didn't book them in time. My recommendation to Sports Taranaki is absolutely! I hope with our support we can have the hub built by 2026. Thank you for your time and consideration towards my say, Charlotte

Office Use Only: 6254

Submission No: 2455

Joan Coles

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

I would request a speedier response to concerns about water issues. More resources to follow up on concerns raised by local people.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Please see previous comment. Local people who live in an area and make observations are an appropriate source of information.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

This proposed multi-sport hub must be accessible to all in our community/ from low income areas, children and disabled.

What else?

The primary focus for the NPDC must be the sustainability of our water systems, particularly the education of the older generation who don't have access to update information.

NPDC's Draft 10 Year Plan

Office Use Only: 6255

Submission No: 2456

Lesley Lewis

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Should never have got to this stage thanks to previous councils not taking action

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Need to catch people using sprinklers etc when there are restrictions

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

The young adults, children of the city and districts want and badly need a sports hub sooner rather than later - sport gives children much needed physical activities helps keep them out of trouble

What else?

Do what's right for all citizens of the district

NPDC's Draft 10 Year Plan

Office Use Only: 6256

Submission No: 2457

Phil Wilson

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3: Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I feel a little uneasy with the introduction of water meters. Sure there are some that do waste a lot of water, and they may very well get caught out. But what also of the recycling we are expected to do. Have you seen how much water it actually takes to wash out a tin can, an plastic milk bottle, etc. Are people likely to be penalised in the future for trying to provide clean recycling or will they say stuff it and send more to the landfill.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I see a great many houses in Waitara that no longer have spouting around them or downpipes that are not feed to soak holes. Many years ago there was an inspector that came around checking, and that no longer seems to happen. Since the take over by the NPDC of the Waitara Borough Council, I feel there are areas like footpaths, curb and channeling that have been ignored. Then there is also the leaves that block the drains along streets like Bayly St from the pohutukawa trees creating surface water flooding or drains that are actually higher than where the water runs to.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

What I do not like in the wording with the Coastal Walkway is "from Bell Block to Waitara". Why not from Waitara to Bell Block. I use what walkway we have in Waitara weekly and also like today, the goat track that we have between West Beach and Battscombe Tce. Bell Block have a good section of walkway now with New Plymouth. Give Waitara some, but you will need to do some retaining of the coastline like you have done in Bell Block and New Plymouth, or there will be no where for a walkway let alone out little goat track. It does not need all the bells and whistles, but at the same time make it wide enough so that it is safe for all users and a seat every so often to rest at.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

I am not entirely comfortable with the concept of a multi-sport hub. I know I will gain nothing from it as I will not be a user. My family will gain nothing from it as they do not live in this area. As a pensioner why am I expected to pay into this. User pay system if you are going to satisfy all those singing out for it.

Saving water and water meters

Comments

low income shouldn't have to pay for their water use

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

fix it!

Extending our tracks and trails network

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

What else?

I oppose the rate rise and recommend to use the PIF (perpetual Investment fund) income to offset the rate increase.

NPDC's Draft 10 Year Plan

Office Use Only: 6262

Submission No: 2460

Don Betts

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Just that it is obvious that previous councils have gone for big ticket popular items to please the public instead of maintaining our infrastructure in a prudent manner. After all, this is the reason for councils and a rate collection.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

This is the best option. If you use water you pay for it. So much New Plymouth water is wasted as it is treated as a free commodity that can be frittered down the drain. This creates extra cost to supply and collect and treat the run off.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Comments

I have no preference on this as I think it is a matter for Waitara residents to discuss. As a New Plymouth resident I would expect all flooding matters should be attended to with better decisions made before ratepayers are able to build in flood prone areas.

Extending our tracks and trails network

Comments

Option 4. Hold the Coastal walkway as it is until some ruling is made to curb fast travelling cycles, especially e bikes, that have no respect for walkers. Originally the walkway was just that, a walkway, enjoyed by many. I now know of many older people who will not walk the Coastal Walkway because of cycles and even motorized bikes using the pavement expecting walkers to move aside. It will become a race to see who can ride to Waitara and return in the quickest time and could then become an annual event. Marvelous !!!!!

Boosting our Climate Action Framework

Comments

Option 4 More study should be done to compare hydrogen operated vehicles as an option. Electric cars are fine but where is all the extra electricity production going to come from? And what happens to all the worn-out batteries?

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I would expect the sporting codes that benefit from this expense to be actively raising funds themselves instead of expecting the ratepayers to supply everything for free. If it user pays for water the same should apply here.

What else?

As a resident of New Plymouth I find that I am being overtaxed in comparison to my footprint to the district. Our rates have increased by 131% in the last 10 years. It is all very well to say it is only a 4% here or a 5% there, but this is compounding on each of the previous years. The latest expected rate rise of 12% in the first year and 6% each year for 9 years equates to a 89.2% rate increase in 10 years and if added to the past 10 years compounding equates to a whopping 437% in 20 years. We cannot afford to live in New Plymouth.

Saving water and water meters

Comments

Water loss is from council mains in the street or on private property. Water loss from mains is often hard to detect as they can be deep in the road. The loss can be very substantial as the pipes are often big on arterial lines and often very old. For example, as we have seen on the news with Wellingtons water problems. Before council embark on the installation of water meters I would like all mains (particularly old ones) to be thoroughly tested and leaks repaired. Often leaky mains show as a leak from a valve cover in the street. I recently found one at the intersection of Stoke and Barrett streets and emailed council about it. Installation of water meters will reduce water use but probably only by a small amount. Meters may identify the odd leak but if there is a leak on the section wet patches will appear. A leak in a concrete floor of a house will soon appear as damp and wet patches on the floor and meters are not needed to identify these leaks. Swimming pools use a lot of water on residential properties. I would like meters installed on only properties that have pools and charge them for water used for the pools. The location of pools in the district can be identified from council maps.

Improving stormwater management in Waitara

Extending our tracks and trails network

Comments

Would also like to see more planting of trees on city streets - beautification - many streets lack ambience.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Very much needed for the community.

What else?

Thank you for all the great work you do. It is not an easy task trying to please everyone. A few little things I'd like you to look at. 1. A much bigger sign erected for the crematorium. It is a tricky place to access and the sign on the road facing it is very small. 2. More directional arrows on the walkway as noted on a number of overseas walkways. 3. More bike racks around the city Please. 4. Phone booth on Tukapa St by the dairy on the corner of David St to be relocated. Blocks vision coming out of David St.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

It is all very well to propose to provide for sports facilities etc but us older folk have a history of doing things ourselves. Why does this younger generation always expect to have it all just provided for them. They need to get up and do it for themselves and find comradeship of wkg tog building things side by side and over time. Then it is appreciated and taken care of. Spend the money on provision for emergencies etc. Not on sport. Any rate you'll never get it right by the time the hub is built there will probably be other sports needs. Things change, you can't catch up.

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

It has to be done. We don't want a "Wellington" situation.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I would be happy to see more storage tanks as well as the meters. New Plymouth has an abundance of ground water springs yet we are on water restriction for three months every year. I would prefer to forgo all the other initiatives to have our plumbing and water supply upgraded.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

It has to be done. With climate change floods are happening more and more often.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

We have so many wonderful tracks and trails already. As stated previously, I would prefer money spent on water storage.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Question: If we all have electric cars, what happens if there is a major power outage over several days?

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Not enough information about the need. What is the prognosis of Rugby Park? A lot of money is already being spent there.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Comments

Multi sport hub submission

Dear New Plymouth council

Hi my name is Ella Beck i'm at Highlands intermediate and i'm writing to you about the multi hub as a formal submission. I enjoy horse riding, swimming, netball, soccer and many more sports.

The reason I'm interested in this is for two things, one is that my concern is that we need to address that once you build the hub we will lose the privilege to use the racecourse. I know so many people that love riding there, now i know that we don't really use the racecourse but there's so many people that could potentially be top jockeys and go to the Melbourne cup! So much money has been put into their race horse's and I know you might not care and all but this could cause problems with the race committee and people of New Plymouth that love racing and of course the jockey that strive to get to the top and now they will spend a lot of money on petrol or diesel just to race, jockeys can be very dedicated to this sport and there horses.

The second reason is that this could be an amazing audition to new plymouth there could be so many people enrolling in sports. I would recommend the hub fully but i just don't know. If the hub is built it will change taranaki citizens lives and not just taranaki all around the country, but will especially change taranaki jockeys lives. The hub will be an amazing place to come and play and have fun, this project will change basically everything.

Just a suggestion maybe you could use the old stables as a new pony club and make an indoor arena by the hotel on the right so that we can use it for horse shows like dressage, showjumping, showing, hunter and many more, we could use the old cross country course two and make some bigger jumps.

I think the hub is a good idea but consider what will happen to the racecourse.

Thank You Ella

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

We know some of these things need up grading but going full steam ahead isn't the way to go at this stage there are a lot of people hurting out there at the moment with job losses and covid money is very tight. Put the burden of the increases where they lie some farmers and lifestyle people have there own systems we pay for our why should we pay for these increases.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

People who have there own water system should not have to pay this helps out the council so we should be rewarded for this by no increase.

Improving stormwater management in Waitara

Comments

Waitara should be paying for there own storm water management in there rates

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

What we have got at the moment is good maybe user pays people are hurting at the moment with money problems

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

May be this should have been looked at before you spent over \$3 million dollars on your building prioritis .

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

User pays again not everyone is into sports in a big way to warrant that.

What else?

As I have stated people are hurting with job losses and unpredictable with covid at the moment we need to take time .

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Investment needs to be made in three waters to enable the growth of the New Plymouth township for new subdivisions for new housing. The newly announced Government spend for regional councils to invest in infrastructure will fast track developments such as the Patterson Road development and help to waylay current housing stock shortage. This should be bought forward from the proposed 2027/2028 to 2021/2022. In enabling this there are significant benefits to the council, by way of increased rates and associated building and development contributions.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

We believe water metering is necessary to conserve our precious resources and eco systems

Improving stormwater management in Waitara

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Investment in our tracks and trails is good for the community and tourism

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option A: Pay for it from rates

Comments

Obviously the infrastructure of reticulation is No 1 priority, the cleanliness of the water source (so as to reduce need for excessive purification) and thirdly reducing consumption of. The latter definitely requires water meters but also the encouragement of adding water tanks to properties. As soon as we were without water for 4 days due to the treefall we bought and installed an external 2000 litre water tank. It was not a great cost but we know that it is always there when needed - I think the full charge of water meters should be the land/house owner cost (via rates levy) but those with water tanks could be given a discounted levy how evert small.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

see previous

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

and a small levy to the Waitara Community as other communities pay their share of upgrades eg Awakino water supply paid for in part by the rate payers of that community

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Although extending the walkway is an excellent idea all things created require maintenance and that is an additional cost that is not required at present. The current walkway is already an immense asset and widely acclaimed by visitors and locals but the infrastructure of water, sewage and drainage are far more important - we need to leave the future generations with renewed utilities infrastructure first and not add further debt on to them

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

Try to ensure we have a mix of natives and introduced species - we dont need to go down the Auckland's pathway of removing all exotics and planting natives and we need to ensure our large mature trees are not decapitated as happens in Jafa territory

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

There is no doubt our youth need exercise with the growing issues related to inactivity and the subsequent rise of obesity, diabetes etc so yes but there needs to be serious consideration given to traffic flows and parking issues that often are major issues at these venues

What else?

Good presentation and questions

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

The Multi sports hub plan and design is a poorly presented document. It has not taken into account the needs of the present activities and users of the area. Racing has been taking place there for many decades and the present facilities seem to be disregarded. On this plan many racing facilities have been ignored ie 1600m start gone, 1400m start gone, sand track for training purposes gone, Pony Club gone, no area for racing development. ie new stables The present system is working well with existing sporting activities in the centre. The racing people bend over back wards to work in with these groups. My father was on the Racing Club committee that signed the Perpetuity agreement with the Council about keeping racing at that location for ever and a day. I am sure he would turn in his grave if he knew Council was meddling with the agreement. The Multi Sports club should be built elsewhere (e.g. Bell Block) so they have plenty of room for buildings, sports grounds, parking and further development. Leave the outstanding green area so close to the city centre as it is. It is a heirloom. Don't destroy it by cramming a Multi Sports Hub there. The green space area is priceless and a development of a Multi Sports hub would be a blot on the land scape. Green areas are VERY precious. With this area so close to town it should be left as a green area and not developed.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Infrastructure such as this should be regarded as core council business. Debt fund as far as possible while interest rates are low

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

Reluctant to support water metres but if there is evidence of the savings touted to infrastructure then makes sense.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Core council business

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Do not support option 2 in its entirety. Coastal walkway a huge bonus for the city for residents and tourism but I would like to see sponsorship/partnership funding options explored. I do not believe the Taranaki traverse should be a council priority. Is there not regional/national funding for something like this?

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I am not averse to tree planting per se but would assume there is already a set budget for this? I wouldn't have thought we needed another 34ha of urban forest across the district? (Live magazine p26) I am not averse to an electric fleet for the council but believe there is benefit in waiting for national incentives which must come, plus opportunity for 2nd hand vehicles

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

At this point I believe this a nice to have, not a must have. I also find it alarming to read in Live magazine that there would be a \$11m per annum contribution required by way of running costs. This is huge over time and I would like closer scrutiny to the funding model before any steps are taken.

Kia ora, My name is Sienna and I am 12 years old.

I am writing a submission in response to the Multi-sport hub project.

The reason I am interested in this project is because this sports hub could have a great impact on New Plymouth!

Picture this: A central hub for New Plymouth local kids to use, which motivates people to get active and you can interact socially with people who have the same interests.

My recommendation to the New Plymouth District Council is that you should definitely go ahead and build the hub! I believe that this will benefit our whole community and my schoolmates because some of us have to stay up late to play our sport and it really tires us out for school.

Thank you for reading my opinion and I hope you move ahead and build the hub for our community, it benefits us all! I hope you have a wonderful day, and I am looking forward to 2026 if this goes ahead! Sienna

Comments

Kia ora My name is Santina snooks, I'm 12yrs old and I go to highlands intermediate school.

I am writing a formal submission in response to the proposed multi-sport hub. I like to play quite a few different sports and I think having a multi-sport hub will make a huge difference. I believe this will not only benefit me, but my peers and New Plymouth too.

Having the multi-sport hub means we could host tournaments which would bring in players, teams, supporters and family's, which is good for our tourism and brings in money. it would also help people have a positive view of New Plymouth and maybe even consider moving here. I know that a few families move to other regions because there aren't enough opportunities in sport for their children, but with a facility like the hub, there will be a lot more sports and things to get involved in, and it might even bring in new families as well.

As I mentioned at the start of my writing, I enjoy playing a few sports, and the multi-sports hub would be so beneficial. Like take the netball courts for instance, the waiwhakaiho netball courts aren't very safe because when it's wet or raining the courts can get very slippery and people tend to injure themselves. So I'm hoping that covers will be included with the new set of courts. Basketball is also a very popular sport, which I also like to play. There are a lot of tournaments during the year for basketball, but having some tournaments here would be great. It would mean a lot less travelling, and would be much cheaper. tournaments usually cost hundreds of dollars and did not the only one in my family to play sports. My older brother Hudson also plays basketball and when we both go away to the same tournament it can sometimes add up to 1k. With a big space like the multi-sport hub, we will have more room to practise and to play, it would even mean we have earlier games, because with more games going at a time, it will go quicker meaning I don't have to wait so long and have late games on school nights, making me very tired the next day.

Overall I think the multi-sports hub would be a great addition to New Plymouth, and I hope you value my input - Santina snooks

Submission No: 2485

John Oliver

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 2. Low. Start chipping away at the backlog so that it grows more slowly. \$78 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

NPDC's Draft 10 Year Plan

Submission No: 2486

Hunter Ramage

Organisation: Highlands Intermediate

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Steve MacBeth

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

The under investment and run down condition of the infrastructure is a result of poor management and failure of governance. It should not then be remedied by rates hikes and fees for water that would not be required had the governance and management been adequate. Borrow while rates are low and use the rates on core matters such as water and cut the excesses and unnecessary extras that we cannot afford.

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

Just another revenue gathering mechanism which if the assets and resources had been managed and given the priority as required, would not be contemplated. We have plenty of water and maintaining supply in existing suburbs is core business. Those costs should be covered in annual rates and not be the subject of further fees for mismanagement.

Improving stormwater management in Waitara

Comments

I do not have enough knowledge to prefer an option but low lying properties are a national issue. A national strategy through local government that complements sea level rise national policy I assume has been explored as that may reduce local government liability.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

I love the idea of extending the walkway but stick to core functions as ratepayers cant afford all these extras. It should be promoted as a community and city project and fund raising by the community and business with the support of the Council. Its business that benefits from tourism and the community who use and value it. Even funding it a kilometer at a time in this way and see if the community will take some ownership in the project. Stop spending money we don't have.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

I support 200,000 being invested pa in tree planting as its tangible and cost effective. I oppose electrifying the fleet at this time. We cant afford it so freeze spending on vehicles. Why the Council needs so many and new vehicles has always confounded me. Buying good second hand vehicles that aren't old makes sense and using them until there natural life ends. Most ratepayers dont buy new vehicles and it is a huge expense to replace fleets so wait. Electric vehicles will come down in price and central Government will in the future provide more incentives so think.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

What else?

Its time the Council looked at its entire structure and costs with a view to reducing administrative and overhead costs. We cant afford all the extras so stick to core and statutory functions that are essential and then assess what else can be supported. Why do the management get paid so much for public sector work. We shouldn't have public engagement and public relations staff whos job it is, is to provide spin or favourable publicity. As unlikely as it is, I suggest the council restructure with a goal to reduce administration and running costs as a financial necessity and that includes a reduction in salaries for the senior management who frankly are being overpaid. The Todd Energy Centre fees as an example are proposed to rise. No! Its a public asset and should be encouraged as a healthy option and family activity. It has a manager and a manager for the pool and gym. The staff dont get overpaid but its over managed and there is a way to save costs and avoid hiking fees.

NPDC's Draft 10 Year Plan

Office Use Only: 6303

Submission No: 2488

Ethan

Organisation: Highlands Intermediate

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Hello my name is Ethan and I go to Highlands Intermediate. I believe we need this hub built as fast as we can why? 1. A lot of sport like basketball takes up space and its very popular and normally peoples matches normally end very late and is extremely exhausted the next day and that with school is just not a good combination 2. This can be very good in many different ways, like getting more people into NP for sport instead of a lot of people leaving NP to different places where they highly support that sport or maybe professional players if we are lucky Those are the reasons why I support option 3 Thank you for taking your time to read this -Ethan

NPDC's Draft 10 Year Plan

Office Use Only: 6304

Gary Cleland

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Installation of water meters should be a priority , and commenced as soon as possible .

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Comments

I do not agree with the electrifying the NPDC vehicle fleet just for the sake of it , and only if was a cost saving compared to remaining with the status quo.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

Not a priority in front of expenditure better applied to addressing more urgent infrastructure needs.

NPDC's Draft 10 Year Plan

Office Use Only: 6306

Submission No: 2490

Hunter Ramge

Organisation: Highlands Intermediate

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Hello, my name is Hunter Ramage and I am a year 8 at Highlands intermediate. I think that making a multi sport hub in the middle of the racecourse is a very good idea. The reason for this decision is because there will be a better facility for top end athletes to practice, therefore better results. Secondly, more people will want to play sports such as basketball, netball, cricket, hockey and rugby Thank you for reading my submission.

Submission No: 2491

Jennie

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Consider extending leak detention and education Programmes from Option 4 into Option 3 The present Educational information distributed about Water Use, Metering and Leak Detection is shamefully inadequate, incomplete and missing significant opportunities for Community Conversations. Our Secondary School Students would cover these challenges so well given the chance.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

I am 82yrs old and live alone in a small unit. My water cost assessment is similar to my daughter's home of six active sporting parents and teenagers who have mountains of washing, a swimming pool, and Garden in an old, central area of town where old pipes often quietly leak. My needs are tiny by comparison.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Because land ownership has changed greatly in Waitara now is the time that stormwater management needs attention before more damage has occurred. Care to combine all entities involved in these remedial situations is needed so that frustrating repetition between Councils, Iwi, Community people is avoided.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Comments

Please take every endeavour to complete each project at least to a useable standard before beginning the next. Maunga to Moana will be great, it has already waited for too long.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million. NPDC's preferred option.

Comments

I clearly remember the often heated discussion during the selling of Powerco and the disastrous Tasmanian Farm Investment buying with the money generated. It was going to be the Golden Egg for our grandchildren to use. I think that time has come. Some could be used for this development. The Sports Hub will enhance Lifestyles for all ages in multitudes of ways. A central location with various activities for kids and schools will be a dream for them and their taxi driving parents. New Facilities to be enjoyed by all ages will be the treat that our lovely Lifestyled city can appreciate.

What else?

Please continue minimum charges for families and Learner swimmers at the Pools. Considerable changes in facilities and philosophy are needed to continue Brooklands Zoo.

Office Use Only: 6313

Submission No: 2493

Clive Saleman

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

The cost should be spread over the lifespan of the components

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

We do not have a shortage of water in our region. It is core Council business to supply it to ratepayers. Get on with doing so.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Put a targeted rate in place in Waitara to fund this.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

Extending the Coastal Walkway to Waitara is overkill and is not value for money. The Taranaki Traverse Mt to Sea is a better investment and merits investment. Seek government funding and grant moneys to assist with this development.

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

It is too early to spend on electric vehicles the technology is changing eg hydrogen fuel cells will be a better option than batteries when they become more widely available. Spending on battery powered electric vehicles is false economy and is not a good use of ratepayers money. We already have a huge amount of trees and farmers are planting riparian reserves but planting more trees is good so look for ways to do so without taxing the ratepayer. Continue working on the framework but wait for new technologies and observe actions of other cities/countries to see what is value for money and what is not.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Is there a business plan that shows cost-benefit of such a facility? What would be the ongoing costs of owning and operating it? There are endless things to spend ratepayers money on, core business which needs funding, like water infrastructure, this project is a luxury not a necessity.

What else?

The plan to increase rates by 12% the 6% year on year is simply insane. Council must focus on core business first and foremost, providing essential services to ratepayers at a reasonable cost. Endlessly adding luxury projects and wish list items then hiking up the rates year after year is not sustainable. Rates should be increased only in line with inflation, then Council spending should be budgeted to work within these means.

NPDC's Draft 10 Year Plan

Office Use Only: 6315

Submission No: 2494

Nicola Walsh

Organisation: Rate Payer

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

This project is essential to our District, funding can be found to contribute to this project if you as a Council focus on NEEDS and not WANTS. For example, tracks and multi sports hubs, which would be lovely but are not vital. For too long there has been a focus on the "Nice Picture in the Paper Projects" and now it is time to focus on vital and ageing infrastructure that benefits every household and every person but may not provide the sexiest of photo opportunities

Saving water and water meters

Option 1: Do nothing. Status quo costing \$42 million over 10 years for new water supply assets. No water meters.

Comments

I strongly oppose the introduction of water meters.

- The New Zealand Council of Christian Social Services identified there are around 682,500 people in poverty in this country or one in seven households, including around 220,00 children. This means that of the 30,954 New Plymouth households identified in the 2018 New Zealand Census there are about 4,422 people in our community experiencing hunger, reduced life expectancy, poor health outcomes, debt and unaffordable or bad housing. Is it then reasonable to add to these households hardship by adding the additional cost for the use of water.
- Groups more likely to be in poverty are: beneficiaries, children, and Maori and Pacific peoples, sole parents, more so than other groups. According to the 2018 New Zealand Census, around 57,249 people reside in the New Plymouth District and of those 15.9% were Maori and 2.4% Pacific people. As a Council representing the Community there is a duty of care to protect persons within our community, who are more prone than others. Especially those from groups that have been clearly identified as more vulnerable, from enduring further undue hardships by burdening more financially through the metering of a necessity of life, water!
- When we in our own District have children being fed in schools because there simply isn't enough food at home, do you think that it is reasonable to then deny these children access to clean fresh drinking water, water to bath in or water to wash clothing in because their caregiver (s) are petrified of the water meter ticking over and the added cost to an already financially stretched household. According to the first report looking at child poverty statistics in New Zealand, the rate of child poverty was highest in the Taranaki Region and remember (according to the 2018 New Zealand Census) of 117,561 people within Taranaki around 57,249 of them reside in the New Plymouth District. So it is reasonable to conclude that a number of the child poverty cases within the region, exist within our District.

- Due to our current economic and socio-economic climate and given the impacts of Covid 19 on business, employment and household incomes, water meters and their associated costs to individual homes would only serve to add additional financial pressure on those already struggling to stay afloat. Water is a vital and essential need for every person and every household as opposed to a new Multi-sports hub or extending tracks and trails which is a luxury or a want.

As such I recommend diverting 42 million from the 76 million that would have been spent on a Multi Sports Hub and extending tracks and trails (a want) to retaining the status quo with regard to water meters. Leaving a balance of 34 million which could be invested in part or entirely funding other projects such as in improving storm water management in Waitara (pg23), at a cost of 20 million, \$200,000 towards planting our place project, leaving 12 million 800 thousand dollars to invest in fixing our plumbing.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

I support option 3, recommending that this project be funded from funds saved from NOT building a multi sports complex. The sports hub would cost \$40 million, so take \$20 million from funds saved by not building it and invest in the inadequate stormwater management in Waitara.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

The Council has admitted to underinvesting in infrastructure, for this I congratulate you and recommend that you focus on Needs (necessities) as opposed to Wants (desires) for the next few years. The funding saved could be invested in other projects such as not introducing water meters

Boosting our Climate Action Framework

Option 1: Do nothing. Status quo. Continue working on the CAF but no new actions or additional funding.

Comments

Divert the funding for this to our needs such as fixing our plumbing, water supply is vital

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

This project is a costly "want". We do not urgently NEED another sports hub especially considering the money we are paying to fix, what was originally sold to the community as a multi sports hub to an outside contractor (Yarrow Stadium). However we NEED to invest in our water networks that is an actual "NEED" and we "NEED" to protect our vulnerable from additional household cost that would be incurred should water meters be installed. Use this funding for the benefit of all.

What else?

The Council has admitted to underinvesting in infrastructure, for this I congratulate you and recommend that you focus on Needs (necessities) as opposed to Wants (desires). I thank you for the opportunity to provide the Council with feedback. However I implore this Council to be the first in a long time to stand up and focus the needs of the community not the wants. Stadiums and tracks may be nice but so is free running water to every home and streets free of sewerage and overflows. Our infrastructure has for too long been neglected and is only degrading with age and heavier use. Flushing toilets and free running water, clean rivers and seas may not be as stimulating as a majestic sports field but I'm sure they are much more appreciated by a larger percentage of the community and more often.

NPDC's Draft 10 Year Plan

Office Use Only: 6316

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option C: Fully debt fund long life assets.

Comments

Possible to piggy back off national plan to address state of plumbing & where priority focus should be. Plus learn from how other regions (ie. Wellington in news alot of late) as to how addressing, things to consider & lessons to learn. Finally how do any plans fit into other risks - earthquake, volcanic activity risk - are these considered in what actions are taken around fixing plumbing & future proofing for these events. Or if / when these events occur will be a case of addressing then.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Comments

Where will the forecasted savings in water saving plans be applied to - Plumbing fix, Greening, Pay it Forward, back to Rate payers.

Improving stormwater management in Waitara

Option 2: Invest \$9 million over 10 years.

Extending our tracks and trails network

Option 2: Extend the Coastal Walkway from Bell Block to Waitara and develop further the Taranaki Traverse Mountain to Sea, costing \$36 million. NPDC's preferred option.

Boosting our Climate Action Framework

Option 2: Continue working on the CAF, implement Planting our Place costing \$200,000 per year and electrifying our NPDC vehicle fleet costing \$1 million over 10 years. Begin additional funding of \$150,000 per year for three years. NPDC's preferred option.

Developing a multi-sport hub

Option 3: Develop the hub and begin construction of the building faster, with work starting in year 4 and contributing \$40 million.

Comments

Region has been crying out for a community hub for sport, recreation, leisure & entertainment for far to long. This should be fast tracked & pushed forward with expedience for the benefit of community as a whole for all ages young & old.

Saving water and water meters

Option 3: Medium. A middle of the range water saving plan, including water meters. This will cost \$50 million over 10 years while reducing new water supply assets, saving \$121 million over the long term. NPDC's preferred option.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Extending our tracks and trails network

Option 1: Do nothing. Status quo. No new or additional investment in tracks and trails.

Comments

While these are 'nice to haves', we need to fix some of the serious stuff like water infrastructure prior. Increasing tourism has its place but can lead to a lot more demand for infrastructure to support them, which might not be in the budgets here - e.g. extra parking, public toilets, extra track maintenance. A lot of we retirees are on fixed incomes and cannot easily cope with double figure % rates increases.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Comments

Assuming rates will inevitably soar, then I'd rather be paying for this sort of thing before improving attractions to Taranaki, because in my opinion climate action is more urgent.

Developing a multi-sport hub

Option 1: Do not develop a multi-sport hub.

Comments

Compared to affordable facilities for amateur arts/ music/ cultural activities performance, I believe sports facilities are already well provided for. Although sport can be fantastic at getting young people involved in activities for a short period of their lives while they are physically able, people forget that amateur arts/ music/ cultural activities can involve people throughout their lives, from early age well into old age, making the city and district a more interesting and attractive place to live in. At the moment, whether for sport or other, this I believe falls into the 'nice to have' category, and therefore is not as urgent as the water infrastructure.

NPDC's Draft 10 Year Plan

Office Use Only: 6330

Submission No: 2499

Cameron Curd

Wish to speak to the Council: No

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 4. High. Clear out the backlog and make significant improvements. \$229 million additional funding.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Happy to pay more rates to have this issue fixed, as while it's not 'sexy' we need plumbing!!!!!! :)

Saving water and water meters

Option 4: High. A significant water saving plan, including water meters. This will cost \$56 million over 10 years while reducing new water supply assets, saving \$120 million over the long term.

Comments

Water is a precious resource and we need to use it wisely, and not waste it.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

As a former school student of Waitara, I know the risks of flooding in the low-lying town and the effects it causes. Happy to vote for option 3 to start the process of getting it fixed.

Extending our tracks and trails network

Option 3: Option 2, plus give our tracks and trails network a boost over the next 10 years at a total cost of \$60 million.

Comments

Happy with option 3 to spread it out over the next 10 years at a cost of \$60 million dollars.

Boosting our Climate Action Framework

Option 3: As per option 2, plus make the additional funding of \$150,000 per year permanent.

Developing a multi-sport hub

Option 2: Develop the hub and begin construction of the building in year 6, contributing \$40 million.
NPDC's preferred option.

What else?

Keep up the great work NPDC :)

NPDC's Draft 10 Year Plan

Submission No: 2500

Walter Garrett

Organisation: Grey Power New Plymouth Assn Inc

Wish to speak to the Council: Yes

Fixing our plumbing

How much should we invest in our plumbing over the next 10 years?

Option 3. Medium. Clear out the backlog and start making some improvements. \$140 million additional funding. NPDC's preferred option.

How do we pay for fixing our plumbing?

Option B: Partially debt fund long life assets to bridge the gap. NPDC's preferred option.

Comments

Very necessary to get "our plumbing" backlog of work underway as soon as possible. It is unfortunate that such a backlog exists and maintenance has not kept pace with growth of the district. It is time to get on with the necessary work. Option 3 is ticked because it is a medium option and will be more acceptable to Grey Power New Plymouth Assn members than option 4 which has a significantly higher rates increase.

Saving water and water meters

Option 2: Low. Introduce a water saving plan, including water meters. This will cost \$45 million over 10 years while reducing new water supply assets, saving \$62 million over the long term.

Comments

It has been difficult to decide between Option 2 and Option 3, as the figures are close with little difference. As Committee members for Grey Power New Plymouth Assn, we recognise that for many members of Grey Power New Plymouth, the proposal to install water meters is not favoured, however, it seems inevitable, therefore Option 2 is more likely to find acceptance with the majority.

Improving stormwater management in Waitara

Option 3: Invest \$20 million over 10 years. NPDC's preferred option.

Comments

Waitara residents deserve better than the current situation, so let's fix the problems. Grey Power New Plymouth Assn has 100+ Waitara-based members.

Extending our tracks and trails network

Comments

No option has been ticked. Not viewed as a 'need' in view of the current proposed rate increase.

Boosting our Climate Action Framework

Comments

No option ticked. Members have indicated they will submit individually on this subject.

Developing a multi-sport hub

Comments

No option has been ticked. The Committee does not consider we are in a position to make an informed comment. Members will be responsible for their individual Submissions.

What else?

Grey Power New Plymouth Assn Inc has a membership of 1800, majority of whom are residential in the district.

While this Submission is for Grey Power New Plymouth Assn, it is acknowledged that the full membership has not provided a Mandate to the Committee, however the members at the general meeting on Thursday 23.3.21 clearly voiced their opinions about the proposed rate increase. Most of the members have been ratepayers for many years and feel strongly that future generations should also be responsible for contributing to costs of running the district. Therefore debt funding (intergenerational debt) is a fairer method than putting all the costs onto current ratepayers.

We will speak to this subject at the Hearing.
